5. MAINTENANCE

Regular maintenance ensures the longevity and safe operation of your FEIERDUN Power Cage. Follow these guidelines:

- Cleaning:** Wipe down the frame and components with a damp cloth after each use to remove sweat and dust. Avoid abrasive cleaners.
- Inspection:** Periodically inspect all bolts, nuts, and connections to ensure they are tight. Check cables and pulleys for any signs of wear, fraying, or damage.
- Lubrication:** Apply a silicone-based lubricant to the guide rods of the cable system and any moving parts as needed to ensure smooth operation and prevent friction.
- Storage:** Store weight plates and accessories on the designated storage racks to maintain a tidy and safe workout area.

6. TROUBLESHOOTING

Here are some common issues and their potential solutions:

Issue	Possible Cause	Solution

Issue	Possible Cause	Solution
Wobbly frame	Loose bolts or uneven floor.	Ensure all assembly bolts are securely tightened. Place the unit on a level surface or use shims to stabilize.
Noisy or rough pulley system	Lack of lubrication, worn pulleys, or cable friction.	Lubricate guide rods and pulleys with silicone spray. Inspect pulleys for damage and replace if necessary. Check cable routing.
Difficulty adjusting components (e.g., J-hooks, safety arms)	Pins not fully engaged or debris in holes.	Ensure adjustment pins are fully inserted. Clear any debris from adjustment holes.

If you encounter issues not listed here or if solutions do not resolve the problem, please contact FEIERDUN customer support.
