VEVOR YMK60101

VEVOR 1.6 Gallon Water Distiller Instruction Manual

Model: YMK60101

Introduction

Thank you for choosing the VEVOR 1.6 Gallon Water Distiller. This manual provides essential information for the safe and efficient operation, maintenance, and care of your new appliance. Please read it thoroughly before first use and keep it for future reference.

Safety Information

Always observe basic safety precautions when using electrical appliances to reduce the risk of fire, electric shock, and personal injury.

- Ensure the appliance is placed on a stable, level surface.
- Do not immerse the main unit in water or other liquids.
- Keep out of reach of children.
- Unplug the distiller from the power outlet when not in use and before cleaning.
- Do not operate the appliance if the power cord or plug is damaged.

- The unit features overheat protection, which will automatically shut off the distiller if it becomes too hot.

Package Contents

Upon unpacking, ensure all items listed below are present and in good condition:

- 1 x VEVOR Water Distiller Unit
- 1 x Plastic Water Collection Container (1.6 Gallon / 6L capacity)
- 1 x Power Cable
- 4 x Activated Carbon Packs (1 pre-installed)
- 1 x Citric Acid Powder (for cleaning)
- 1 x Instruction Manual

Setup

1. **Unpack:** Carefully remove all components from the packaging.
2. **Placement:** Place the distiller on a dry, level, and stable surface. Ensure adequate ventilation around the unit.
3. **Connect Power:** Plug the power cable into the designated port at the back of the distiller unit, then into a suitable electrical outlet.
4. **Prepare Collection Container:** Place the plastic water collection container directly under the distiller's spout.

Operating Instructions

Follow these steps to distill water:

1. **Fill the Distiller:** Remove the top lid of the distiller. Fill the stainless steel inner tank with tap water up to the 'FULL' line indicated inside. Do not overfill.
2. **Replace Lid:** Securely place the lid back onto the distiller unit. The silicone rubber lining ensures a tight seal.
3. **Start Distillation:** Turn on the main power switch located at the back of the unit. The distillation process will begin. It typically takes about 30 minutes for the unit to start producing distilled water.
4. **Collection:** Distilled water will drip from the spout into the collection container. A full 1.6-gallon cycle takes approximately 3.5 to 4 hours.
5. **Completion:** The distiller will automatically shut off when the water level in the boiling chamber is too low or when the cycle is complete.

of pure water.

Maintenance

Regular cleaning and maintenance ensure optimal performance and longevity of your distiller.

- **Cleaning the Boiling Chamber:** After each distillation cycle, allow the unit to cool. You will notice sediment remaining in the boiling chamber. Use the provided citric acid powder to clean the interior. Follow the instructions on the citric acid packaging for proper use. Regular cleaning is recommended to prevent scale buildup.
- **Activated Carbon Filter Replacement:** The distiller comes with activated carbon packs. It is recommended to change these regularly to maintain water purity.
- **Exterior Cleaning:** Wipe the exterior of the unit with a damp cloth. Do not use abrasive cleaners.

Applications

The VEVOR Water Distiller produces pure water suitable for various uses:

- Drinking water
- Coffee brewing

- Humidifiers
- CPAP machines
- Laboratories
- Dental clinics
- Aquariums
- Skincare applications

Troubleshooting

This section addresses common issues you might encounter. For more complex problems, please contact VEVOR customer support.

- **Unit does not turn on:** Ensure the power cable is securely plugged into both the distiller and the wall outlet. Check the

on/off switch at the back of the unit. If the unit has overheated, press the reset switch on the bottom front.

- **No water is distilling:** Allow up to 30 minutes for the unit to heat up and begin the distillation process. Ensure the water level in the boiling chamber is above the minimum line.
- **Slow distillation:** Ensure the unit is clean and free of scale buildup. Regular cleaning with citric acid can improve efficiency.
- **Unusual taste/odor in distilled water:** Replace the activated carbon filter pack. Ensure the unit is thoroughly cleaned.

Warranty & Support

For warranty information, technical support, or service inquiries, please refer to the official VEVOR website or contact their customer service directly. Keep your purchase receipt and model number (YMK60101) handy for faster assistance.
