## 2. SAFETY INFORMATION

Always prioritize safety when working with engine components. Failure to follow safety instructions can result in serious injury or damage to equipment.

- **Disconnect Power:** Before beginning any installation or maintenance, ensure the equipment's engine is off and cooled down. Disconnect the spark plug wire to prevent accidental starting.
- **Wear Protective Gear:** Always wear appropriate personal protective equipment (PPE), including safety glasses and gloves.
- **Work in a Well-Ventilated Area:** If working with fuel or other volatile liquids, ensure adequate ventilation.
- **Handle Fuel Safely:** If this part is a fuel tank, drain all fuel from the old tank into an approved container before removal. Avoid spills and open flames.
- **Consult Equipment Manual:** Refer to your specific equipment's owner's manual for detailed safety procedures and component-specific instructions.
- **Professional Installation Recommended:** If you are unsure about any step, seek assistance from a qualified service technician.

## 3. PACKAGE CONTENTS

Upon opening the package, verify that all components are present and undamaged.

- (Additional components, if any, will be listed here by the manufacturer.)

## 4. COMPATIBILITY

---

This assembly part is compatible with Ducar 303 engines. It is designed for use with various outdoor power equipment manufactured by Homelite and Ryobi. To ensure proper fitment, always compare the dimensions and appearance of this part with the original component you are replacing, and cross-reference the part number #099981133085.

## 5. INSTALLATION / SETUP

---

The following are general guidelines for installing the engine assembly part. Specific steps may vary depending on your equipment model. Always refer to your equipment's service manual for precise instructions.

1. **Preparation:** Ensure the equipment is turned off, cooled, and the spark plug wire is disconnected. Place the equipment on a stable, level surface.
2. **Access:** Locate the component to be replaced on your equipment. This may require removing covers or other parts.
3. **Removal of Old Part:** Carefully disconnect any hoses, wires, or fasteners attached to the old assembly. Note their positions for reinstallation. Remove the old part.
4. **Inspection:** Inspect the surrounding area for any damage or wear that might affect the new part's function. Clean any debris.
5. **Installation of New Part:** Position the RATION assembly part in its designated location. Secure it with the appropriate fasteners.
6. **Reconnect:** Reconnect all hoses and wires that were detached, ensuring they are securely fastened and routed correctly. If this is a fuel tank, ensure all fuel lines are properly connected and clamped.
7. **Final Checks:** Double-check all connections and fasteners. Ensure there are no loose parts.
8. **Test:** Reconnect the spark plug wire. If applicable, refill with the correct type and amount of fuel/fluid. Start the equipment and check for proper function and any leaks.

## 6. OPERATION

---

As a replacement assembly part, its operation is integrated into the overall function of your outdoor power equipment. Once correctly installed, the part should function seamlessly with the Ducar 303 engine, contributing to the equipment's intended performance. Refer to your equipment's main operating manual for instructions on starting, running, and shutting down your specific Homelite or Ryobi device.

## 7. MAINTENANCE

---

Proper maintenance extends the life of your equipment and its components. While this specific part may not require extensive individual maintenance, general engine and equipment care is crucial.

- **Regular Inspection:** Periodically inspect the assembly part for any signs of wear, cracks, or leaks, especially if it is a fuel tank.
- **Cleaning:** Keep the exterior of the part clean from dirt and debris.

- **Fuel Quality (if applicable):** If this part is a fuel tank, always use fresh, clean fuel of the recommended type for your engine.
- **Storage:** When storing equipment for extended periods, follow your equipment's manual for proper fuel stabilization or draining procedures.

## 8. TROUBLESHOOTING

If you encounter issues after installing the RATION Ducar 303 Engine Assembly Part, consider the following:

- **Leaks:** If fluid leaks are observed, immediately shut down the equipment. Check all connections, hoses, and clamps for tightness and proper seating. Inspect the part itself for any damage.
- **Engine Not Starting/Running Poorly:** Ensure all connections are secure. Verify that the correct fuel/fluid is present and that the fuel lines (if applicable) are not kinked or blocked. Refer to your equipment's main troubleshooting guide.
- **Loose Part:** If the part feels loose, re-tighten all fasteners according to the equipment's specifications.

If problems persist, discontinue use and consult a qualified service technician or contact the seller for support.
