6. Troubleshooting

If you encounter issues with your Marsail Loveseat, refer to the following common solutions:

- **Assembly Difficulties:** If parts do not align or holes seem missing, re-check the assembly diagram and ensure you have the correct parts for each step. Sometimes, slight adjustments or re-orientation of parts can resolve alignment issues. If problems persist, contact customer support with details and photos.
- **Unstable or Wobbly Loveseat:** Ensure all bolts and fasteners are fully tightened. Check that the legs are securely attached and evenly placed on the floor. Adjust leg levelers if present.
- **Cushions Feel Too Firm/Soft:** New cushions may require a break-in period to reach their intended comfort level. This can take several days or weeks of regular use. If cushions remain unsatisfactory after a reasonable period, consider adding additional throw pillows for support or contacting customer service.
- **Squeaking Noises:** Squeaking often indicates loose connections. Re-tighten all assembly hardware. If the noise continues, inspect the frame for any rubbing points.
