5. ASSEMBLY INSTRUCTIONS

Follow these steps carefully for proper assembly. It is recommended to assemble with two people.

1. **Unpack and Identify Parts:** Lay out all components on a clean, soft surface (like a rug or blanket) to prevent scratches. Refer to the included parts list to identify each piece.
2. **Attach Side Rails to Headboard:** Secure the side rails to the headboard using the provided hardware. Ensure all bolts are tightened securely but do not overtighten.
3. **Attach Footboard:** Connect the footboard to the other end of the side rails, ensuring a snug fit.
4. **Install Center Support Beam:** Place the center support beam(s) into the designated slots or brackets on the side rails.
5. **Place Slats:** Position the wooden slats across the bed frame. The adhesive slats simplify this step, ensuring they stay in place and reduce noise. Ensure foams are added for noise reduction.

- 6. Install Charging Station:** Carefully insert the charging station unit into the designated slot on the headboard. Connect any necessary wiring as indicated in the detailed manual.
- 7. Final Tightening:** Once all components are in place, go back and tighten all bolts and screws to ensure the frame is stable and secure.
