

LUNA HOME E2

Luna Light Bulb Security Camera User Manual

Brand: LUNA HOME | Model: E2

INTRODUCTION

The Luna Light Bulb Security Camera is an innovative solution for home security, offering 360° pan and tilt capabilities, 2K color night vision, and smart AI-powered notifications. Designed for effortless installation into standard E26/E27 bulb sockets, this camera provides comprehensive surveillance for both indoor and outdoor environments. This manual provides detailed instructions for setup, operation, maintenance, and troubleshooting to ensure optimal performance of your Luna security camera.

WHAT'S IN THE BOX

- 1x Luna Light Bulb Security Camera
- 1x E27 Extender
- 1x Adapter for Wi-Fi pairing test

KEY FEATURES

Effortless Installation

Simply screw the camera into any standard E26/E27 bulb socket. Connect to your 2.4GHz Wi-Fi 6 network for instant setup. An E27 extender is included to ensure compatibility with most lampshades. **Note:** This camera does not work with 5GHz Wi-Fi networks.

Extender For Extra Clearance

Comes with a 3.75 inch extender to help the camera clear most outdoor sconces. Check clearance if your fixture hangs low.

Image: The Luna camera installed in an outdoor light fixture, demonstrating the use of the included extender for proper clearance.

360° Pan, Tilt & Zoom

Achieve a comprehensive view of your property with 360° panoramic coverage. The camera allows for pan, tilt, and digital zoom functions to monitor specific areas like entrances, porches, or hallways.

Day or Night, See It All

Luna's 2K video and infrared night vision deliver clear, detailed footage even in complete darkness. And with 350° pan and 90° tilt view, you can rest easy knowing your home is always in sight.

Image: The Luna camera mounted in an outdoor light, illustrating its wide pan and tilt range for comprehensive coverage.

2K Color Night Vision

Capture clear 2K ultra-HD footage both day and night. Advanced color night vision technology provides detailed, full-color video even in low-light conditions, allowing identification of details such as vehicle color or clothing.

Colored Night Vision

See more detail at night with full color video, so you know the color of a car or what someone is wearing.

Traditional Night Vision

Color Night Vision

Intelligent AI Motion Detection & Smart Notifications

Receive real-time, descriptive alerts for events that matter most. The intelligent AI motion detection system provides specific notifications, such as "Delivery man with package walking toward front door," reducing false alarms. Customize motion zones to focus on critical areas.

Delivery man with package
walking toward front door

Smarter Custom Alerts

Get alerts like "FedEx delivers package" only from zones you choose to avoid repeated triggers like passing cars.

Image: A smartphone displaying a Luna app notification: "Delivery man with package walking toward front door," overlaid on a camera view of a person delivering a package.

Intelligent Motion Tracking

The camera pans to follow motion and records it to capture the full story as it happens.

Image: A split image illustrating the intelligent motion tracking feature, with red boxes highlighting a person being followed by the camera's view.

Built-in LED Light & Spotlight

Illuminate your surroundings with the integrated LED lamp and motion-activated spotlight. Both can be controlled via the Luna AI app, providing additional visibility and security.

Built-In Spotlight & Ambient Glow

Shine a light on what matters with motion activated security and ambient lighting that keeps your space lit.

Image: The Luna camera installed in an outdoor light fixture, highlighting its ambient light and motion-activated spotlight features.

Two-Way Audio

Communicate directly with visitors, delivery personnel, or deter unwanted individuals using the built-in microphone and speaker. Stay connected through the Luna AI App from anywhere.

Crisp Two-Way Audio

Luna's built-in microphone and speaker let you hear and speak through your camera with clarity, from wherever you are.

Continuous Recording & Cloud Storage

Enjoy 24/7 recording with secure US-based cloud storage (subscription required after free trial). Footage is protected with AES128 encryption, ensuring security and accessibility.

Built for All Weather

With an IP65 weather rating, the Luna camera is designed to withstand rain, snow, and heat, ensuring reliable operation in various outdoor conditions.

IP65 Weatherproof Rating

Built to withstand rain, snow, and heat—so your camera stays sharp, no matter the weather

SETUP GUIDE

1. Prepare the Installation Location

Ensure the light fixture is powered off at the switch before installation. The camera requires a standard E26/E27 bulb socket. If your lampshade requires extra clearance, use the provided E27 extender.

2. Install the Camera

Carefully screw the Luna Light Bulb Security Camera into the E26/E27 socket. Ensure it is securely fastened but do not overtighten.

3. Power On and Download App

Turn on the power to the light fixture. The camera will power on and indicate readiness for pairing. Download the "Luna AI" app from your smartphone's app store (available for iOS and Android).

4. **Connect to Wi-Fi**

Open the Luna AI app and follow the on-screen instructions to add your new device. The camera supports 2.4GHz Wi-Fi 6 networks. Ensure your phone is connected to a 2.4GHz network during the setup process. The included adapter can be used to test Wi-Fi pairing before final installation.

5. **Configure Settings**

Once connected, customize your camera settings within the app, including motion detection zones, notification preferences, and LED light control.

OPERATING INSTRUCTIONS

The Luna Light Bulb Security Camera is primarily operated through the Luna AI mobile application.

Live Viewing

Open the Luna AI app and select your camera to view live 2K HD video feed. You can pan, tilt, and zoom digitally within the live view to adjust your perspective.

Two-Way Audio

During live viewing, tap the microphone icon to speak through the camera's speaker. Tap the speaker icon to hear audio from the camera's location.

LED Light and Spotlight Control

Access the light settings within the app to manually turn the LED light on/off or adjust its brightness. You can also configure the motion-activated spotlight to turn on when motion is detected.

Event Playback and Recordings

Navigate to the "Events" or "Playback" section in the app to review recorded footage triggered by motion events. With a Luna Subscription Plan, you can access 30 days of cloud video storage and utilize features like keyword search for events and daily highlight reels.

Luna AI Features

	Without Subscription	With Subscription
Live Viewing	✓	✓

Image: A table outlining the features available with and without a Luna subscription, including live viewing, 2-way audio, color night vision, cloud storage, and AI alerts.

Notifications Management

Manage your notification preferences in the app settings. You can enable or disable specific types of alerts and adjust their sensitivity. For detailed, descriptive alerts, a subscription may be required after the free trial.

MAINTENANCE

- **Cleaning:** Gently wipe the camera lens and body with a soft, damp cloth. Avoid using harsh chemicals or abrasive materials that could damage the surface or lens.
- **Weather Protection:** While the camera has an IP65 weather rating, ensuring it is installed in a location that offers some protection from direct, prolonged exposure to extreme weather conditions (e.g., under an overhang) can extend its lifespan.
- **Firmware Updates:** Periodically check the Luna AI app for available firmware updates. Keeping your camera's firmware up-to-date ensures optimal performance, security, and access to new features.

TROUBLESHOOTING

Camera not connecting to Wi-Fi:

- Ensure your Wi-Fi network is 2.4GHz. The Luna camera does not support 5GHz Wi-Fi.
- Check the Wi-Fi signal strength at the installation location. If the signal is weak, consider moving your router closer or using a Wi-Fi extender.
- Verify that you have entered the correct Wi-Fi password.
- Restart your router and the camera, then attempt the connection process again.

Poor image quality or frequent disconnections:

- This often indicates a weak Wi-Fi signal. Relocate the camera or improve Wi-Fi coverage.
- Ensure there are no physical obstructions blocking the camera's view or Wi-Fi signal.
- Clean the camera lens if it appears blurry.

No motion detection alerts:

- Check the motion detection settings in the Luna AI app. Ensure it is enabled and sensitivity is adjusted appropriately.
- Verify that motion detection zones are correctly configured to cover the desired areas.
- Ensure your phone's notification settings allow alerts from the Luna AI app.

LED light not working:

- Check the light control settings in the Luna AI app.
- Ensure the light fixture switch is always in the "on" position for the camera to receive power and function, including its light features.
