This building block set contains micro-sized pieces that are not suitable for children under 3 years of age. Adult supervision is recommended for users under 14 years old due to the small size and intricate nature of the blocks. Keep all small parts away from young children and pets to prevent accidental ingestion.

4. SETUP AND ASSEMBLY INSTRUCTIONS

Assembly of this micro block set requires patience and attention to detail. The blocks are significantly smaller than standard building blocks, measuring approximately 8mm compared to 16mm for normal blocks. The use of tweezers (not included) is highly recommended to handle the small pieces and ensure precise placement.

4.1 General Assembly Tips

- **Sort Blocks:** Before starting, sort the blocks by color and shape to streamline the building process.
- **Follow Layer-by-Layer Instructions:** The manual illustrates assembly in layers. Pay close attention to the highlighted blocks in each step, as these indicate the new pieces to be added for that layer.
- **Use Tweezers:** Due to the small size of the blocks, tweezers can greatly assist in picking up and accurately placing each piece.
- **Accuracy is Key:** Ensure each block is placed in the correct position. Errors in early layers can affect the stability and appearance of subsequent layers.

- **Visual Clarity:** Some instruction diagrams may have a light blue background, which can make it challenging to distinguish details. Zooming in or using good lighting may help.

4.2 Step-by-Step Assembly

Refer to the included instruction manual for detailed, step-by-step visual guides. Each step will show the required blocks and their placement on the base plate or previous layers. Some sections may require assembling smaller components separately before attaching them to the main structure.
