5. SETUP INSTRUCTIONS

5.1 Assembling the Stand

1. Carefully remove the monitor and stand components from the packaging.
2. Attach the stand neck to the monitor's rear mounting point.
3. Secure the stand base to the stand neck using the provided screws.
4. Place the assembled monitor on a stable, flat surface.

5.2 VESA Mounting (Optional)

The monitor supports VESA mounting for wall or arm installation. Remove the stand if attached. Use compatible VESA mounting hardware (not included) according to the VESA standard for this monitor.

5.3 Connecting to a Device

The monitor offers multiple connection options. Choose the appropriate cable for your device.

- **HDMI/DisplayPort:** Connect one end of the HDMI or DisplayPort cable to your computer's graphics card and the other end to the corresponding port on the monitor.
- **USB-C:** For devices supporting video output via USB-C, connect the USB-C cable from your device to the monitor's USB-C port. This may also provide power and touch functionality depending on your device.
- **USB-B (for Touchscreen Functionality):** To enable the 10-point multi-touch feature, connect the USB-B cable from the monitor's USB-B port to an available USB-A port on your computer. This connection is crucial for touch input.

5.4 Power Connection

Connect the power adapter to the monitor's DC power input, then plug the adapter into a power outlet.

5.5 Initial Power On

Press the power button on the monitor. The power indicator will illuminate, and the display will turn on. If no signal is detected, ensure all cables are securely connected and your computer is powered on.

6. OPERATING INSTRUCTIONS

6.1 Power On/Off

Press the power button located on the monitor to turn it on or off.

6.2 On-Screen Display (OSD) Menu

The OSD menu allows you to adjust various monitor settings. Use the buttons on the monitor (typically located on the back or bottom) to navigate the menu. Common settings include:

- **Brightness/Contrast:** Adjust display luminance.
- **Color Settings:** Modify color temperature, gamma, and saturation.
- **Input Source:** Manually select HDMI, DisplayPort, or USB-C input.
- **Picture Mode:** Select predefined display modes (e.g., Standard, Game, Movie).
- **Adaptive Sync:** Enable or disable this feature for compatible graphics cards.

6.3 Touchscreen Functionality

With the USB-B cable connected to your computer, the monitor functions as a 10-point multi-touch display. You can use gestures such as:

- **Tap:** Equivalent to a mouse click.
- **Double Tap:** Equivalent to a double-click.
- **Pinch-to-Zoom:** Use two fingers to zoom in or out.
- **Swipe:** Navigate through content or scroll.
- **Drag:** Move items on the screen.

6.5 Eye-Friendly Technology

The monitor incorporates technology to reduce screen flicker and blue light emissions, aiming to minimize eye strain during prolonged use. These features can typically be adjusted or enabled through the OSD menu.

Figure 6.5: Visual representation of Eye-Friendly Technology, showing how it reduces screen flicker and blue light to enhance user comfort.

7. MAINTENANCE

- **Cleaning the Screen:** Gently wipe the screen with a soft, lint-free cloth. For stubborn marks, lightly dampen the cloth with water or a non-abrasive screen cleaner. Do not spray cleaner directly onto the screen.
- **Cleaning the Casing:** Use a soft, dry cloth to wipe the monitor casing. Avoid using harsh chemicals or abrasive materials.
- **Storage:** If storing the monitor for an extended period, disconnect it from power, cover it to protect from dust, and store in a cool, dry place.

8. TROUBLESHOOTING

Problem	Possible Cause	Solution
No image on screen	Monitor not powered on; incorrect input source; loose video cable.	Ensure power cable is connected and monitor is on. Select correct input source via OSD. Check video cable connections.
Touchscreen not responding	USB-B cable not connected; incorrect driver; incompatible device.	Ensure USB-B cable is connected from monitor to computer. Check device compatibility. Calibrate touch input in OS settings if multiple touchscreens are present.
Image flickering or distorted	Faulty video cable; incorrect resolution/refresh rate; graphics card issue.	Replace video cable. Adjust resolution/refresh rate in OS settings. Update graphics drivers.
No sound from monitor speakers	Volume too low; audio output not selected; no audio signal via video cable.	Increase monitor volume. Ensure monitor is selected as audio output in OS. Check if video cable supports audio transmission.
