VEVOR WF-A177

VEVOR Commercial Ice Shaver Crusher

MODEL: WF-A177 - INSTRUCTION MANUAL

1. Introduction

This manual provides comprehensive instructions for the VEVOR Commercial Ice Shaver Crusher, Model WF-A177. This electric snow cone maker is designed for both home and commercial use, offering efficient ice shaving with adjustable fineness. Please read this manual thoroughly before operation to ensure safe and effective use.

2. Safety Instructions

- Always ensure the top cap is securely closed before operating the machine.
- Plug the unit into a grounded power supply.
- Do not insert hands or foreign objects into the ice inlet or discharge chute while the machine is operating.
- If the machine becomes jammed by ice, use the reverse switch to clear the obstruction. Do not force the motor.
- Break any heavy ice lumps into smaller pieces before placing them into the ice cube box to prevent motor damage.
- Keep the machine away from children and pets.
- Unplug the machine from the power outlet before cleaning or performing any maintenance.

3. Product Features

The VEVOR Commercial Ice Shaver Crusher is equipped with several features designed for convenience and performance:

- **Efficient Ice Shaving:** Features a high-performance 350W motor and stainless steel blades, operating at 1500 RPM to produce up to 220 lbs (100 kg) of shaved ice per hour.
- **Adjustable Ice Fineness:** A built-in precision control system allows for multiple adjustable settings, from fine, delicate snow for snow cones to coarse ice for seafood preservation.

- **Large Capacity Ice Box:** The 4L ice cube box reduces the need for frequent refills, and a clear window allows easy monitoring of the ice level.
- **Secure and Convenient Operation:** Simple one-button start with security features including lid protection, overload protection, and a reverse switch to prevent ice jams.
- **Thoughtful Design Details:** Includes a built-in handle for easy transportation, a removable water tray for easy cleaning, and a drain outlet for flexible drainage.

4. Setup

1. **Unpacking:** Carefully remove the ice shaver from its packaging. Retain packaging for future storage or transport.
2. **Placement:** Place the machine on a stable, flat, and dry surface. Ensure there is adequate ventilation around the unit.
3. **Initial Cleaning:** Before first use, wipe down all internal surfaces that will come into contact with ice using a

damp cloth. Ensure the blades are handled with care.

4. **Drainage Setup:** If continuous drainage is desired, attach the provided drain pipe to the drain outlet at the bottom of the unit and direct it into a suitable container or sink.
5. **Power Connection:** Plug the power cord into a standard electrical outlet.

5. Operating Instructions

Follow these steps to operate your VEVOR Commercial Ice Shaver Crusher:

1. **Prepare Ice:** Ensure ice cubes are of an appropriate size (under 2 inches in diameter) to fit into the ice inlet. Break any large ice lumps.
2. **Load Ice:** Open the top cap and place ice cubes into the 4L ice cube box. Close the top cap securely.
3. **Adjust Fineness:** Turn the granular size adjuster knob (located near the ice chute) to your desired ice fineness (Rough for coarse, Fine for delicate snow).
4. **Position Container:** Place a cup or bowl under the ice discharge chute.
5. **Start Shaving:** Plug the unit into the power supply and switch the 'ON' button for crushing. The machine will begin shaving ice.
6. **Stop Shaving:** Switch the button to 'OFF' to stop the machine.

6. Maintenance

Regular maintenance ensures the longevity and optimal performance of your ice shaver:

- **Cleaning the Water Tray:** The water tray is designed for easy removal and cleaning. Regularly empty and clean the tray to prevent water buildup.
- **Draining Melted Ice:** Utilize the drain outlet and the provided drain pipe to easily remove melted water without disassembling the unit. This is especially useful for extended use.

- **Internal Cleaning:** After each use, wipe down the internal components, especially around the blades, with a clean, damp cloth. Exercise caution around the sharp blades.
- **Drying:** Ensure all parts are thoroughly dried before storing the machine to prevent mold or mildew growth.

7. Troubleshooting

- **Ice Jamming:** If ice jams during operation, immediately switch the machine to 'OFF' and then use the 'REVERSE' function to clear the obstruction. If the issue persists, unplug the unit and carefully remove any large ice pieces.
- **Motor Overload:** The machine is equipped with overload protection. If the motor stops unexpectedly, check for ice jams or excessively large ice pieces. Allow the motor to cool down before restarting.
- **Inconsistent Ice Fineness:** Adjust the granular size adjuster knob to achieve the desired ice texture. Ensure ice cubes are uniform in size for best results.

8. Specifications

Specification	Value
Item Model Number	WF-A177
Rated Power	350W
Ice Shaving Capacity	220 lbs/h (100 kg/h)
Ice Box Capacity	4 L
Product Dimensions	14.96 x 11.61 x 18.5 inches (380 x 295 x 470 mm)
Product Weight	29.8 lbs (13.5 kg)
Manufacturer	VEVOR
