Troubleshooting

If you encounter any issues during installation or operation, please refer to the following general troubleshooting tips:

- **No Power:** Check all power connections, ensuring they are secure and correctly wired according to the diagram. Verify the vehicle's fuse box for any blown fuses.
- **No Audio:** Confirm speaker wire connections are correct and secure. Check audio settings on the unit, including volume levels and EQ settings.
- **Touchscreen Unresponsive:** Try restarting the unit. Ensure the screen is clean and free from debris.
- **CarPlay/Android Auto Not Connecting:** Ensure Bluetooth and Wi-Fi are enabled on both the unit and your smartphone. Try connecting via USB first to establish initial pairing. Check for any software updates for the unit or your phone.
- **Backup Camera Not Displaying:** Verify the camera's power and video signal connections. Ensure the reverse trigger wire is correctly connected to the vehicle's reverse light circuit.
- **GPS Signal Issues:** Ensure the GPS antenna is installed in a location with a clear view of the sky and is securely connected to the unit.
