OPERATING INSTRUCTIONS

Hydraulic Lift Storage

The Feonase bed frame features a hydraulic lift system for easy access to under-bed storage.

- To open the storage compartment, grasp the hand lifting strap located at the foot of the bed.
- Gently lift the mattress platform upwards. The hydraulic mechanism will assist in lifting and holding the platform in the open position.
- To close, firmly push the mattress platform downwards until it fully lowers and latches into place. Ensure no items are obstructing the closing mechanism.
- The storage compartment provides approximately 10.8 inches of height for storing items such as bedding, clothes, or boxes.

- **Frame:** Wipe wooden and metal parts with a damp cloth. Avoid harsh chemicals or abrasive cleaners.
- **Hydraulic Mechanism:** Periodically check the hydraulic arms for smooth operation. Do not apply lubricants unless specifically instructed by the manufacturer.
- **Hardware:** Periodically check all bolts and screws to ensure they remain tight. Retighten as necessary to maintain stability and prevent noise.
- **Charging Station:** Keep the charging ports clean and free of dust. Do not expose the charging station to liquids.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Bed frame is wobbly or noisy.	Loose hardware; uneven floor; slats not properly secured.	Check and tighten all bolts and screws. Ensure the bed is on a level surface. Verify all slats are correctly seated and buckled.
Hydraulic lift is difficult to open/close.	Mechanism not fully broken in; obstruction; incorrect assembly.	Apply firm, even pressure when opening/closing. Ensure no items are blocking the mechanism. Review assembly instructions for correct hydraulic arm installation. Note that new hydraulics may require a few cycles to operate smoothly.
Charging station not working.	Power cord unplugged; wall outlet not functioning; device incompatibility.	Ensure the bed frame's power cord is securely plugged into a live wall outlet. Test the wall outlet with another device. Try a different device to confirm compatibility.
Squeaking noise from slats.	Slats rubbing against frame; missing EVA mute foam.	Ensure slats are properly seated and the EVA mute foam strips are in place between the slats and the frame.
