Troubleshooting

If you encounter issues with your desk, refer to the following common solutions:

- **Desk Wobbles or is Unstable:**
  - Ensure all assembly screws and bolts are fully tightened.
  - Verify that the desk is placed on a level surface. Adjust the leg anti-slip and anti-scratch protection pads if your floor is uneven.

- **Drawers Do Not Slide Smoothly:**
  - Ensure the fabric drawers are correctly assembled and inserted into their compartments.
  - Check for any obstructions within the drawer compartments.
- **Power Outlets Not Working:**
  - Verify that the desk's main power cord is securely plugged into a functional wall outlet.
  - Check if the power strip itself has a reset button or indicator light.
  - Ensure devices are properly plugged into the outlets.
- **Parts Misalignment During Assembly:**
  - Review the assembly instructions carefully, paying close attention to the orientation of each part. Some components may appear similar but have specific left/right or front/back orientations.
