3.2 Assembly Steps

1. **Unpack Components:** Carefully remove all parts from the packaging and lay them out on a clean, soft surface (e.g., a blanket or carpet) to prevent scratches.
2. **Identify Parts:** Refer to the included parts list and diagrams to identify each component.
3. **Assemble Frame:** Attach the metal legs to the support beams using the provided hardware. Ensure all connections are secure but do not overtighten initially.
4. **Attach Desktop Panels:** Carefully place the engineered wood desktop panels onto the assembled frame. Align the pre-drilled holes and secure the panels with the appropriate screws.
5. **Install Adjustable Leg Pads:** Screw the adjustable leg pads into the bottom of each desk leg. These pads help stabilize the desk on uneven floors.
6. **Final Tightening:** Once all components are in place, systematically tighten all screws and bolts. Avoid overtightening to prevent damage.
7. **Position Desk:** Move the assembled desk to its desired location. Adjust the leg pads as needed to ensure the desk is level and stable.

4.2 Stability and Leveling

The robust steel frame and adjustable leg pads ensure stability. If the desk wobbles, adjust the leg pads by rotating them until all four legs make firm contact with the floor and the desk is level.

5. MAINTENANCE

Proper care will extend the life and appearance of your desk.

- **Cleaning:** Wipe the desk surfaces with a dry cloth. For stubborn marks, a slightly damp cloth followed by a dry cloth can be used. Avoid harsh chemicals or abrasive cleaners.
- **Inspection:** Periodically check all screws and bolts to ensure they remain tight. Retighten if necessary.
- **Avoid Excessive Weight:** Do not place excessively heavy items on the desk, especially concentrated in one area, to prevent damage to the desktop or frame.
- **Protect Surfaces:** Use coasters for drinks and desk pads for writing or using sharp objects to protect the laminated finish.

6. TROUBLESHOOTING

If you encounter any issues with your desk, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
