5. OPERATING INSTRUCTIONS

5.1 LED Lighting

The daybed features integrated LED lighting in the headboard. To operate, connect the power cord to a standard electrical outlet. A switch, typically located on the headboard or near the charging station, controls the light. Refer to the specific assembly manual for exact switch location and any potential light mode adjustments.

5.2 Charging Station

The built-in charging station includes 2 standard outlets and 2 USB ports. To use, ensure the daybed's power cord

is plugged into a wall outlet. You can then plug in your electronic devices for charging. Always ensure devices are compatible with the power output and avoid overloading the station.

- **Power Outlets:** For standard electrical devices.
- **USB Ports:** For charging smartphones, tablets, and other USB-powered devices.

Important: Unplug the charging station when not in use to conserve energy and for safety.

6. MAINTENANCE

Proper maintenance will extend the life of your daybed:

- **Cleaning:** Wipe the wooden and upholstered surfaces with a dry, soft cloth. For stubborn spots on wood, a slightly damp cloth followed by immediate drying can be used. For upholstered areas, spot clean with a mild fabric cleaner if necessary, testing on an inconspicuous area first.
- **Hardware:** Periodically check all bolts and screws to ensure they remain tight. Re-tighten as needed to maintain stability.
- **Charging Station:** Keep the charging ports free of dust and debris. Do not use liquid cleaners directly on the charging station.
- **LED Lights:** The LED lights are designed for long-term use. If a light issue occurs, check the power connection.

7. TROUBLESHOOTING

If you encounter any issues with your daybed, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Bed feels wobbly or unstable.	Loose hardware connections.	Check and re-tighten all bolts and screws. Ensure all components are correctly aligned.
LED lights are not working.	Power cord unplugged; faulty connection; switch off.	Ensure the power cord is securely plugged into a working outlet. Check the light switch. Verify all internal connections for the LED strip.
Charging station not providing power.	Daybed power cord unplugged; device not properly connected; overloaded circuit.	Confirm the daybed's main power cord is plugged in. Ensure devices are correctly inserted into the outlets/USB ports. Avoid plugging in too many high-power devices simultaneously.
Drawers are difficult to open/close.	Overloaded drawer; debris in tracks; misaligned tracks.	Reduce the weight in the drawer. Clean the drawer tracks. Check if the drawer slides are correctly installed and aligned.

If the problem persists after attempting these solutions, please contact OYUMOENTS customer support.
