Unroll or place the wooden slats across the frame. The slats are designed to prevent mattress sagging and eliminate the need for a box spring. Ensure they are evenly spaced and secured if applicable (some slats may have Velcro for attachment).

MAINTENANCE

- **Cleaning:** For the faux leather upholstery, wipe with a soft, damp cloth. Avoid harsh chemicals or abrasive cleaners.
- **Fastener Check:** Periodically (every 3-6 months) check all bolts and screws and re-tighten them as needed to maintain structural integrity and prevent squeaking.
- **Slats:** Ensure wooden slats remain properly positioned and free from damage. Replace any broken slats immediately.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Bed frame is wobbly or unstable.	Loose fasteners.	Check and tighten all bolts and screws. Ensure all connections are fully engaged.
Squeaking noises.	Loose connections or friction between parts.	Re-tighten all hardware. Apply a small amount of lubricant (e.g., silicone spray) to contact points if necessary. Ensure slats are properly seated.
Mattress sagging.	Improperly spaced or damaged slats; mattress too heavy.	Verify slats are evenly spaced and intact. Replace any broken slats. Ensure mattress weight does not exceed the frame's capacity.
