- **Ladder Use:** Always use the integrated ladder to access the upper bunk. Face the ladder when climbing up or down.

- **Guardrails:** Ensure guardrails are always in place on the upper bunk to prevent falls.
- **Weight Distribution:** Distribute weight evenly on both bunks. Avoid concentrating weight in one area.

6. MAINTENANCE

Regular maintenance will help prolong the life and ensure the safety of your bunk bed.

- **Cleaning:** Wipe down the metal frame with a soft, damp cloth. Avoid abrasive cleaners or harsh chemicals that could damage the lacquered finish.
- **Hardware Check:** Periodically (e.g., every 3-6 months) inspect all bolts, screws, and connections. Tighten any loose hardware to maintain stability and safety.
- **Structural Integrity:** Check for any signs of wear, damage, or bending in the metal frame. If any damage is found, discontinue use and contact customer support.

7. TROUBLESHOOTING

If you encounter any issues with your bunk bed, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Bed feels wobbly or unstable	Loose hardware connections.	Inspect all bolts and screws. Tighten any that are loose using the provided Allen wrench.
Squeaking noises	Loose connections or friction between metal parts.	Tighten all hardware. If squeaking persists, apply a small amount of silicone lubricant to connection points (avoiding mattress contact).
Ladder feels insecure	Ladder not properly attached or hardware is loose.	Ensure the ladder is correctly hooked onto the bunk bed frame and all securing bolts are tight.
