3. Package Contents

Verify that all components listed below are included in your package. If any parts are missing or damaged, please contact customer support.

- Upholstered Headboard with Charging Station
- Side Rails (Left and Right)
- Footboard
- Center Support Beam(s)
- Wooden Slats with Fabric Strap Connection
- Support Legs (for frame and center beam)
- Hardware Pack (screws, bolts, washers, Allen wrench)
- Assembly Instructions Manual

4. Setup and Assembly

Assembly typically requires two adults and can be completed within an hour. A power drill is recommended for faster and easier assembly, though a regular screwdriver can be used.

Required Tools (Not Included):

- Phillips Head Screwdriver (or Power Drill with Phillips bit)

Assembly Steps:

1. **Unpack and Identify Parts:** Carefully unpack all components and lay them out on a clean, soft surface. Refer to the parts list in your manual to identify each piece.
2. **Attach Headboard Legs:** Secure the support legs to the upholstered headboard using the provided hardware.
3. **Connect Side Rails:** Attach the side rails to the headboard and footboard using the appropriate bolts. Ensure all connections are firm.
4. **Install Center Support:** Assemble and install the center support beam(s) and their respective support legs. Ensure the legs are positioned to provide adequate support.
5. **Place Wooden Slats:** Lay the wooden slats across the bed frame. The slats are connected by a fabric strap for easy placement. Secure the slats to the side rails using the provided screws. This system supports your mattress directly, eliminating the need for a box spring.
6. **Final Tightening:** Once all components are in place, go back and ensure all screws and bolts are securely tightened.

Do not overtighten.

- **Storage Shelf:** The top surface of the headboard serves as a storage shelf, ideal for placing your phone, books, or small decorative items while charging.

6. Maintenance

Regular maintenance will help prolong the life and appearance of your bed frame.

- **Cleaning the Upholstery:** For general cleaning, gently vacuum the velvet fabric to remove dust and debris. For spills, blot immediately with a clean, dry cloth. For stubborn stains, use a mild fabric cleaner according to its instructions, testing on an inconspicuous area first.
- **Frame Cleaning:** Wipe down the frame components with a damp cloth and mild soap if necessary. Dry immediately.
- **Under-Bed Cleaning:** The bed frame features a 6-inch (15 cm) under-bed clearance, allowing most robot vacuums to pass underneath for effortless cleaning.
- **Fastener Check:** Periodically check all bolts and screws to ensure they remain tight. Re-tighten as needed to maintain stability and prevent squeaking.

7. Troubleshooting

Refer to the following common issues and solutions:

Problem	Possible Cause	Solution
Bed frame is wobbly or squeaks.	Loose fasteners.	Check and re-tighten all bolts and screws. Ensure all connections are secure.

Problem	Possible Cause	Solution
Mattress sags between slats.	Slats are too far apart or not properly secured.	Ensure all slats are correctly positioned and screwed into the side rails. If gaps are still too wide, consider adding a bunkie board or additional support.
Center support legs do not touch the floor.	This is normal without weight.	The center support legs are designed to engage and provide support once weight is applied to the bed. They may not fully touch the floor when the bed is empty. If they remain significantly off the floor with a mattress and occupant, check assembly of the center beam and legs.
Charging station is not working.	Power cord unplugged; device incompatibility; faulty outlet.	Ensure the headboard's power cord is securely plugged into a functional wall outlet. Test the wall outlet with another device. Try a different device with the charging station to rule out device incompatibility.
