- **Humidity Setting:** Adjust desired humidity level.

- **Timer:** Set operation duration (0-24 hours).
- **Speed:** Select fan speed (Low/High).
- **Power:** Turn the unit on or off.
- **Display:** Shows current humidity or timer settings.
- **Tank Full Indicator:** A red light illuminates when the water tank is full.

4. SETUP

4.1 Unpacking

1. Carefully remove the dehumidifier from its packaging.
2. Remove all packing materials, tapes, and protective films.
3. Inspect the unit for any damage. If damaged, do not operate and contact customer support.

4.2 Placement

Place the dehumidifier on a flat, stable surface in the desired location. Ensure there is at least 20 cm (8 inches) of space around the air inlets and outlets for optimal airflow.

This image demonstrates the versatility of the dehumidifier, showing its suitability for use in basements, bedrooms, bathrooms, and wardrobes to control humidity.

4.3 Power Connection

Plug the power cord into a suitable 127V grounded electrical outlet.

5. OPERATING INSTRUCTIONS

5.1 Basic Operation

1. Press the **Power** button to turn the dehumidifier on. The unit will start operating in its default mode.
2. Press the **Power** button again to turn the unit off.

5.2 Humidity Setting

Press the **Humidity Setting** button to adjust the desired humidity level. The digital display will show the target humidity. The unit will operate until the ambient humidity reaches the set level, then it will cycle on and off to maintain it.

5.3 Fan Speed

Press the **Speed** button to toggle between Low and High fan speeds. Higher fan speed results in faster dehumidification.

5.4 Timer Function

Press the **Timer** button to set the desired operating duration (0-24 hours). The unit will automatically turn off after the set time has elapsed.

5.5 Drainage Options

The dehumidifier offers two drainage methods: manual tank emptying or continuous drainage.

5.5.1 Manual Drainage

When the water tank is full, the unit will automatically shut off, and the Tank Full Indicator light will illuminate. Follow these steps to empty the tank:

1. Gently pull out the water tank from the front of the unit.
2. Carefully carry the tank to a sink or drain.
3. Empty the collected water.

- Slide the empty water tank back into the dehumidifier until it clicks into place. The unit will resume operation.

This sequence of images details the process of handling the water tank: 1. When the tank is full, a red light indicates it. 2. The dehumidifier automatically shuts off; remove the tank. 3. Empty the collected water. 4. Reinsert the water tank into the dehumidifier.

5.5.2 Continuous Drainage

For continuous operation without needing to empty the tank, connect a drainage hose (not included) to the continuous drainage port at the back of the unit. Ensure the hose is sloped downwards to allow water to drain by gravity into a suitable receptacle or floor drain.

5.6 Automatic Defrost

The dehumidifier is equipped with an automatic defrost function. If frost builds up on the evaporator coils, the unit will automatically enter defrost mode to melt the ice. During this time, the dehumidification function will pause, and the fan may continue to run. This is normal operation.

6. MAINTENANCE

Regular maintenance ensures optimal performance and extends the lifespan of your dehumidifier.

6.1 Cleaning the Water Tank

Clean the water tank regularly to prevent mold and bacteria growth. Remove the tank, wash it with mild detergent and warm water, rinse thoroughly, and dry before reinserting.

6.2 Cleaning the Air Filter

The washable air filter should be cleaned every two weeks or more frequently depending on usage and air quality. A dirty filter reduces efficiency and airflow.

- Turn off and unplug the dehumidifier.
- Remove the air filter from its slot (refer to product diagram for location).

- 3. Wash the filter with warm, soapy water.
- 4. Rinse thoroughly and allow it to air dry completely before reinstalling.

6.3 Storage

If storing the dehumidifier for an extended period, ensure the water tank is empty and clean, and the unit is dry. Store it upright in a cool, dry place, covered to protect it from dust.

7. TROUBLESHOOTING

Before contacting customer support, try the following solutions for common issues:

Problem	Possible Cause	Solution
Dehumidifier does not turn on.	No power; power cord loose; water tank full or not properly inserted.	Check power connection; ensure tank is empty and correctly seated.
No water collected.	Ambient humidity too low; temperature too low; air filter clogged; unit in defrost mode.	Check humidity setting; clean air filter; allow defrost cycle to complete.
Unit is noisy.	Unit not on a level surface; air filter clogged; fan obstruction.	Place on a level surface; clean air filter; check for obstructions.
Water leaks from the unit.	Water tank not properly inserted; continuous drain hose loose or clogged.	Reinsert water tank correctly; check continuous drain hose connection and ensure it's not blocked.
