KFPLAN KF29

KFPLAN KF29 1:28 RC Car with WiFi Camera User Manual

Model: KF29 | Brand: KFPLAN

INTRODUCTION

This manual provides essential instructions for the safe operation, setup, and maintenance of your KFPLAN KF29 1:28 RC Car with WiFi Camera. This high-speed off-road vehicle features an integrated camera for real-time photo and video recording via a dedicated app, offering a first-person view driving experience. Its robust design and 2.4GHz remote control system ensure precise handling across various terrains, suitable for both indoor and outdoor use.

SAFETY INFORMATION

Please read all safety warnings and instructions before operating the KFPLAN KF29 RC Car. Failure to follow these instructions may result in injury or damage to the product. Keep this manual for future reference.

- This product is recommended for users aged 12 years and above.
- Operate the RC car in open areas, away from people, pets, and obstacles.
- Do not operate near water sources unless the product is specifically designed for aquatic use (this model is an off-road car).
- Ensure batteries are charged correctly and handled safely. Do not overcharge or short-circuit batteries.
- Always turn off the RC car and remote control when not in use.
- Keep small parts out of reach of children to prevent choking hazards.

PACKAGE CONTENTS

Image: KFPLAN KF29 RC Car, remote control, two batteries, and a USB charging cable.

Verify that all items are present in the package:

- KFPLAN KF29 1:28 RC Car (Blue)
- 2.4GHz Remote Control
- Rechargeable Batteries (x2)
- USB Charging Cable
- User Manual (this document)

SETUP

1. Charge the Car Batteries:

Connect the provided USB charging cable to the car's battery and a suitable USB power adapter (not included). The charging indicator will show the charging status. Ensure batteries are fully charged before first use. Charging typically takes about 1 hour for approximately 20 minutes of operation.

2. Install Remote Control Batteries:

Open the battery compartment on the remote control and insert 3 AAA batteries (not included), ensuring correct polarity.

3. Install Car Battery:

Open the battery compartment on the RC car and securely connect a charged battery. Close the compartment.

4. Download and Install the App (for FPV function):

Scan the QR code in the manual (or on the packaging) to download the dedicated control app for your smartphone. Install the app.

リモコン各部の機能紹介

left/right turn control, light on/off button, and power switch.

1. Power On:

Turn on the RC car's power switch. Then, turn on the remote control's power switch. The remote control and car will automatically pair.

2. Driving Controls:

- **Forward/Backward:** Use the left joystick/trigger for forward and backward movement.
- **Left/Right Turn:** Use the right joystick/wheel for steering left and right.
- **Speed Switch:** Use the speed switch button (labeled on diagram) to toggle between high and low-speed modes.

3. Lights:

Press the light on/off button to control the car's headlights.

App Control (First-Person View)

スマートフォンでリモート操作

Image: A user operating the KFPLAN KF29 RC Car using a smartphone app, showing the live camera feed and virtual controls.

1. Connect to Car's WiFi:

Turn on the RC car. On your smartphone, go to WiFi settings and connect to the car's WiFi network (usually named "WiFi-UFO-*****" or similar, as noted in a review). The password should be in the manual or on the car/packaging.

2. Launch App:

Open the installed control app. You should see a live feed from the car's camera.

3. Camera Functions:

- **Photo:** Tap the camera icon in the app to take a photo.
- **Video:** Tap the video icon to start/stop recording.
- **Camera Operation Button (on remote):** Long press to start/stop recording, short press to take a photo.

4. Driving via App:

Use the virtual joysticks or motion controls within the app to drive the car while viewing the first-person perspective.

MAINTENANCE

- Clean the car regularly with a soft, dry cloth. Avoid using water or harsh chemicals.
- Inspect the wheels and chassis for any debris or damage after each use.
- Store the RC car and remote control in a cool, dry place away from direct sunlight.
- Remove batteries from the remote control if not used for extended periods.

TROUBLESHOOTING

Problem	Solution
Car does not respond to remote.	<ul style="list-style-type: none">◦ Ensure both car and remote are powered on.◦ Check if batteries in both the car and remote are fully charged and correctly installed.◦ Re-pair the remote control with the car by turning both off and then on again.
Camera feed not appearing in app.	<ul style="list-style-type: none">◦ Verify that the car's WiFi is active and your smartphone is connected to it.◦ Ensure the app has necessary permissions (e.g., camera, storage).◦ Restart the app and the car.◦ Check the WiFi signal strength; FPV range might be limited (e.g., around 3m as noted in a review).
Short operating time.	<ul style="list-style-type: none">◦ Ensure batteries are fully charged.◦ Consider purchasing additional batteries for extended play.
