7. TROUBLESHOOTING

If you encounter issues with your TABWEE K10 tablet, refer to the following common problems and solutions:

- **Tablet Not Turning On:** Ensure the tablet is sufficiently charged. Connect it to the power adapter and wait a few minutes before attempting to power it on again. If unresponsive, press and hold the power button for 10-15 seconds for a forced restart.
- **Wi-Fi Connection Issues:** Verify that your Wi-Fi router is functioning correctly. Restart the tablet and attempt to reconnect. Check if the Wi-Fi password entered is correct.
- **Slow Performance:** Close unused applications running in the background. Clear cache for frequently used apps via **Settings > Apps > [App Name] > Storage & cache > Clear cache**. Consider uninstalling unnecessary applications to free up storage space. The tablet features 12GB RAM for smooth operation,

but excessive background processes can impact performance.

- **Screen Unresponsive:** Perform a forced restart by holding the power button. If the issue persists, ensure the screen is clean and free of debris. If using the stylus, ensure it is functioning correctly and the screen is not damaged.
- **Apps Crashing:** Ensure your apps are updated to their latest versions. Clear the app's cache and data (this will reset the app). If the problem continues, uninstall and reinstall the app.
