1. INTRODUCTION

The ENOMIR Wireless CarPlay and Android Auto Adapter provides a seamless wireless connection for your smartphone to your car's infotainment system. This device eliminates the need for cables, offering convenience and a tidy vehicle interior. It supports both Apple CarPlay and Android Auto, automatically detecting your device's operating system for a smooth user experience.

This manual provides detailed instructions for setting up, operating, and maintaining your adapter, along with troubleshooting tips and product specifications.

2. SETUP INSTRUCTIONS

Setting up your ENOMIR Wireless Adapter is a straightforward process designed for quick integration with your vehicle.

2.1 Initial Connection

- 1. Locate USB Port:** Identify the USB-A or USB-C data port in your vehicle. This is typically the port used for wired CarPlay or Android Auto.
- 2. Insert Adapter:** Plug the ENOMIR Wireless Adapter into the vehicle's USB data port. The adapter is designed for a flush fit.
- 3. Power On:** Once plugged in, the adapter will power on, indicated by a green LED light. Your car's infotainment screen should display a message indicating a connection attempt or a prompt to connect.

2.2 Pairing Your Smartphone

1. **Enable Wireless Functions:** On your smartphone, ensure both Wi-Fi and Bluetooth are enabled. Do not manually connect to the adapter's Wi-Fi network at this stage.
2. **Bluetooth Pairing:** On your phone, go to Bluetooth settings and search for available devices. Select the device named "Smartbox-XXXX" (where XXXX is a unique identifier).
3. **Confirm Pairing:** A pairing request will appear on your phone and potentially on your car's screen. Confirm the pairing by entering the displayed code if prompted.
4. **Automatic Connection:** After successful Bluetooth pairing, your phone will automatically establish a Wi-Fi connection with the adapter, and either CarPlay or Android Auto will launch on your car's display.

Once paired, the adapter will automatically reconnect to your phone each time you enter the vehicle, provided your phone's Bluetooth and Wi-Fi are active.

3. OPERATING INSTRUCTIONS

The ENOMIR Wireless Adapter provides a seamless and interactive experience, mirroring your smartphone's interface onto your car's display.

3.1 Automatic Reconnection

After the initial setup, the adapter is designed to automatically reconnect to your previously paired smartphone within approximately 3 seconds of starting your vehicle. This ensures a quick and hassle-free start to your journey.

Image: The adapter automatically reconnecting to a smartphone as the user approaches the vehicle.

3.2 Using Voice Assistants

Access your smartphone's voice assistant (Siri for Apple CarPlay, Google Assistant for Android Auto) directly through your car's microphone and speakers. This allows for hands-free control of navigation, calls, messages, and music.

- **Activate Siri:** Say "Hey Siri" or press the voice command button on your steering wheel.
- **Activate Google Assistant:** Say "Hey Google" or press the voice command button on your steering wheel.

3.3 Car Control Integration

The adapter maintains compatibility with your vehicle's original control methods, allowing you to interact with CarPlay or Android Auto using:

- **Touch Screen:** Directly interact with the car's display if it is touch-enabled.
- **Control Knob:** Use the vehicle's central control knob for navigation and selection.
- **Steering Wheel Buttons:** Utilize existing steering wheel controls for audio, calls, and voice commands.

4. COMPATIBILITY

The ENOMIR Wireless Adapter is designed for broad compatibility with a range of smartphones and vehicles.

4.1 Smartphone Compatibility

- **Apple CarPlay:** Compatible with iPhone 6 or later models running iOS 10 or later.
- **Android Auto:** Compatible with Android phones running Android 11 or later.

- [Android Auto Compatible Models](#)

Image: Overview of vehicle compatibility, suggesting a wide range of supported car models.

Note: Your vehicle must have a factory-installed wired CarPlay or Android Auto system for this adapter to function.

5. MAINTENANCE

The ENOMIR Wireless Adapter requires minimal maintenance to ensure optimal performance and longevity.

- **Cleaning:** Gently wipe the adapter with a soft, dry cloth to remove dust or smudges. Avoid using liquid cleaners or abrasive materials.
- **Storage:** When not in use for extended periods, store the adapter in a cool, dry place away from direct sunlight and extreme temperatures.
- **Handling:** Handle the adapter with care. Avoid dropping it or subjecting it to strong impacts, which could damage internal components.
- **Connection Integrity:** Ensure the USB connection port in your vehicle is clean and free of debris to prevent connection issues.

6. TROUBLESHOOTING

If you encounter issues with your ENOMIR Wireless Adapter, please refer to the following common solutions:

6.1 Connection Issues

- **Adapter Not Connecting:**
 - Ensure the adapter is fully inserted into the car's USB data port.
 - Verify that your car supports wired CarPlay or Android Auto natively.
 - Check if your phone's Bluetooth and Wi-Fi are enabled.

- Try unplugging the adapter and plugging it back in.
- Restart your phone and your car's infotainment system.

- **Frequent Disconnections:**

- Ensure your phone is within close proximity to the adapter and not obstructed.
- Check for any potential interference from other wireless devices.
- If using an extension cable, ensure it is securely connected and not damaged. The product includes two extension cables if needed.
- Update your phone's operating system to the latest version.

- **Automatic Reconnection Failure:**

- If the adapter does not automatically reconnect, try toggling your phone's Wi-Fi off and then back on. This often resolves the issue.
- Ensure the adapter is not being unplugged and replugged frequently, which can sometimes disrupt the auto-connect feature.

6.2 Performance Issues

- **Lag or Delay:**

- Ensure your phone is not running too many background applications.
- Check your phone's signal strength, especially for navigation apps.
- The adapter uses dual-band Wi-Fi (2.4G/5.8Ghz) and Bluetooth 5.2 for stable connection. Ensure no other devices are heavily utilizing these frequencies nearby.

- **Audio Quality:**

- Verify that your car's audio system is functioning correctly.
- Ensure the volume on both your phone and car is appropriately set.

If these steps do not resolve your issue, please contact customer support for further assistance.

7. SPECIFICATIONS

Feature	Detail
Model	2025 Upgrade
Connectivity	Wireless CarPlay, Wireless Android Auto
Wireless Technology	Dual-band Wi-Fi (2.4G/5.8Ghz), Bluetooth 5.2
Dimensions	3.94 x 3.31 x 1.46 inches
Item Weight	3.84 ounces
Power Source	Corded Electric (via car's USB port)
Compatible iPhone OS	iOS 10 or later (iPhone 6 or later)
Compatible Android OS	Android 11 or later

Feature	Detail
Included Accessories	USB to USB Extension Cable, USB to USB-C Data Cable
