4. SETUP

4.1 Initial Charging of the Power Bank

Before first use, fully charge your Ntaanoo Magsafe Battery Pack. Connect the provided USB-C cable to the power bank's USB-C port and the other end to a compatible USB power adapter (not included). The LED indicators will illuminate to show charging progress and turn solid when fully charged.

4.2 Attaching to Your Device

For magnetic wireless charging, ensure your device is compatible with MagSafe technology or has a MagSafe-compatible case. Simply align the power bank with the back of your device; the strong magnets will snap it into place. The power bank will automatically turn on and begin charging.

7. SAFETY INFORMATION

To ensure safe operation and prolong the lifespan of your device, please observe the following safety guidelines:

- Do not expose the power bank to extreme temperatures (hot or cold), direct sunlight, or high humidity.
- Avoid dropping, disassembling, or attempting to repair the device yourself.
- Keep out of reach of children.
- Do not use if the power bank appears damaged or swollen.
- Dispose of the product responsibly according to local regulations.

- It is normal for the power bank and your device to become slightly warm during charging. If excessive heat is detected, disconnect immediately.

8. MAINTENANCE

- Clean the power bank with a soft, dry cloth. Do not use harsh chemicals or abrasive materials.
- Store the power bank in a cool, dry place when not in use.
- For optimal battery health, fully charge the power bank at least once every three months if stored for extended periods.

9. TROUBLESHOOTING

9.1 Power Bank Not Charging

- Ensure the USB-C cable is securely connected to both the power bank and the power adapter.
- Verify that the power adapter is functioning correctly and connected to a live power source.
- Try using a different USB-C cable or power adapter.

9.2 Device Not Charging Wirelessly

- Confirm your device is compatible with MagSafe or Qi wireless charging.
- Ensure your phone case is MagSafe-compatible. Thick or non-magnetic cases may prevent proper connection.
- Check for any foreign objects between the power bank and your device that might obstruct charging.
- Ensure the power bank has sufficient charge.

9.3 Device Not Charging via USB-C

- Ensure the USB-C cable is securely connected to both the power bank and your device.
- Verify that the cable is not damaged.
- Ensure the power bank has sufficient charge.

9.4 Power Bank or Device Overheating

- It is normal for devices to warm up during fast charging.
- If the device becomes excessively hot, disconnect it immediately and allow it to cool down before resuming use.
- Ensure proper ventilation and avoid charging in confined spaces or direct sunlight.
