Aeitto Cold Press Juicer

Aeitto Classic Horizontal Cold Press Juicer User Manual

1. INTRODUCTION

Thank you for choosing the Aeitto Classic Horizontal Cold Press Juicer. This appliance is designed to efficiently extract juice from various fruits and vegetables, preserving nutrients through its slow masticating technology. Please read this manual thoroughly before operation to ensure safe and effective use.

2. SAFETY PRECAUTIONS

Always follow basic safety precautions when using electrical appliances to reduce the risk of fire, electric shock, and injury.

- Read all instructions before use.
- Do not immerse the motor base in water or other liquids.
- Keep hands and utensils out of the feed chute during operation to prevent injury.
- Ensure the appliance is properly assembled before plugging it in.
- Unplug from the outlet when not in use, before assembling or disassembling parts, and before cleaning.
- Do not operate any appliance with a damaged cord or plug, or after the appliance malfunctions or has been damaged in any manner.

3. PRODUCT COMPONENTS

Familiarize yourself with the parts of your Aeitto Juicer:

- **Motor Base:** Contains the motor and control dial.
- **Feed Chute:** Where fruits and vegetables are inserted.
- **Auger:** The spiral component that crushes produce.
- **Filter Basket:** Separates juice from pulp.
- **Juice Outlet:** Where extracted juice flows out.
- **Pulp Outlet:** Where dry pulp is expelled.
- **Juice Cup:** Collects the fresh juice.
- **Pulp Cup:** Collects the discarded pulp.
- **Pusher:** Used to guide produce down the feed chute.
- **Cleaning Brush:** For easy cleaning of the filter.

Humanity Design

Easy to assemble, use and clean,
make your life easier.

4. SETUP AND ASSEMBLY

Follow these steps to assemble your juicer:

1. Place the motor base on a stable, flat surface.
2. Insert the juicing chamber onto the motor base, aligning the arrows and twisting until it locks into place.
3. Insert the auger into the juicing chamber.
4. Place the filter basket over the auger.
5. Attach the feed chute assembly, ensuring it clicks securely.
6. Position the juice cup under the juice outlet and the pulp cup under the pulp outlet.

5. OPERATING INSTRUCTIONS

5.1 Ingredient Preparation

- Wash all fruits and vegetables thoroughly.
- Cut ingredients into pieces small enough to fit into the feed chute. Remove large seeds, hard pits, and thick peels.

5.2 Juicing Process

The juicer features three modes: Soft, Hard, and Reverse.

- **Soft Mode (85-100 RPM):** Ideal for softer fruits and vegetables like oranges, watermelon, grapes, and berries.
- **Hard Mode (95-110 RPM):** Suitable for harder produce such as apples, pears, carrots, beets, celery, ginger, and kale.
- **Reverse Function (Rev):** Use this mode to clear any clogs if ingredients get stuck during juicing.

To begin juicing:

1. Ensure the juicer is plugged in and the control dial is set to '0' (off) before selecting a mode.
2. Turn the control dial to either 'Soft' or 'Hard' mode based on your ingredients.
3. Slowly feed prepared ingredients into the feed chute. Use the pusher only if necessary to gently guide ingredients.
4. Allow the juicer to process the ingredients completely. Juice will flow into the juice cup, and pulp into the pulp cup.
5. After juicing, turn the dial to '0' and unplug the appliance.

Higher Juice Yield & Drier Pulp

Upgraded filter extracts purest juice

2 Masticating Speeds

Suitable for different fruits and vegetables

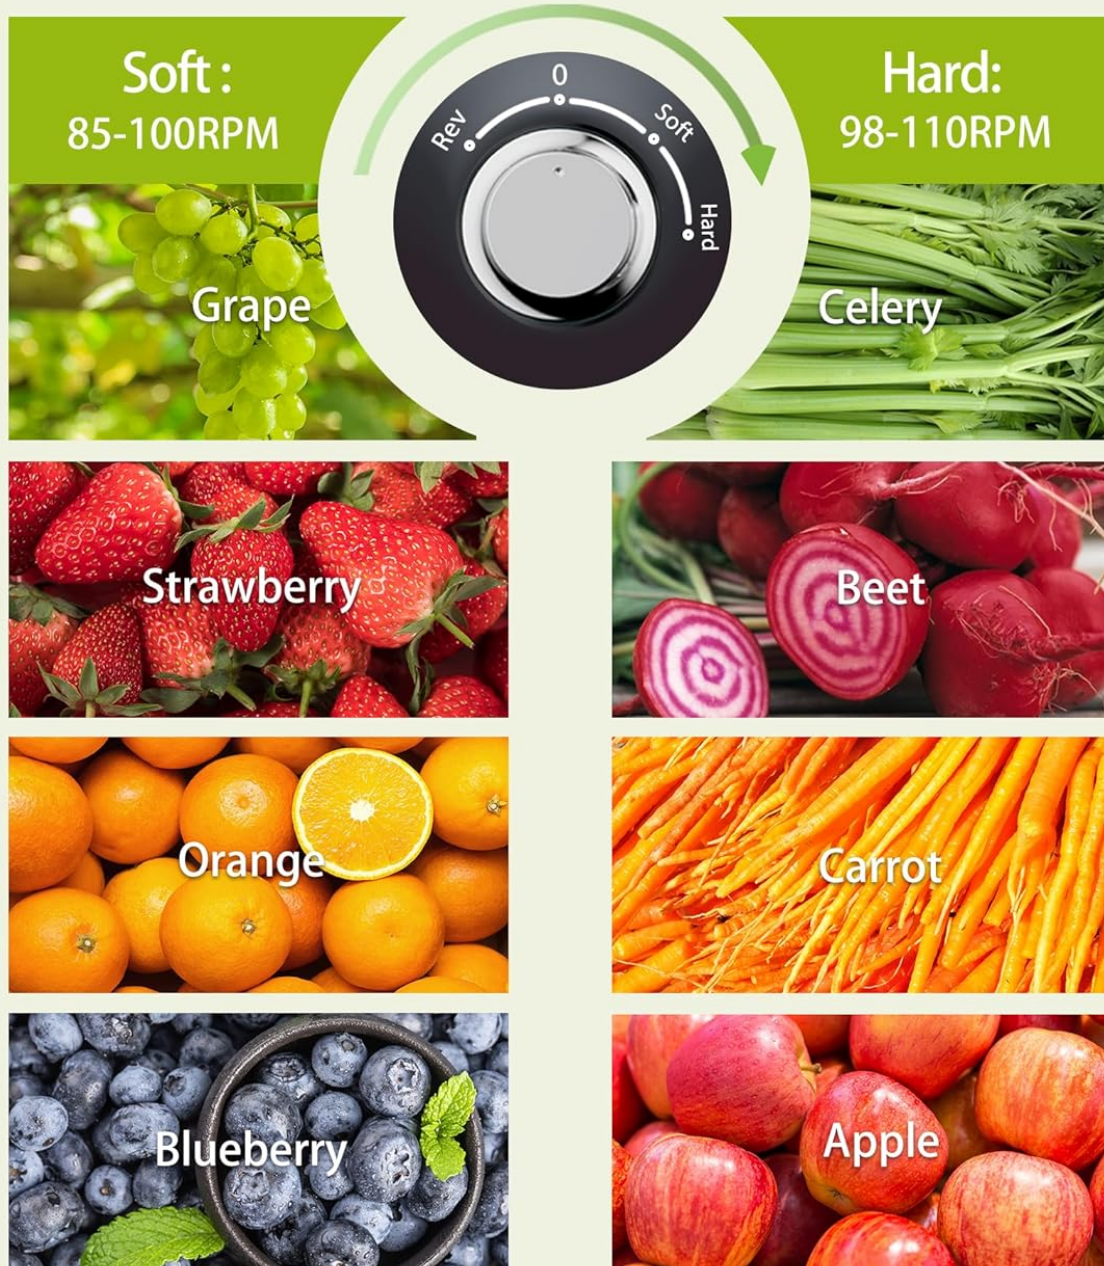

Image 4: A visual guide to the two masticating speeds (Soft and Hard) and examples of fruits and vegetables suitable for each mode.

6. CLEANING AND MAINTENANCE

Regular cleaning ensures the longevity and hygiene of your juicer.

6.1 Disassembly for Cleaning

To disassemble, press the release button and twist the juicing chamber counter-clockwise to detach it

from the motor base. Then, remove the feed chute, filter basket, and auger.

6.2 Cleaning Instructions

- All detachable parts are dishwasher safe.
- For manual cleaning, rinse all detachable parts under running water immediately after use.
- Use the provided cleaning brush to remove any pulp residue from the filter basket.
- Wipe the motor base with a damp cloth. Never immerse the motor base in water.
- Ensure all parts are completely dry before reassembling or storing.

7. TROUBLESHOOTING

Problem	Possible Cause	Solution
Juicer does not turn on.	Not plugged in; improperly assembled.	Ensure power cord is securely plugged in. Check that all parts are correctly assembled and locked.
Motor stops during operation.	Overload; ingredients stuck.	Turn the dial to 'Rev' (Reverse) for a few seconds to clear the blockage, then switch back to 'Soft' or 'Hard'. If overloaded, the juicer may automatically stop for 20 minutes to cool down.
Low juice yield or wet pulp.	Incorrect mode for ingredients; feeding too quickly.	Ensure you are using the appropriate mode (Soft/Hard) for the produce. Feed ingredients slowly and evenly.
Loud noise during operation.	Improper assembly; hard ingredients.	Check assembly. Ensure ingredients are cut to appropriate size. The motor operates at less than 60 decibels, which is considered quiet for a juicer.

8. SPECIFICATIONS

- **Brand:** Aeitto
- **Model Name:** Cold Press Juicer (HSJ-1518)
- **Color:** Premium Black
- **Product Dimensions:** 11.61"D x 10.06"W x 7.68"H
- **Capacity:** 600 Milliliters (Juice Cup)
- **Power Source:** Corded Electric
- **Voltage:** 120 Volts
- **Motor Noise Level:** < 60 Decibels
- **Special Features:** Dishwasher Safe parts, Juice & Pulp Separation, One-button Disassembly, Quiet Motor, Triple Modes (Soft, Hard, Reverse)
