## GreenPan APEX Tri-Ply Thermobond Frying Pan

# GreenPan Hybrid APEX 10-inch Nonstick Stainless Steel Frying Pan Instruction Manual

Model: APEX Tri-Ply Thermobond Frying Pan (CC009970-001)

## INTRODUCTION

---

Thank you for choosing the GreenPan Hybrid APEX 10-inch Nonstick Stainless Steel Frying Pan. This cookware combines the durability of stainless steel with the performance of PFAS-free ceramic nonstick. Featuring Thermobond Technology, it offers superior searing, effortless food release, and easy cleanup. Designed for versatile cooking, it is compatible with all cooktops, oven safe up to 850°F, and dishwasher safe.

## KEY FEATURES

---

- **Hybrid Thermobond Technology:** Fuses diamond-infused, PFAS-free ceramic nonstick with an etched stainless steel pattern for enhanced searing, effortless release, and durability.
- **PFAS-Free Ceramic Nonstick:** Our diamond-infused ceramic nonstick coating is designed for lasting performance and healthier cooking.
- **Powerful APEX Pattern:** The raised, etched stainless steel pattern directs heat for effective searing and even oil distribution.
- **Metal Utensil Safe:** Engineered to be 10 times more metal utensil safe than previous GreenPan coatings.
- **Induction & All Cooktop Compatible:** Suitable for use on electric, gas, and induction stovetops.
- **Oven & Broiler Safe:** Withstands temperatures up to 850°F.
- **Dishwasher Safe:** Designed for convenient cleanup.
- **Riveted Stainless Steel Handles:** Provide a secure and comfortable grip.

- **Chip-Free Pouring Rims:** Designed for seamless pouring.

## SETUP AND FIRST USE

---

1. **Unpack:** Carefully remove all packaging materials and labels from the frying pan.
2. **Wash:** Before first use, wash the pan in warm, soapy water with a soft sponge or cloth. Rinse thoroughly and dry completely.
3. **Preheat:** Place the pan on your stovetop over low to medium heat for approximately 90 seconds. This helps to activate the nonstick properties.
4. **Add Oil:** Add a small amount of cooking oil or butter (about 1 teaspoon) to the preheated pan. Spread it evenly over the cooking surface.
5. **Ready to Cook:** Your GreenPan Hybrid APEX frying pan is now ready for use.

## OPERATING INSTRUCTIONS

---

- **Heat Settings:** Always use low to medium heat for most cooking. High heat should only be used for searing or browning for short periods. Excessive high heat can damage the nonstick coating over time.
- **Cooking Fats:** Always use a small amount of butter or oil. Avoid aerosol cooking sprays as they can leave a residue that may affect the nonstick performance.
- **Utensils:** While the APEX pan is designed to be metal utensil safe, we recommend using silicone, wooden, or heat-resistant plastic utensils to prolong the life of the nonstick coating.
- **Oven Use:** The pan is oven and broiler safe up to 850°F (450°C). This allows for versatile cooking, such as searing on the stovetop and finishing in the oven.
- **Cooktop Compatibility:** This pan is compatible with all stovetops, including induction, gas, and electric.

## MAINTENANCE AND CLEANING

---

- **Cool Down:** Always allow your pan to cool completely before washing. Submerging a hot pan in cold water can cause thermal shock, leading to warping or damage to the nonstick coating.
- **Hand Washing:** For best results and to prolong the life of your cookware, hand washing is recommended. Use warm, soapy water and a soft sponge or cloth. The nonstick surface makes

cleanup easy.

- **Avoid Abrasives:** Do not use steel wool, abrasive scouring pads (e.g., Brillo pads), or harsh chemical cleaners, as these can scratch and damage the nonstick surface.
- **Dishwasher Safe:** The GreenPan Hybrid APEX frying pan is dishwasher safe. However, frequent dishwasher use may dull the exterior finish over time.
- **Storage:** When storing, place a soft cloth or pan protector between stacked pans to prevent scratching the nonstick surface.

## TROUBLESHOOTING

---

- **Food Sticking:**
  - Ensure the pan is properly preheated before adding food.
  - Always use a small amount of cooking oil or butter.
  - Avoid using excessively high heat, which can degrade the nonstick coating over time.
  - Clean the pan thoroughly after each use to prevent residue buildup.
- **Discoloration or Carbonization:**
  - This can occur from cooking at very high temperatures or from burnt food residue.
  - To clean, make a paste of baking soda and a small amount of water. Apply to the affected area, let sit for a few minutes, then gently scrub with a soft sponge. Rinse well.
- **Uneven Heating:**
  - Ensure the pan is centered on the heat source.
  - The thick base of the GreenPan APEX is designed for even heat distribution; ensure your

stovetop burner size matches the pan's base.

## SPECIFICATIONS

Feature	Detail
Brand	GreenPan
Model Name	APEX
Model Number	CC009970-001
Material	Ceramic, Stainless Steel (Tri-Ply)
