VEEKTOMX VT105

VEEKTOMX 10000mAh Portable Charger (Model VT105) User Manual

Your comprehensive guide to operating and maintaining your VEEKTOMX portable charger.

1. INTRODUCTION

Thank you for choosing the VEEKTOMX 10000mAh Portable Charger. This device is designed to provide convenient and efficient power for your mobile devices, featuring built-in charging cables and an integrated AC wall plug for easy recharging. Please read this manual carefully to ensure proper use and optimal performance of your power bank.

2. PRODUCT OVERVIEW

The VEEKTOMX 10000mAh Portable Charger (Model VT105) is a versatile power solution equipped with multiple charging options and a compact design.

Key Features:

- **Integrated AC Wall Plug:** Allows direct recharging from any standard wall outlet.
- **Built-in Charging Cables:** Includes cables compatible with iPhone (Lightning) and USB-C/Micro USB devices.
- **Multiple Output Ports:** Features additional USB-A and USB-C output ports for broader compatibility.
- **10000mAh Capacity:** Provides substantial power for multiple device charges.
- **LED Digital Display:** Shows the remaining battery percentage.
- **Compact and Portable:** Slim design for easy carrying during travel.

Components:

All in One Power Bank

Image 2.1: The VEEKTOMX portable charger displaying its various components, including the built-in Lightning cable, built-in USB-C/Micro USB cable, foldable AC plug, USB output port, and USB-C output & input port.

- Foldable AC Plug
- Built-in Lightning Cable (for iPhone)
- Built-in USB-C / Micro USB Cable
- USB Output Port
- USB-C Output & Input Port
- LED Digital Display

3. SETUP

Initial Charging of the Power Bank:

Before first use, fully charge your VEEKTOMX portable charger. There are two methods to recharge the power bank:

1. **Via AC Wall Plug:** Extend the foldable AC plug and insert the power bank directly into a standard wall outlet. The LED display will show charging progress. This method takes approximately 6.0 hours for a full charge.
2. **Via USB-C Input Port:** Connect a USB-C cable from a power adapter (not included) to the USB-C input port on the power bank. This method takes approximately 3.5 hours for a full charge.

The LED display will show '100' when fully charged.

Image 3.1: Illustration of the two methods to recharge the power bank: directly via the integrated AC wall plug or through the USB-C input port using an external adapter.

4. OPERATING INSTRUCTIONS

Charging Your Devices:

The VEEKTOMX portable charger can charge up to four devices simultaneously.

1. Using Built-in Cables:

- For iPhone: Connect the built-in Lightning cable to your iPhone or other compatible Apple devices.
- For USB-C/Micro USB Devices: Connect the built-in USB-C/Micro USB cable to your Android phone, tablet, or other compatible devices.

2. Using External Cables (USB-A and USB-C Ports):

- Connect your device's charging cable to the USB-A output port or the USB-C output port on the power bank.

Once connected, the power bank will automatically begin charging your device(s). The LED display will show the remaining battery percentage of the power bank.

Charging 4 Devices Simultaneously

Image 4.1: The VEEKTOMX portable charger actively charging four different devices (two smartphones, a tablet, and another device) using its various output options.

Pass-Through Charging:

The power bank supports pass-through charging, meaning you can recharge the power bank while it is simultaneously charging your devices. When the power bank is plugged into a wall outlet, it will prioritize charging connected devices first, then recharge itself.

Built in AC wall plug & charging cable

Passing-through Charging

Image 4.2: The VEEKTOMX portable charger plugged into a wall outlet, demonstrating pass-through charging by simultaneously recharging itself and a connected smartphone.

5. MAINTENANCE

To ensure the longevity and optimal performance of your VEEKTOMX portable charger, follow these maintenance guidelines:

- **Storage:** Store the power bank in a cool, dry place away from direct sunlight, extreme temperatures, and humidity.
- **Cleaning:** Use a soft, dry cloth to clean the exterior of the power bank. Avoid using harsh chemicals or abrasive materials.
- **Battery Health:** For optimal battery life, fully charge the power bank at least once every three months

if not in regular use. Avoid completely draining the battery frequently.

- **Handling:** Do not drop, disassemble, or attempt to repair the power bank yourself. This can damage the device and void the warranty.

6. TROUBLESHOOTING

If you encounter issues with your VEEKTOMX portable charger, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Power bank not charging	AC plug not fully inserted; faulty wall outlet; damaged USB-C input cable/adaptor.	Ensure AC plug is firmly in the outlet. Try a different outlet. Use a different USB-C cable and adaptor.
Device not charging from power bank	Power bank battery depleted; loose cable connection; incompatible device; device case obstructing connection.	Recharge the power bank. Ensure cables are securely connected. Check device compatibility. Remove bulky phone cases if connections are obstructed.
Slow charging	Using non-fast charging cables/adapters; multiple devices charging simultaneously.	Use original or certified fast-charging cables. Disconnect other devices to prioritize charging speed for one device.
LED display not working	Power bank is off; internal fault.	Ensure power bank is on (if applicable, some models activate on connection). If issue persists, contact customer support.

If the problem persists after trying these solutions, please contact VEEKTOMX customer support for further assistance.

7. SPECIFICATIONS

Model Number	VT105
Battery Capacity	10000 Milliamp Hours
Product Dimensions	6.02 x 2.78 x 0.69 inches
Item Weight	8 ounces
Connector Type	For iPhone (Lightning), USB-C, Micro USB, USB-A
Special Feature	Built-in AC Wall Plug and Cables
Manufacturer	VEEKTOMX

8. WARRANTY AND SUPPORT
