6. TROUBLESHOOTING

If you encounter issues with your bed frame, refer to the following common solutions:

Problem	Possible Cause	Solution
Bed frame is wobbly or unstable	Loose bolts or incorrect assembly.	Check all connections and tighten any loose bolts. Review assembly instructions to ensure all parts are correctly installed.
Squeaking noises	Loose connections or friction between metal parts.	Tighten all bolts. Apply a small amount of lubricant (e.g., silicone spray) to contact points if squeaking persists.
Drawers do not slide smoothly	Debris in tracks or misaligned drawers.	Clear any obstructions from the drawer tracks. Ensure drawers are properly aligned on their casters.
LED lights not working	Power connection issue or light strip malfunction.	Check if the power adapter is securely plugged into the wall and the bed frame. Ensure the LED light controller is properly connected. If issues persist, contact customer support.
Charging station not providing power	Power cord not plugged in or circuit overload.	Verify the charging station's power cord is fully plugged into a working wall outlet. Avoid plugging in too many high-power devices simultaneously.
