GYSYSQSH TCL K32 5G (T513W) / K33 5G (T513V)

GYSYSQSH Dual Layer Phone Case with Screen Protector for TCL K32 5G (T513W) / K33 5G (T513V)

Instruction Manual

1. PRODUCT OVERVIEW

This manual provides instructions for the GYSYSQSH dual-layer phone case and tempered glass screen protector designed for the Boost Mobile TCL K32 5G (model T513W) and TCL K33 5G (model T513V) smartphones. The product offers comprehensive protection against drops, impacts, and scratches, while maintaining full functionality of your device.

Package Contents:

- 1x GYSYSQSH Dual Layer Phone Case (Color: A Art Wolf)
- 1x Tempered Glass Full Screen Protector

Image 1.1: The GYSYSQSH dual-layer phone case and included tempered glass screen protector.

2. SETUP AND INSTALLATION

Proper installation ensures maximum protection for your device. This product features a 3-in-1 hybrid design consisting of a soft silicone inner layer, a hard PC outer shell, and a front frame with a built-in screen protector.

2.1 Installing the Phone Case:

1. Separate the three components of the case: the soft silicone inner layer, the hard PC outer shell, and the front frame.
2. Carefully place your TCL K32 5G or K33 5G phone into the soft silicone inner layer, ensuring all buttons and ports align correctly.
3. Snap the hard PC outer shell over the silicone layer, starting from one side and working your way around until it securely fits.
4. Finally, align the front frame with the phone's screen and snap it onto the assembled case. Ensure all edges are flush.

Three layers of protection

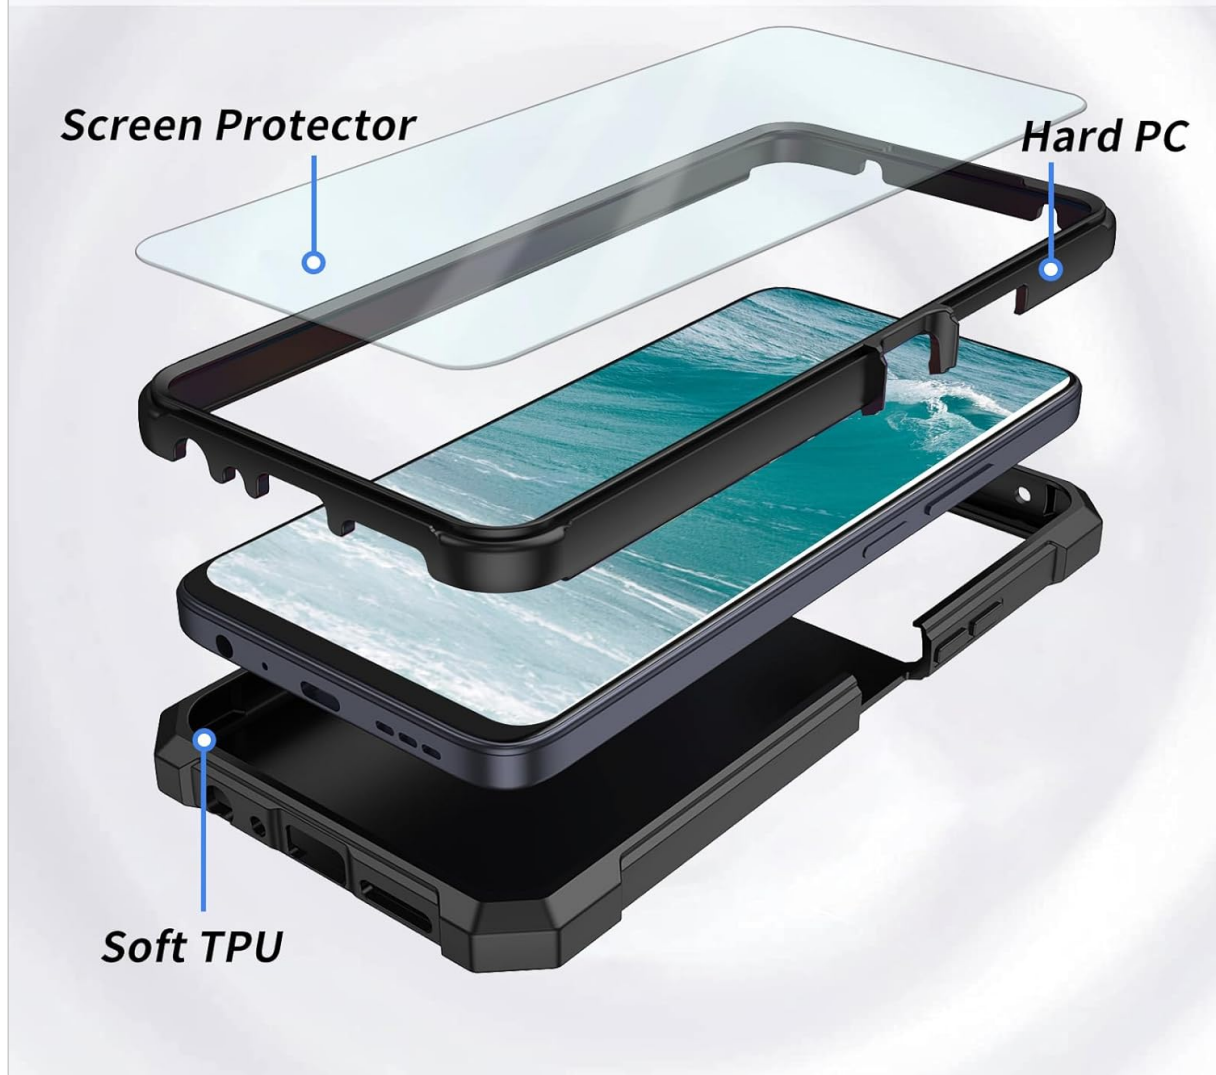

Image 2.1: Exploded view illustrating the three protective layers: screen protector (integrated into front frame), hard PC shell, and soft TPU inner layer.

2.2 Applying the Tempered Glass Screen Protector:

The included tempered glass screen protector provides an additional layer of scratch resistance. It is recommended to apply this before installing the phone into the case for optimal alignment.

1. Clean your phone screen thoroughly using the provided cleaning wipes (if included) or a microfiber cloth to remove dust, smudges, and fingerprints.
2. Carefully peel off the protective film from the adhesive side of the tempered glass.
3. Align the screen protector with your phone's screen, ensuring the cutouts for the camera and sensors match.
4. Gently lower the screen protector onto the screen. It will adhere automatically.
5. Use a clean cloth to gently press out any air bubbles towards the edges of the screen.

3. OPERATING AND USAGE

Once installed, your phone case and screen protector are ready for daily use. The design ensures full access to all ports, buttons, and camera functions.

3.1 General Use:

- The case provides enhanced grip and protection against accidental drops and impacts.

- The raised edges around the screen and camera offer additional protection when the phone is placed on flat surfaces.

TRENDSETTER

Has a well-polished finish that showcases an elegant look without the added bulk.

Image 3.1: The case features shock-resistant technology and drop resistance for enhanced phone protection.

3.2 Wireless Charging:

The case is designed to be compatible with wireless charging. You do not need to remove the case to charge your phone wirelessly.

Image 3.2: The phone case supports wireless charging without removal.

4. MAINTENANCE

To keep your phone case and screen protector in optimal condition, follow these simple maintenance guidelines:

- **Cleaning the Case:** Use a soft, damp cloth with mild soap and water to clean the exterior of the case. Avoid harsh chemicals or abrasive materials, as these may damage the finish.
- **Cleaning the Screen Protector:** Use a microfiber cloth to gently wipe the screen protector. For stubborn smudges, a screen cleaner spray designed for electronics can be used.
- **Regular Inspection:** Periodically remove the case and inspect your phone and the case for any trapped dust or debris that could cause scratches. Clean as necessary.

5. TROUBLESHOOTING

If you encounter any issues with your phone case or screen protector, refer to the following common solutions:

- **Screen Protector Bubbles:** If air bubbles appear after installation, gently lift the nearest edge of the screen protector and reapply, pushing the air out with a clean cloth. Small bubbles often disappear within 24-48 hours.
- **Case Not Fitting Properly:** Ensure your phone model is compatible with the case (TCL K32 5G T513W / K33 5G T513V). Verify that all three components of the case are correctly aligned and snapped together.
- **Reduced Touch Sensitivity:** If you experience reduced touch sensitivity with the screen protector, ensure it is

clean and free of debris. Sometimes, adjusting touch sensitivity settings in your phone's display options can help.

6. SPECIFICATIONS

Feature	Detail
Compatible Models	Boost Mobile TCL K32 5G (T513W), TCL K33 5G (T513V)
Material	Soft Silicone (TPU) + Hard PC
Protection Type	Dual Layer, Shockproof, Drop Protection, Built-in Screen Protector
