4. SETUP

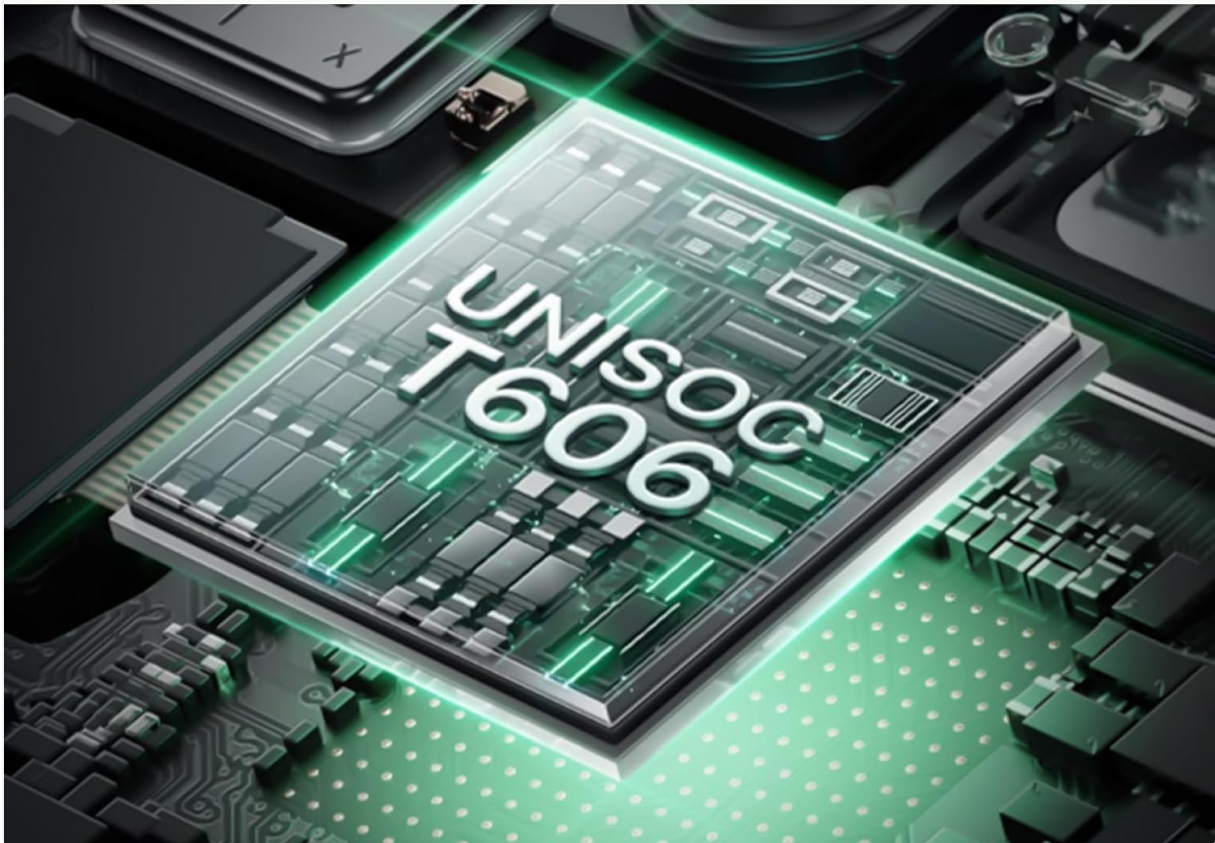

4.1 Inserting SIM and TF Cards

Your UMIDIGI G9T supports dual Nano SIM cards or one Nano SIM card and one TF (microSD) card for expandable storage up to 1TB.

1. Locate the SIM card tray on the side of your phone.
2. Insert the provided SIM tray ejector tool into the small hole next to the tray and press gently until the tray pops out.
3. Carefully place your Nano SIM card(s) and/or TF card into the designated slots on the tray. Ensure the gold contacts are facing down and the cards are correctly oriented.
4. Gently push the tray back into the phone until it is flush with the device's side.

6. CONNECTIVITY

6.1 Network Bands

The UMIDIGI G9T supports a wide range of 4G, 3G, and 2G network bands for global compatibility. Please verify your carrier's supported bands before use.

- **4G:** B1/2/3/4/5/7/8/17/18/19/20/26/28AB/66/38/40/41
- **3G:** B1/2/4/5/8
- **2G:** B2/3/5/8

Graphic illustrating the supported 4G, 3G, and 2G network bands for global compatibility.

6.2 Dual SIM Functionality

Utilize two SIM cards simultaneously for separate personal and work lines, or for enhanced network coverage.

6.3 Bluetooth

Connect to wireless accessories such as headphones, speakers, and smartwatches using Bluetooth 5.0.

6.4 GPS Navigation

The device supports multiple global navigation satellite systems including GPS, Glonass, Beidou, and Galileo for accurate positioning and navigation.

7. MAINTENANCE

7.1 Cleaning Your Device

To clean your UMIDIGI G9T, use a soft, lint-free cloth. Avoid using harsh chemicals or abrasive materials that could damage the screen or casing. For stubborn smudges, slightly dampen the cloth with water or a screen cleaner designed for electronics.

7.2 Software Updates

Regularly check for and install software updates to ensure your device has the latest features, security patches, and performance improvements. You can typically find this option in **Settings > System > System update**.

7.3 Battery Care

To prolong battery life, avoid exposing your phone to extreme temperatures. It is recommended to keep the battery charge between 20% and 80% for optimal long-term health. Use only the provided charger and cable or certified compatible accessories.

8. TROUBLESHOOTING

This section addresses common issues you might encounter with your UMIDIGI G9T.

Issue	Possible Solution
Phone does not power on	Ensure the battery is charged. Connect the phone to the charger for at least 10 minutes, then try powering on again. If it still doesn't work, perform a forced restart by holding the power button for 10-15 seconds.
Network connection problems	Check if your SIM card is properly inserted. Restart the phone. Go to Settings > Network & internet > Mobile network and ensure mobile data is enabled. Verify your APN settings with your carrier.
Apps are crashing or freezing	Clear the cache and data of the problematic app (Settings > Apps > [App Name] > Storage & cache). Update the app from the Google Play Store. If the issue persists, uninstall and reinstall the app.
Fingerprint/Face Unlock not working	Ensure your finger/face is clean and dry. Re-register your fingerprint/face in Settings > Security > Fingerprint Unlock / Face Unlock . Ensure there are no obstructions on the sensor or front camera.
Battery drains quickly	Check battery usage in Settings > Battery to identify power-hungry apps. Reduce screen brightness, disable unnecessary features like Bluetooth/GPS when not in use, and close background apps.

If you encounter issues not listed here or if the suggested solutions do not resolve your problem, please contact UMIDIGI customer support.
