2.2 Connection Modes

The E-YOOSO K-787 keyboard supports three connection methods:

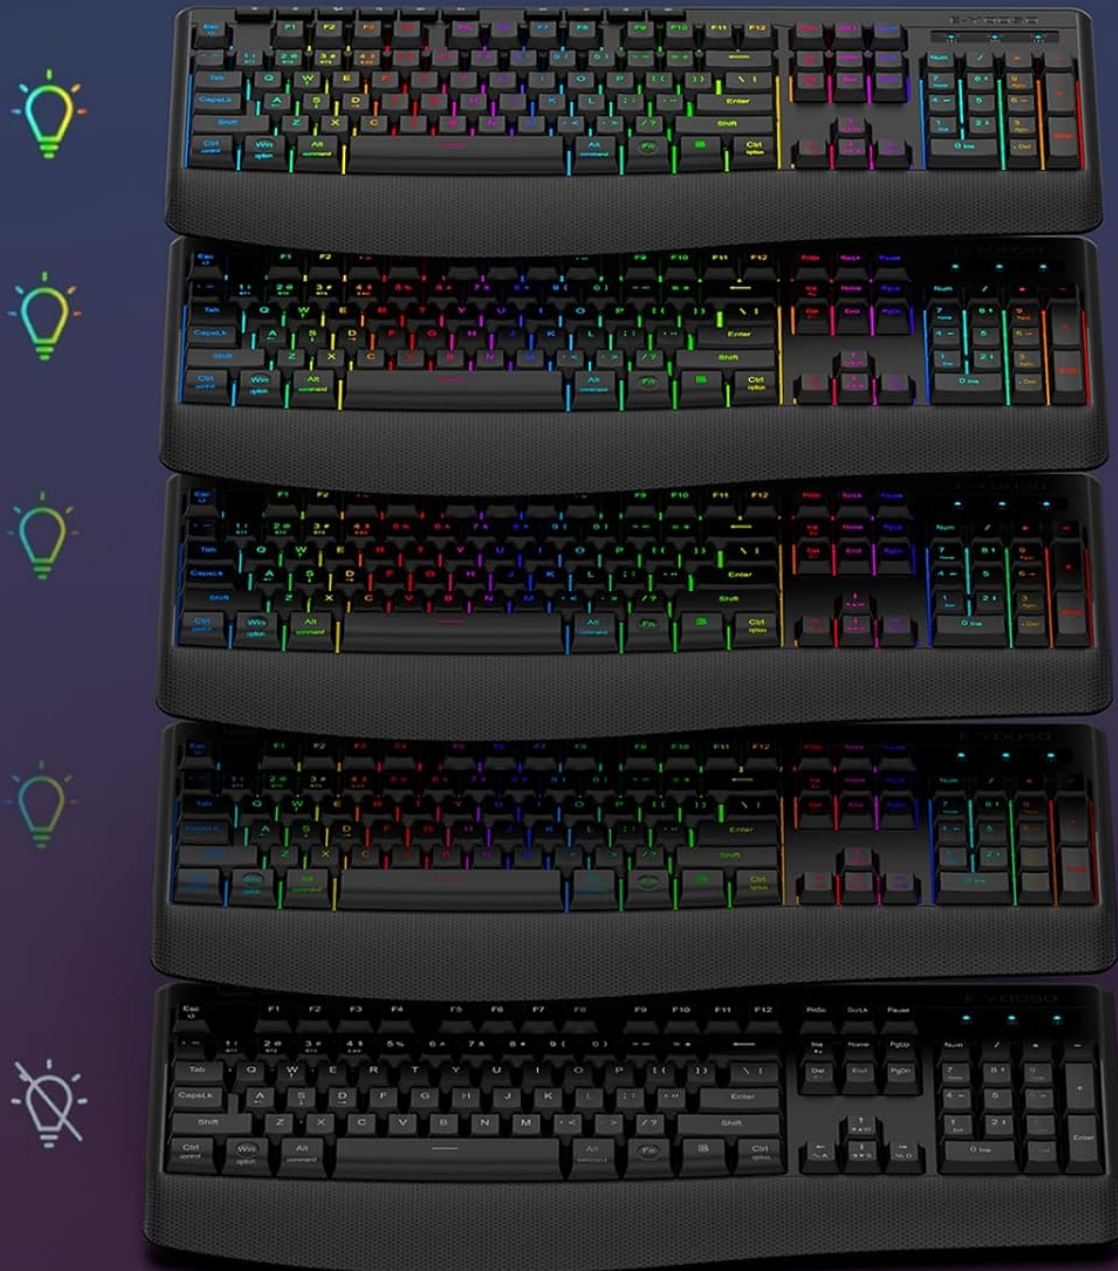

1. **USB Wired Mode:** Connect the keyboard directly to your computer using the provided Type-C cable. The

keyboard will function as a wired device and charge simultaneously.

2. **2.4G Wireless Mode:** Insert the USB receiver into an available USB port on your computer. Switch the keyboard to 2.4G mode using the switch on the back.
3. **Bluetooth Mode (BT1/BT2/BT3):** The keyboard can connect to up to three Bluetooth devices. Switch the keyboard to Bluetooth mode using the switch on the back.

5 LEVELS ADJUSTABLE BRIGHTNESS

The keyboard can last up to 300 hours with the lights off.

2.3 Pairing Instructions

2.3.1 2.4G Wireless Pairing

- Locate the USB receiver stored in the compartment on the underside of the keyboard.
- Plug the USB receiver into an available USB port on your computer.
- Slide the switch on the back of the keyboard to the "2.4G" position. The M indicator light will flash yellow, then become solid yellow after successful connection.

2.3.2 Bluetooth Pairing

- Slide the switch on the back of the keyboard to the "BT" position.
- Press and hold **Fn + 1/2/3** for 3 seconds to enter the corresponding channel's pairing mode. The M indicator light will flash blue/cyan/pink.
- On your device (computer, laptop, tablet), search for Bluetooth devices and select "E-YOOSO K-787".
- Once paired, the M indicator light will remain solid, indicating a successful connection.

2.4 Charging the Keyboard

The keyboard is equipped with a 1900mAh rechargeable battery. Use the provided Type-C cable to charge the keyboard. A full charge takes approximately 2-3 hours. The M indicator light will show charging status (color may vary).

THREE MODES IN ONE

The keyboard can last up to 300 hours with the lights off.

3. OPERATING INSTRUCTIONS

3.1 Multimedia Keys

The keyboard features 10 independent multimedia keys and 12 combination multimedia keys for quick access to various functions. These include volume control, media playback, and more.

FULL FUNCTION KEYBOARD

10 Independent multimedia keys

Image 3.1: Overview of the keyboard's full function layout, including multimedia keys.

3.2 RGB Backlight Control

The keyboard offers 9 RGB lighting modes. You can customize the lighting effects, speed, and brightness.

- **Switching Modes:** Press **Fn + Ins** to cycle through the 9 different backlight modes.
- **Adjusting Brightness:** Press **Fn + Up Arrow (W)** to increase brightness, and **Fn + Down Arrow (S)** to

decrease brightness (5 levels).

- **Adjusting Speed:** Press **Fn + Left Arrow (A)** to decrease speed, and **Fn + Right Arrow (D)** to increase speed.

GENEROUS PALM REST ENSURES ALL-DAY COMFORT

3.3 Windows/Mac Compatibility

A dedicated switch on the back of the keyboard allows you to toggle between Windows and Mac compatibility modes, ensuring optimal key mapping for your operating system.

3.4 Ergonomic Design

The keyboard features a built-in wrist rest and adjustable tilt legs (8° and 12°) to provide a comfortable typing experience and reduce wrist fatigue during extended use.

Image 3.3: Ergonomic features including the wrist rest and adjustable tilt angles.

4. MAINTENANCE

- Clean the keyboard regularly with a soft, dry cloth.
- Avoid exposing the keyboard to excessive moisture or liquids. The keyboard has splash resistance, but it is not waterproof.
- Do not use harsh chemicals or abrasive cleaners.
- Store the keyboard in a cool, dry place when not in use.

5. TROUBLESHOOTING

5.1 Keyboard Not Responding

- **Check Connection:** Ensure the USB receiver is properly plugged in for 2.4G mode, or the Type-C cable is securely connected for wired mode. For Bluetooth, verify the device is paired and selected.
- **Battery Level:** If the keyboard is in wireless mode, check the battery level. Recharge if necessary.
- **Mode Switch:** Confirm the switch on the back of the keyboard is set to the correct connection mode (2.4G or BT).

5.2 Low Voltage Indicator

When the battery voltage is below 3.3V, the red light of the M indicator will flash slowly. When the battery voltage is equal to or lower than 3.0V, the keyboard function will be turned off. Recharge the keyboard promptly.

5.3 Smart Sleep Mode

The keyboard features a smart sleep mode to conserve power. If inactive for 90 seconds, the backlight will turn off, and the keyboard will enter sleep mode. Press any key to reactivate it.

5.4 Backlight Issues

- If backlights are not working, ensure the keyboard is not in sleep mode.
- Adjust brightness using **Fn + Up/Down Arrow** keys.
- Cycle through modes using **Fn + Ins**.
