## Osprey 10007389

# Osprey Farpoint 40L Men's Travel Backpack

Model: 10007389

## INTRODUCTION

The Osprey Farpoint 40L is a travel backpack designed for efficiency and comfort, ideal for carry-on travel. It integrates backpacking design principles with travel-specific features, including a breathable, adjustable fit, a LightWire frame for load support, easy-slide zippers, an external toiletry pocket, and a dedicated laptop sleeve.

This manual provides essential information to help you maximize your backpack's potential, from initial setup to long-term care.

## SETUP: ADJUSTING YOUR BACKPACK

Proper adjustment of your Farpoint 40L is crucial for comfort and load distribution, especially when carrying heavier loads. The backpack features a men's-specific fit and an adjustable torso length.

### Torso Length Adjustment

The Farpoint 40L features an adjustable torso length to customize the fit to your body. Locate the adjustment mechanism on the back panel, typically a hook-and-loop or ladder-lock system. Adjust the shoulder harness up or down until the hipbelt sits comfortably over your iliac crest (hip bones) and the shoulder straps curve naturally over your shoulders without gapping or digging.

Figure 1: Rear view of the Farpoint 40L, highlighting the adjustable harness and hipbelt.

## Harness and Hipbelt Fitting

1. **Hipbelt:** Fasten the hipbelt buckle and tighten the straps until the hipbelt is snug around your hips. Approximately 60-80% of the pack's weight should rest on your hips.
2. **Shoulder Straps:** Pull the shoulder strap adjusters to snug the pack against your back. Avoid overtightening, which can cause discomfort.
3. **Load Lifters:** Adjust the load lifter straps (located above the shoulder straps, connecting to the top of the pack) to pull the pack closer to your body. This helps stabilize the load and prevent it from pulling

backward.

4. **Sternum Strap:** Fasten the sternum strap across your chest and adjust its height and tension for comfort. The sternum strap includes an integrated whistle for emergencies.

## Stability & Ventilation

A LightWire perimeter frame works with an internal framesheet and a cushioned, mesh-covered AirScape™ backpanel for optimal load carry.

Figure 2: Proper fit of the Farpoint backpack, showcasing stability and ventilation.

### AirScape Backpanel

The AirScape backpanel provides close-to-body stability and ventilation, ensuring comfort during extended wear. Its mesh-covered foam ridges allow airflow while keeping the pack's weight close to your center of gravity.

# AIRSCAPE™

## Close-to-body stability

Built for those who value stability and dynamic movement, Airscape keeps the pack close to the body for a balanced, secure fit.

Figure 3: Detail of the AirScape backpanel for ventilation and stability.

## OPERATING: USING YOUR FARPOINT 40L

### Packing the Main Compartment

The Farpoint 40L features a large, U-zip main compartment for easy access, similar to a suitcase. Internal compression straps help secure your belongings and maximize space.

Figure 4: Main compartment opened for packing, showing internal organization.

- Place heavier items closer to your back for better balance.
- Utilize the internal compression straps to cinch down your clothing and gear, preventing shifting during transit.

- The large mesh interior lid pocket is suitable for smaller items that require quick access or ventilation.

Figure 5: Using internal compression straps to secure packed items.

## Laptop Sleeve and Toiletry Pocket

The Farpoint 40L includes dedicated compartments for electronics and toiletries, enhancing organization and accessibility.

- **Laptop Sleeve:** A padded sleeve is located to protect your laptop or tablet. This sleeve is easily accessible, making security checks more efficient.

Figure 6: Inserting a laptop into the dedicated padded sleeve.

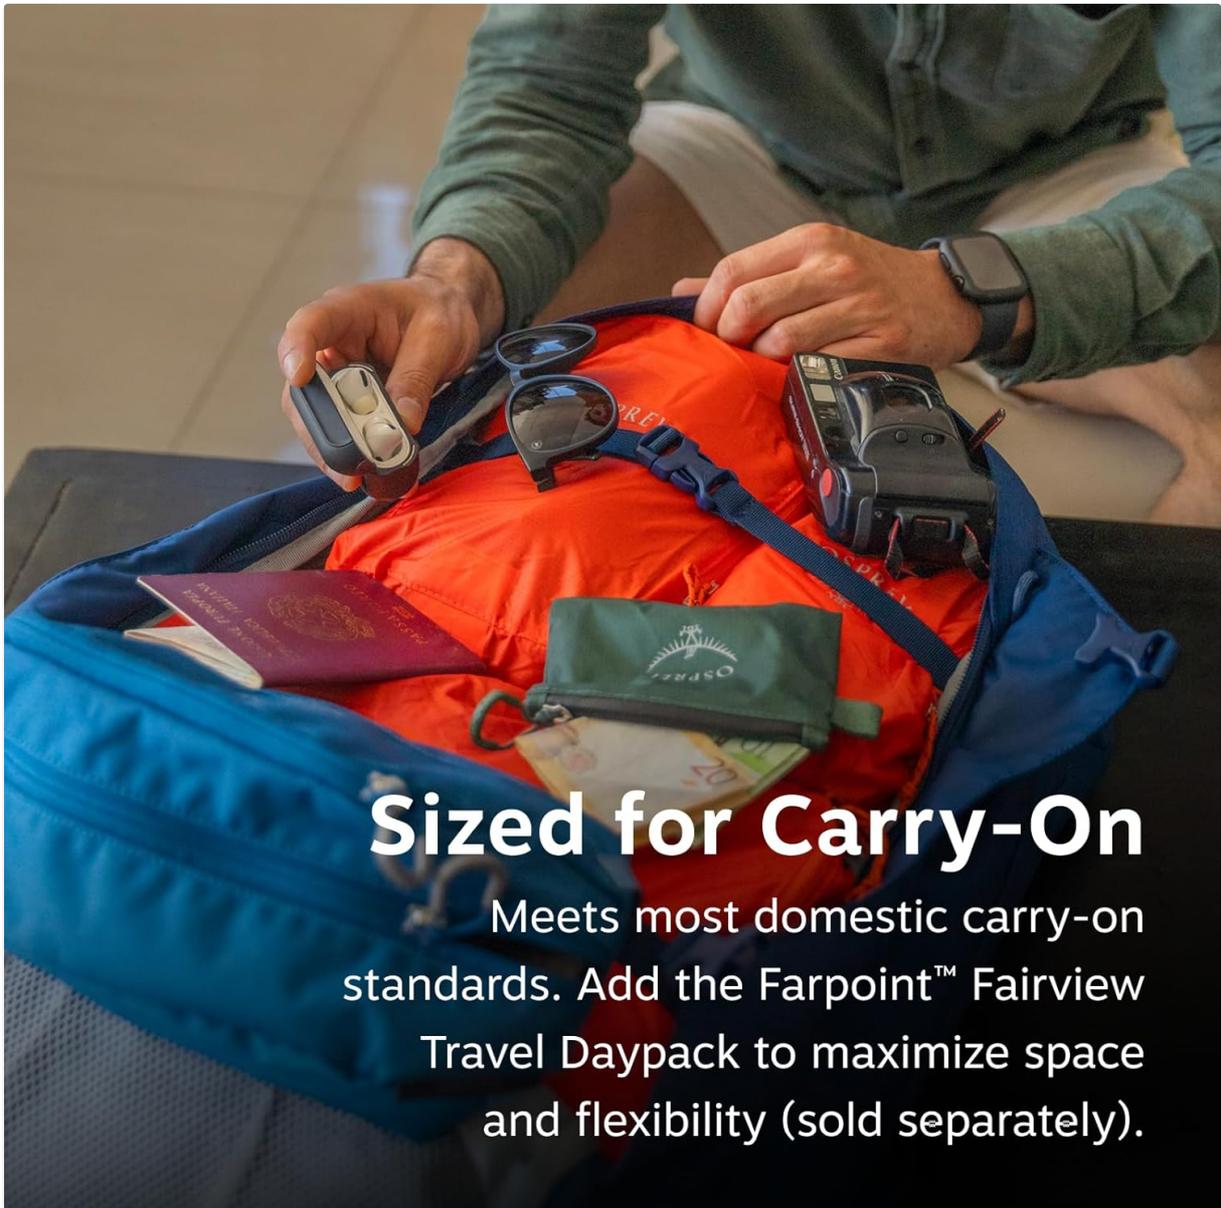

- **Toiletry Pocket:** An external, direct-zip 3-1-1 pocket is provided for liquids and gels, allowing for quick removal during airport security screenings.

Figure 7: Accessing the external toiletry pocket.

## Carry-On Compliance

The Farpoint 40L is designed to meet most domestic carry-on size requirements. Always verify current regulations with your specific airline before travel.

## Sized for Carry-On

Meets most domestic carry-on standards. Add the Farpoint™ Fairview Travel Daypack to maximize space and flexibility (sold separately).

Figure 8: The Farpoint 40L is designed to meet carry-on standards.

### Stowaway Harness and Hipbelt

For checked baggage or when using the pack as a duffel, the harness and hipbelt can be stowed away. This protects the straps from damage and creates a streamlined profile.

# Stowaway Harness and Hipbelt

Padded, breathable harness and hipbelt stow for streamlined travel and deploy quickly for agile, hands-free backpack convenience.

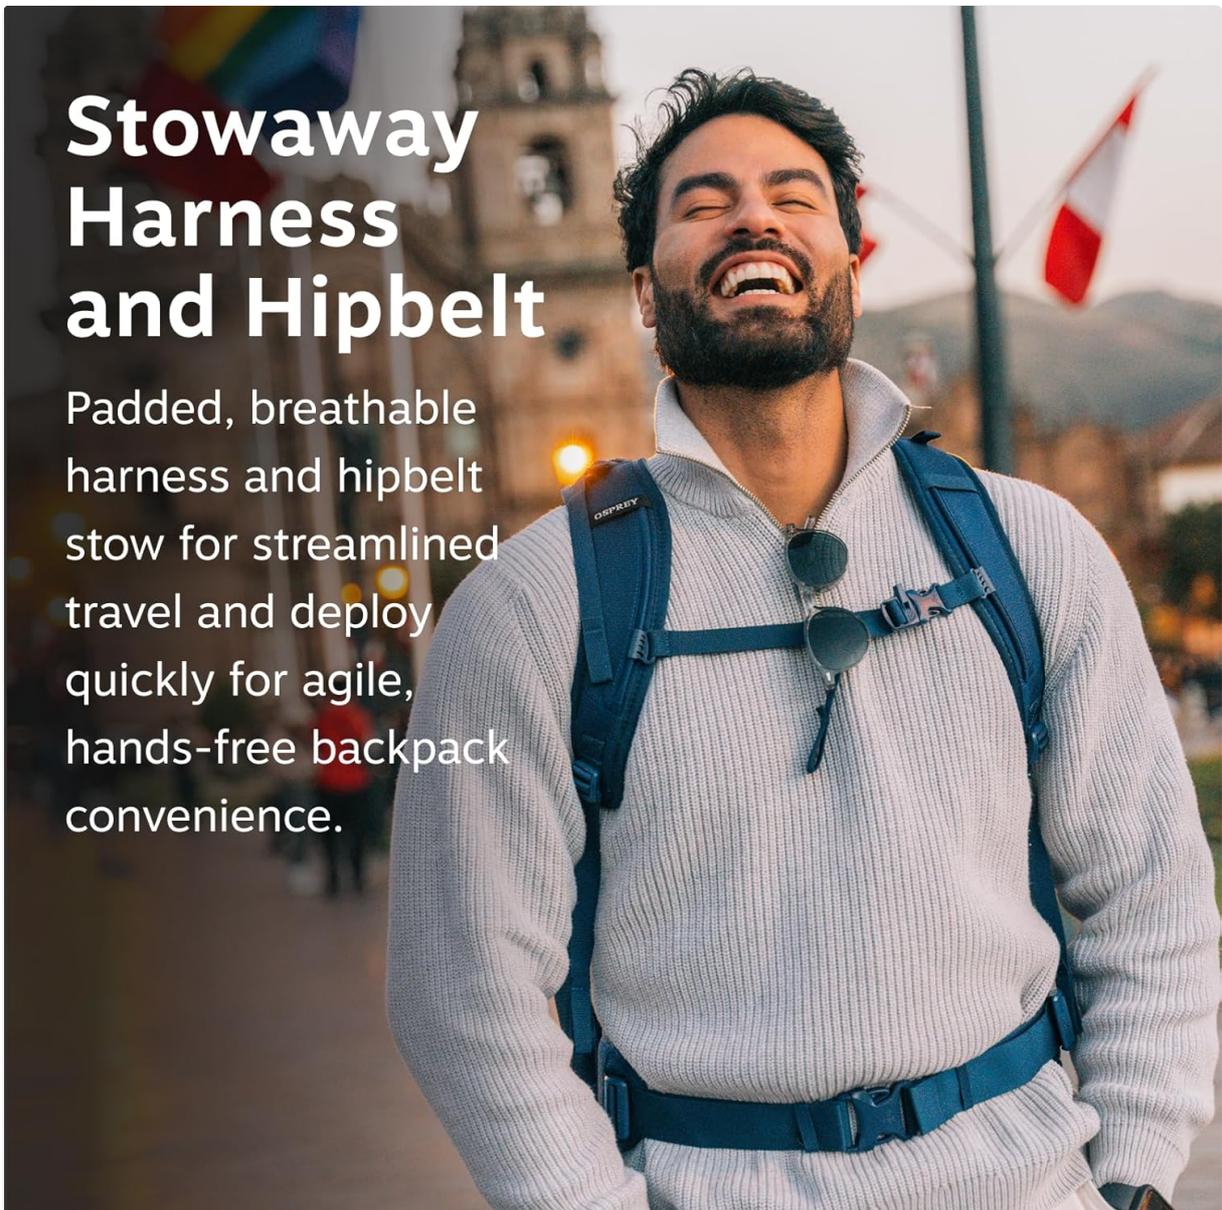

Figure 9: The stowaway harness and hipbelt provide comfort and protection during travel.

## MAINTENANCE

Proper care extends the life of your Osprey Farpoint 40L backpack.

### Cleaning Instructions

- **Spot Cleaning:** For minor dirt, use a damp cloth with mild soap. Gently scrub the affected area and rinse thoroughly with clean water.
- **Deep Cleaning:** For more extensive cleaning, hand wash the entire pack in a tub or large sink with cool water and a mild, non-detergent soap. Avoid harsh chemicals or bleach.
- **Drying:** Hang the backpack upside down in a well-ventilated area, out of direct sunlight, to air dry completely. Ensure all compartments are open to prevent mildew. Do not machine wash or tumble dry.

### Zipper and Fabric Care

- Regularly inspect zippers for debris and clean as needed. Lubricate with a zipper-specific lubricant if they become stiff.
- The fabric is water-resistant. For prolonged exposure to rain, consider using a rain cover (sold separately) to protect contents.

## TROUBLESHOOTING

If you encounter issues with your Farpoint 40L, consider the following:

- **Discomfort during wear:** Re-evaluate your torso length adjustment and strap tension. Ensure the hipbelt is bearing the majority of the load. Refer to the "Setup" section.
- **Difficulty with zippers:** Check for fabric caught in the zipper teeth. Clean any dirt or debris from the zipper track.
- **Damage to components:** For issues like torn fabric, worn buckles, or broken zippers, refer to the Osprey All Mighty Guarantee for repair or replacement options.

## SPECIFICATIONS

| Feature            | Detail                       |
|--------------------|------------------------------|
| Product Dimensions | 9.1 x 13.8 x 21.7 inches     |
| Item Weight        | 3.42 pounds (1.56 Kilograms) |

## WARRANTY AND SUPPORT

Osprey stands behind the quality of its products with the **All Mighty Guarantee**.

### Osprey All Mighty Guarantee

Osprey is committed to ensuring its products withstand the test of time. If your product experiences damage such as a torn piece of fabric, a worn-out buckle, or a broken zipper, Osprey will repair or replace it at no cost. This guarantee covers any reason, any product, any era. Certain exclusions may apply (e.g., Poco Child Carrier and Accessories, Raptor Pro, Soelden/Sopris Pro have limited warranties).
