TROUBLESHOOTING

If you encounter any issues with your dining table, refer to the following common problems and solutions:

- **Table is Wobbly:**

Solution: Check all assembly screws and bolts. Tighten any that are loose. Ensure the table is on a flat, even surface. If the floor is uneven, use furniture levelers if available.

- **Scratches on Tabletop:**

Solution: For minor scratches, furniture repair markers or polishes designed for wood grain finishes may help. For deeper scratches, professional repair might be necessary. Always use protective mats to prevent future damage.

- **Difficulty Cleaning Stains:**

Solution: For most stains, a damp cloth with mild soap should suffice. For tougher stains, a specialized furniture cleaner for engineered wood may be used, but always test on an inconspicuous area first.
