Passky KFM52PLY5B03R1-2D

Passky 52-inch Flush Mount Ceiling Fan with Lights

Model: KFM52PLY5B03R1-2D | **Brand:** Passky

Introduction

This manual provides detailed instructions for the installation, operation, and maintenance of your Passky 52-inch Flush Mount Ceiling Fan with Lights. Designed for various indoor spaces such as bedrooms, living rooms, and offices, this fan features a quiet DC motor, remote control, reversible airflow, and customizable LED lighting. Please read this manual thoroughly before installation and use to ensure safe and efficient operation.

Safety Information

WARNING: To reduce the risk of fire, electric shock, or personal injury, always follow these basic precautions:

- Ensure the electrical supply is disconnected at the circuit breaker before installation or servicing.
- All electrical wiring must be performed by a qualified electrician and comply with all local and national electrical codes.
- The fan is designed for **120V (US area)** electrical systems only. Do not attempt to use with 220V systems.
- Do not connect the fan to a dimmer switch or a fan gear switch. Use only a traditional ON/OFF switch.
- The fan motor is a DC motor; therefore, the light and fan cannot be wired separately.
- Mount the fan only to an outlet box marked "Acceptable for Fan Support of 35 lbs (15.9 kg) or less" and use the mounting screws provided with the outlet box.
- This fan is suitable for indoor use. While it can be used in covered outdoor spaces like patios or gazebos, it must **not be exposed directly to rain**.
- Never insert objects into the path of the fan blades.

Package Contents

Verify that all components are present before beginning installation:

- Ceiling Fan Unit
- Light Kit
- Mounting Hardware
- Remote Control

Setup and Installation

This ceiling fan is designed for flush mount installation. A standard ceiling junction box is required; no additional drilling or damage is needed if one is present. Step-by-step illustrated guides are typically included with the product to assist with installation.

Image: Overview of the fan's dimensions and key parameters, including a 52-inch diameter and 14-inch height, suitable for rooms with 8-10ft ceilings. It also details electrical parameters like 120V voltage, 25W DC motor voltage, and 24W light voltage, along with airflow, brightness, and color temperature options.

The fan blades are double-sided, offering different aesthetic options (e.g., nickel and wood grain). Choose the side that best complements your room's decor during assembly.

Image: Illustration of the fan's reversible function, showing downward airflow for cooling in summer and upward airflow for improved air circulation in winter. The remote control is depicted, highlighting the ease of switching modes.

Operating Instructions

Your Passky ceiling fan is operated using the included remote control. Ensure the remote has working batteries.

Image: A visual summary of the fan's main functions, including 24W LED light, remote control, 6 wind speeds, reversible DC motor, super quiet operation, 1/2/4H timer, memory function, and double-sided blades. Important notes about 120V compatibility and integrated wiring are also present.

Fan Operation

- **Power On/Off:** Use the dedicated power button on the remote.
- **Speed Control:** Select from 6 adjustable wind speeds to achieve your desired airflow.
- **Reversible Function:** The DC motor allows for reversible blade rotation. In summer, blades rotate counter-clockwise for a cooling downward airflow. In winter, blades rotate clockwise to circulate warm air upwards. This function is controlled via the remote.
- **Natural Wind Mode:** The fan can adjust airflow based on room temperature, providing a natural breeze effect.

Image: Diagram illustrating how the fan's airflow speed changes with room temperature, demonstrating the natural wind mode. It shows lower speeds (1-2) for cooler temperatures and higher speeds (5-6) for warmer temperatures, optimizing comfort.

Light Operation

- **Light On/Off:** The light can be turned on or off independently of the fan.
- **Dimmable:** Adjust the light brightness from 10% to 100% using the remote control.
- **Color Temperature:** Choose from three color temperatures: 3000K (Warm Light), 4500K (Natural Light), and 6000K (Cold Light) to suit your preference and activity.

Image: Display of the fan's customizable LED light features, including 120° large luminous surface, 10-100% dimming, and three selectable color temperatures: 3000K Warm Light, 4500K Natural Light, and 6000K Cold Light.

Timer Function

Set the fan to automatically turn off after 1, 2, or 4 hours using the timer buttons on the remote control. This feature is ideal for use during sleep.

Image: Visual representation of the fan's quiet operation, noting a noise level as low as 30dB, comparable to falling leaves. It also highlights the 1/2/4 hour timer function, promoting a peaceful sleeping environment.

Memory Function

The fan and light settings (including brightness and color temperature) will be remembered when the unit is turned off and back on via a wall switch. This ensures your preferred settings are restored without manual adjustment.

Maintenance

Regular maintenance helps ensure the longevity and optimal performance of your ceiling fan.

- **Cleaning:** Periodically clean the fan blades and motor housing with a soft, damp cloth. Do not use abrasive cleaners or solvents, as these can damage the finish.
- **Dusting:** Dust the light kit and fan blades regularly to prevent buildup that can affect performance and appearance.
- **Tightness:** Check all screws and connections periodically to ensure they are secure.

Troubleshooting

If you encounter issues with your fan, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Fan does not operate	No power supply; Loose wiring; Remote control battery low.	Check circuit breaker; Ensure all connections are secure; Replace remote control batteries.
Light does not turn on	Loose wiring; Light kit malfunction.	Check light kit connections; Contact customer support if light kit is faulty.
Fan makes excessive noise	Loose mounting screws; Unbalanced blades.	Tighten all mounting screws; Ensure blades are properly installed and balanced.
Remote control not responding	Low battery; Remote not paired.	Replace remote control batteries; Refer to remote pairing instructions (if applicable).
Fan connected to dimmer switch	Incompatible switch type.	**Do not connect to a dimmer switch.** Replace with a standard ON/OFF switch.

Specifications

Feature	Specification
Brand	Passky
Model Name	KFM52PLY5B03R1-2D
Size	52 Inch
Color	Silver-2rings
Product Dimensions (D x W x H)	132.1D x 132.1W x 40.6H centimetres
Voltage	120 volts (US area)
Wattage	64 watts
Air Flow Capacity	4454 cubic feet per minute
Noise Level	35 dB
Number of Blades	5
Motor Type	DC
Light Type	LED (Dimmable, 3 CCT)
Mounting Type	Flush Mount
Control Method	Remote Control
Number of Speeds	6

Feature	Specification
Material	Engineered Wood, Metal, Plastic
Indoor/Outdoor Usage	Indoor (Covered Outdoor Spaces)
Special Features	1/2/4H Timer, Reversible, Customizable LED Light, Quiet Operation, Memory Function

Warranty and Support

Passky stands behind the quality of its products.

- **Motor Warranty:** Up to 120 months (10 years) warranty on the fan motor.
- **Other Components Warranty:** 2 years warranty on the rest of the fan components.
- **Customer Support:** We offer 24-hour customer support. If you have any questions during installation or use, please do not hesitate to contact us for assistance.

Ask a question about this manual

Ask about setup, troubleshooting, compatibility, parts, safety, or missing instructions. Manuals+ will review the question and use this page's manual context to help answer it.
