oneisall Small Replacement Blade for FC08 Dog Grooming Kit User Manual

Model: 9J27SCZ

INTRODUCTION

This manual provides instructions for the proper installation and maintenance of the oneisall Small Replacement Blade, model 9J27SCZ. This blade is specifically designed as a replacement part for the oneisall FC08 4-in-1 Dog Grooming Kit, ensuring continued optimal performance for your pet grooming needs.

COMPATIBILITY

The oneisall Small Replacement Blade (Model: 9J27SCZ) is exclusively compatible with the **oneisall FC08 4-in-1 Dog Grooming Kit**. Please ensure your grooming kit is the FC08 model before attempting installation.

INSTALLATION INSTRUCTIONS

Follow these steps to replace the blade on your oneisall FC08 Dog Grooming Kit:

1. **Preparation:** Ensure the grooming clipper is turned off and disconnected from any power source.
2. **Remove Old Blade:** Gently push the old blade upwards with your thumb until it detaches from the clipper body. Refer to the

"Remove" section in the image below.

3. **Install New Blade:** Align the new replacement blade with the clipper head. Press down firmly until you hear a click, indicating it is securely locked into place. Refer to the "Install" section in the image below.
4. **Test:** Turn on the clipper briefly to ensure the blade is properly attached and operating smoothly.

OPERATING THE CLIPPER (WITH NEW BLADE)

Once the new blade is securely installed, operate your oneisall FC08 Dog Grooming Kit as per its original instruction manual. The replacement blade functions identically to the original blade, providing precise and efficient grooming.

- Ensure the blade is clean and free of hair before each use.
- Apply a small amount of clipper oil to the blade before and after each grooming session to maintain sharpness and reduce friction.

MAINTENANCE AND CARE

Proper maintenance extends the life and performance of your replacement blade:

- **Cleaning:** After each use, remove the blade and use the provided cleaning brush (from your FC08 kit) to brush away any trapped hair.
- **Oiling:** Apply 1-2 drops of clipper oil to the teeth and friction points of the blade before and after each grooming session. This lubricates the blade, reduces heat, and prevents rust.
- **Storage:** Store the blade in a dry, clean place, preferably attached to the clipper or in its original packaging, to protect it from damage and moisture.
- **Inspection:** Regularly inspect the blade for any signs of wear, damage, or dullness. Replace the blade if it becomes dull or damaged to ensure safe and effective grooming.

TROUBLESHOOTING

If you encounter issues with your replacement blade, consider the following:

| Problem | Possible Cause | Solution |
|-------------------------------|---|--|
| Blade not cutting effectively | Blade is dull or clogged with hair. Insufficient oiling. | Clean the blade thoroughly. Apply clipper oil. If still dull, replace the blade. |
| Blade feels hot during use | Lack of lubrication. Prolonged use. | Apply clipper oil. Take short breaks during grooming to allow the blade to cool. |
| Blade makes unusual noise | Improper installation. Debris caught in blade. | Re-install the blade, ensuring it clicks into place. Clean the blade thoroughly. |
