VANTRUE S1 PRO Max

Vantrue S1 Pro Max Dual Dash Cam Instruction Manual

Model: **S1 PRO Max** | Brand: **VANTRUE**

PRODUCT OVERVIEW

The Vantrue S1 Pro Max is a flagship 4K+4K dual dash camera system designed for comprehensive vehicle surveillance. It features dual Sony STARVIS 2 IMX678 sensors, delivering exceptional clarity day and night. Key functionalities include advanced driver-assistance systems (ADAS/BSD), PlatePix technology for clear license plate capture, HDR Night Vision 4.0, 5GHz Wi-Fi, built-in GPS, and smart voice control. This bundle includes the necessary Hardwire Kit and LTE Module for enhanced parking monitoring and remote access capabilities.

SETUP AND INSTALLATION

1. Mounting the Dash Camera

Mount the front dash camera securely on your vehicle's windshield, ensuring it does not obstruct your view. Position it centrally for optimal recording. The rear camera should be mounted on the rear windshield, providing a clear view of the road behind.

2. Hardwire Kit Connection

The included hardwire kit enables continuous power supply for parking monitoring features. Follow the wiring diagram carefully:

- **Red Wire:** Connect to a 12V-30V rated power fuse (constant power).

- **Yellow Wire:** Connect to the ACC fuse slot (switched power, active when ignition is on).
- **Black Wire:** Connect to any metal part of the car chassis for ground.

The hardwire kit automatically converts 12V/24V vehicle power to 5V/2A for the dash cam.

3. LTE Module Installation

The LTE module (included) provides remote monitoring capabilities. Connect the LTE module to the dash cam as per the instructions provided with the module. Ensure a valid SIM card (not included) is inserted into the LTE module for cellular connectivity.

4. Inserting the SD Card

Insert a compatible microSD card (up to 1TB, sold separately) into the designated slot on the dash camera. Ensure the card is inserted correctly until it clicks into place. It is recommended to format the SD card within the dash cam's settings before first use and periodically thereafter.

1. Powering On/Off and Basic Recording

The dash cam will automatically power on and begin recording when your vehicle's ignition is turned on (if connected via ACC fuse). It will power off automatically when the ignition is turned off. Manual power control is also available via the power button.

2. Smart Voice Control

The S1 Pro Max supports hands-free operation using voice commands. This allows you to control essential functions without diverting your attention from the road. Common commands include:

- "Start recording"
- "Take photo"
- "Lock video"
- "Turn on screen" / "Turn off screen"

Smart Voice Control

It's multiple basic voice commands can be achieved hands-free to capture beautiful scenery or lock emergency videos, enhancing convenience and safety.

3. Wi-Fi and Mobile App Connection

The dash cam features 5GHz Wi-Fi for fast connection to the Vantrue Free app on your smartphone. This allows for:

- Live view of recordings.
- Reviewing and downloading footage directly to your phone.

- Adjusting camera settings.
- Over-the-air (OTA) firmware updates.

Download the "Vantrve Free" app from the App Store or Google Play.

Faster 5GHz Wi-Fi & GPS

You can quickly view/download/share footage quickly/playback your driving route via the Vantrve App without removing the SD card.

4. GPS Functionality

The built-in GPS module tracks your driving route and speed. This data can be viewed during video playback on the Vantrue Free app or a dedicated GPS player on your computer. GPS stamps can be embedded into your footage for accurate incident documentation.

5. ADAS and BSD Systems

The S1 Pro Max incorporates AI-powered Advanced Driver-Assistance Systems (ADAS) and Blind Spot Detection (BSD) to enhance driving safety:

- **ADAS:** Provides real-time voice alerts for potential dangers such as collision warnings, forward collision alerts, lane departure warnings, and pedestrian detection.
- **BSD:** Includes Lane Change Assist Alarm and Rear Collision Warning to alert you of vehicles in your blind spots or approaching from the rear.

6. Remote Monitoring and Cloud Features

With the LTE module and Vantrue Free app, you can remotely monitor your vehicle's surroundings from anywhere. This includes:

- **Real-time Remote Preview:** View live footage from your dash cam.
- **Instant Notifications:** Receive alerts for detected events.
- **Car Location Tracking:** Monitor your vehicle's location.
- **Smart Cloud Storage:** 2GB free storage for data backup, reducing risk of data loss.
- **Remote Files Management:** Playback and download video files stored on your SD card remotely.

Remote Preview

Access your dash cam footage from anywhere, monitoring your vehicle and surroundings in real time.

What are you doing 🗣️

I'm calling the police 🗣️

Leave now 🗣️

Image: Screenshot of the Vantrue app showing remote live preview of the dash cam footage, with options for voice commands like "What are you doing?" and "I'm calling the police."

Smart **Cloud Storage**

Comes with 2GB free storage space for data backup, greatly reducing the risk of data loss.

Remote Files Management

Playback and download the video files stored in your SD card anywhere, easy and convenient.

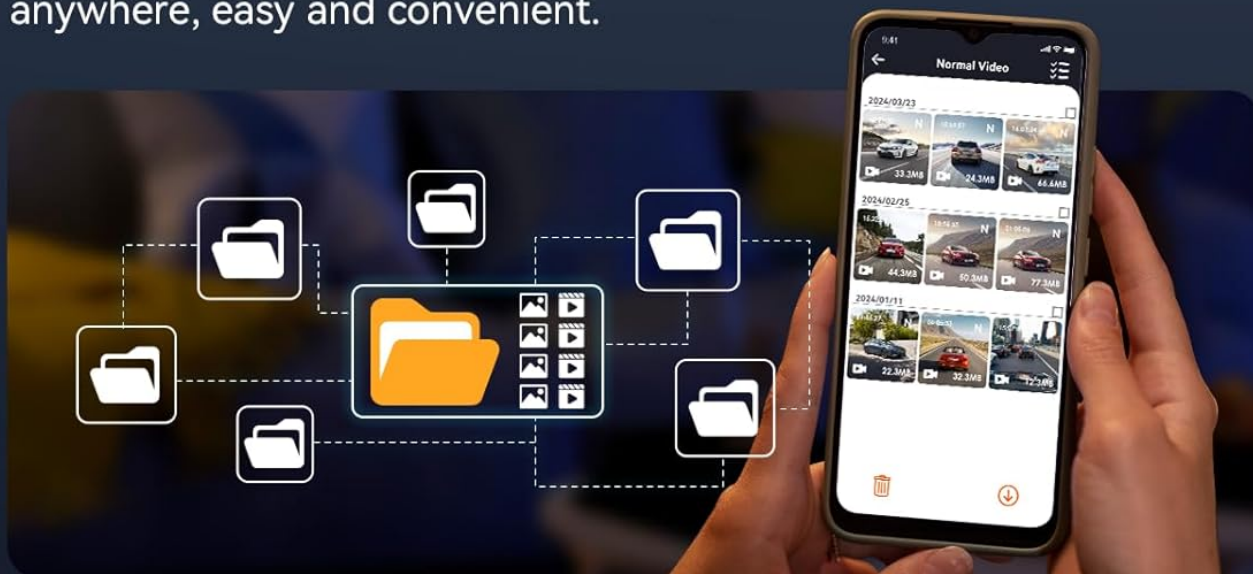

Image: Illustration of the 2GB free cloud storage feature and remote file management capabilities, allowing users to access and download videos from their SD card via the app.

MAINTENANCE

1. SD Card Management

To ensure optimal performance and prevent data corruption, it is recommended to format the microSD card regularly

(e.g., once a month) using the dash cam's settings menu. This helps maintain the card's health and ensures smooth recording. Replace the SD card if you experience frequent recording errors or data loss.

2. Cleaning the Device

Gently wipe the dash cam lenses with a soft, lint-free cloth to remove dust or smudges. Avoid using abrasive cleaners or solvents that could damage the lens coating or device casing. Keep the device free from excessive dust and moisture.

TROUBLESHOOTING

- **Dash cam not powering on:** Ensure the power connection (hardwire kit or USB) is secure and providing adequate power. Check vehicle's fuse if using hardwire kit.
- **Recording issues (e.g., freezing, corrupted files):** Format the SD card within the camera settings. Try a different, high-quality microSD card (U3 or higher recommended).
- **Wi-Fi connection problems:** Ensure the Vantrue Free app is updated. Restart both the dash cam and your smartphone. Check Wi-Fi settings on the dash cam.
- **GPS not tracking:** Ensure the dash cam has a clear view of the sky. Allow a few minutes for GPS signal acquisition after powering on.
- **Voice control not responding:** Speak clearly and ensure the environment is not excessively noisy. Check voice control settings in the dash cam menu.
- **Remote monitoring not working:** Verify the LTE module has a working SIM card with an active data plan. Ensure the LTE module is properly connected to the dash cam and has signal.

For further assistance or advanced troubleshooting, refer to the Vantrue official website or contact customer support.

SPECIFICATIONS

Feature	Detail
Model Name	S1 PRO Max
Brand	VANTRUE
Video Capture Resolution	4K (3840 x 2160 pixels) Dual
Image Sensor	Dual Sony STARVIS 2 IMX678
