MAINTENANCE

Cleaning

Wipe surfaces with a soft, damp cloth. Avoid using harsh chemicals or abrasive cleaners, as these can damage the finish. For spills, clean immediately to prevent staining.

Inspection

Periodically inspect all screws and connections to ensure they remain tight. Re-tighten if necessary. Check the anti-falling accessory for secure attachment to the wall.

TROUBLESHOOTING

- **Unit wobbles:** Ensure all screws are tightened. Adjust the leveling feet on the bottom of the unit to stabilize it on uneven floors.
- **Items falling off shelves:** Ensure items are placed within the shelf boundaries. The shelves have a protective design to minimize this, but overloading or improper placement can still cause items to fall.
- **Power hub not working:** Check if the power cord is securely plugged into a functional wall outlet. Verify that the devices connected to the power hub are working correctly and are not drawing excessive power.
- **Difficulty with assembly:** Review the assembly instructions carefully. Ensure all parts are correctly oriented and that you are using the correct hardware for each step. Do not force parts together.
