MSXTTLY U2AC-L9

MSXTTLY U2AC-L9 Wireless Android Auto Adapter User Manual

Model: U2AC-L9

INTRODUCTION

Thank you for choosing the MSXTTLY U2AC-L9 Wireless Android Auto Adapter. This device converts your car's wired Android Auto system into a wireless connection, offering enhanced convenience and a seamless driving experience. This manual provides detailed instructions for setup, operation, and troubleshooting to ensure optimal performance.

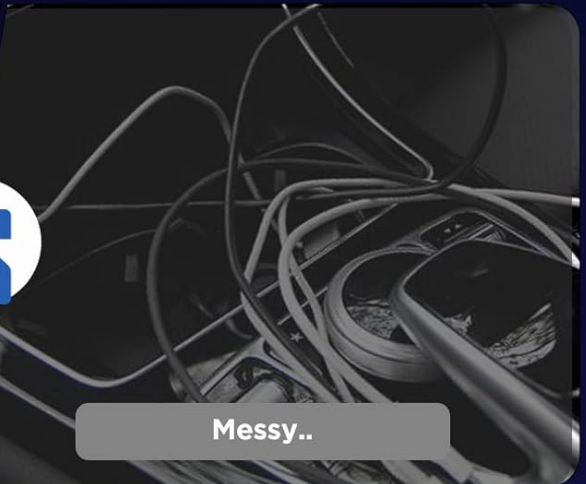

PRODUCT OVERVIEW AND PACKAGE CONTENTS

The MSXTTLY U2AC-L9 is a compact and robust adapter designed to provide a stable and fast wireless Android Auto connection. Its small size ensures a neat and tidy installation in your vehicle.

Compact. Uncompromising

SETUP INSTRUCTIONS

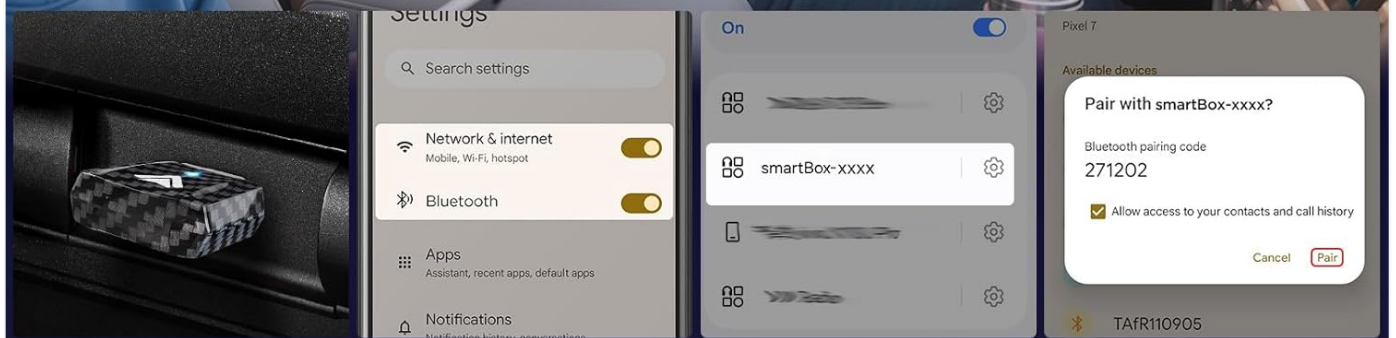

Follow these simple steps to set up your MSXTTLY U2AC-L9 adapter:

1. **Insert the Adapter:** Plug the U2AC-L9 adapter into your car's USB port that supports wired Android Auto. Use the provided USB A-C cable if your car has a USB-C port.
2. **Activate Bluetooth & Wi-Fi:** On your Android smartphone, ensure both Bluetooth and Wi-Fi are turned on.
3. **Pair with Adapter:** On your phone's Bluetooth settings, locate and select the device named "SmartBox-xxxx" (the xxxx will be a unique identifier).
4. **Confirm Connection:** A pairing notification will appear on your phone. Confirm the pairing to establish the connection.
5. **Launch Android Auto:** Once paired, Android Auto Wireless should automatically launch on your car's display.

Important: Do not use a VPN on your phone when setting up or using the adapter.

Plug & Play

- 1 Plug the adapter**
*Please do not open VPN when using adapter
- 2 Turn on Bluetooth & WiFi**
- 3 In the Bluetooth list, find "SmartBox-xxxx" and click to connect**
- 4 Click "Pair" on the Phone pop-up notification**

OPERATING INSTRUCTIONS

General Operation

After successful setup, the adapter will automatically connect to your phone when you start your car, provided Bluetooth and Wi-Fi are enabled on your device. Android Auto will then appear wirelessly on your car's infotainment screen, allowing access to navigation, music, calls, and other compatible apps.

Fast & Stable Connection

Using Video Streaming Apps (CarStream & YouTube)

The U2AC-L9 adapter supports video streaming apps like YouTube via CarStream. To use this feature:

Mini Streaming & Android Auto Wireless Adapter

Wireless Android Auto

Support YouTube App

Image: A car's infotainment screen displaying both the standard wireless Android Auto interface and the YouTube app, demonstrating the adapter's streaming capabilities.

1. **Download AAAD and Install CarStream:** On your Android phone, download the AAAD (Android Auto Apps Downloader) application. Use AAAD to install CarStream. Ensure you allow installation from unknown sources in your phone's settings if prompted.
2. **Enable Desktop Mode in CarStream:** Open CarStream and navigate to its settings. Enable "Desktop Mode" for optimal viewing.
3. **Connect and Enjoy:** Connect to Android Auto wirelessly using the adapter. Open CarStream from your Android Auto interface to watch YouTube and other video content.

COMPATIBILITY

- **Compatible Phones:** Only Android smartphones running Android 11.0 or higher are supported.
- **Compatible Vehicles:** Only vehicles equipped with a factory-installed wired Android Auto system are supported.
- **Not Supported:**
 - CarPlay systems
 - iOS devices (iPhones)
 - Vehicles with integrated wireless Android Auto or wireless CarPlay
 - Zlink/Screen Mirroring applications

What Devices are Compatible?

Compatible Devices

Phone:

Only Phones **Running Android 11.0 and Above** are Supported

Vehicles:

Only Vehicles Equipped with a **Wired Android Auto System** are Supported

Not Supported

Not Compatible with CarPlay Systems

Not Compatible with iPhones

Not Compatible with Zlink/Screen Mirroring

MAINTENANCE

Heat Dissipation

The U2AC-L9 adapter is designed with heat dissipation features. For optimal cooling, especially during extended use or in warm environments, you may use an extension cord (not included) to position the adapter near an air conditioning outlet in your vehicle. This helps maintain stable performance and prolong the device's lifespan.

Heat Dissipation Upgrade

For optimal cooling, you can also use an extension cord and place the adapter near an air conditioner outlet

TROUBLESHOOTING

- **Connection Issues:**

- Ensure your car's wired Android Auto functions correctly without the adapter.
- Verify that Bluetooth and Wi-Fi are enabled on your phone.
- Check that the adapter is securely plugged into the correct USB port.
- Restart your phone and your car's infotainment system.
- Forget the "SmartBox-xxxx" Bluetooth device on your phone and re-pair.

- **No Android Auto Display:**

- Confirm your phone is running Android 11.0 or higher.
- Ensure your vehicle supports wired Android Auto.

- Check for any pending software updates for your car's infotainment system or your phone.

- **Video App (CarStream/YouTube) Problems:**

- Ensure AAAD and CarStream are correctly installed and updated on your phone.
- Verify that "Desktop Mode" is enabled in CarStream settings.
- Check your phone's internet connection for streaming.

- **Overheating:**

- If the adapter feels excessively hot, unplug it and allow it to cool.
- Consider using an extension cable to position the adapter in a cooler location, such as near an air vent.
