MAINTENANCE

To maintain the appearance and longevity of your GarveeHome bed frame, follow these simple care instructions:

- **Cleaning:** Wipe surfaces with a soft, damp cloth. Avoid harsh chemicals or abrasive cleaners, as these can damage the finish.
- **Spills:** Promptly clean any spills to prevent staining, especially on the engineered wood surfaces.
- **Fasteners:** Periodically check all screws and bolts to ensure they remain tight. Re-tighten as necessary to maintain stability.
- **Weight Distribution:** Distribute weight evenly across the bed frame and within the storage drawers to prevent undue stress on components.

TROUBLESHOOTING

Common Issues and Solutions

- **Mattress Sliding:** The bed frame features an embedded design to prevent mattress sliding. If your mattress still shifts, ensure it is properly centered and that all frame components are correctly assembled and tightened.
- **Noise/Creaking:** The bed frame is designed to be noise-free. If you experience creaking, check all bolts and screws for tightness. Loose connections are a common cause of noise. Ensure the bed frame is on a level surface.
- **Drawers Not Sliding Smoothly:** Check that the drawer wheels are clean and free of debris. Ensure the drawers are correctly aligned within their tracks and that no items are obstructing their movement. Verify that the fixing holes are not causing any obstruction if the drawers are not intended to be fixed.
- **Charging Station Not Working:** Ensure the bed frame's power cord is securely plugged into a functional wall outlet. Check for any visible damage to the charging station ports or cables.
