5.1 Converting to Lounger or Bed

The sleeper chair easily converts between a chair, lounger, and bed. To convert:

1. **From Chair to Lounger:** Gently pull the footrest extension from beneath the seat. It will slide out smoothly and lock into place, creating a comfortable lounger.
2. **From Lounger to Bed:** With the footrest extended, adjust the backrest to its fully flat position. This transforms the lounger into a full-size bed.
3. **From Bed/Lounger to Chair:** Reverse the steps. First, raise the backrest to your desired upright position, then push the footrest extension back under the seat until it is fully retracted.

- **Frame Maintenance:** Periodically check all bolts and screws to ensure they remain tight. Tighten as necessary to maintain stability.
- **Avoid Direct Sunlight:** Prolonged exposure to direct sunlight can cause fabric fading.

7. TROUBLESHOOTING

If you encounter any issues with your COMHOMA Sleeper Chair, please refer to the following common troubleshooting tips:

- **Difficulty Converting:** Ensure no obstructions are blocking the pull-out mechanism or the backrest adjustment. Check that all assembly hardware is securely tightened.
- **Unstable Feel:** Verify that all legs are evenly placed on the floor and that all assembly bolts are tightened. Uneven flooring can also contribute to instability.
- **Squeaking Noises:** This may indicate loose connections. Re-tighten all assembly hardware. Applying a small amount of silicone lubricant to moving metal parts may also help.

If problems persist, please contact COMHOMA customer support for further assistance.
