MBYULO R101X0

MBYULO R101X0 Robot Vacuum and Mop Combo Instruction Manual

Model: R101X0 | Brand: MBYULO

1. INTRODUCTION

This manual provides essential information for the safe and efficient operation of your MBYULO R101X0 Robot Vacuum and Mop Combo. Please read it thoroughly before first use and retain it for future reference.

The MBYULO R101X0 is a versatile 2-in-1 cleaning device designed to vacuum and mop various floor types, including hardwood, tile, and low-pile carpets. It features powerful 5000Pa suction, smart navigation, and multiple control options for convenient home cleaning.

Sweep, Vacuum And Mop, All In One

The R101X0 Robot Vacuum Cleaner can vacuum and mop at the same time, refresh your floors in one go!

2. PACKAGE CONTENTS

Verify that all items listed below are included in your package:

- Robot Cleaner (1)
- Mopping Cloth (1)
- Charging Dock (1)
- Power Adapter (1)
- Cleaning Brush (1)
- Side Brush (2)
- Remote Handset (1)
- AAA Battery (2)
- HEPA Filter (1)
- Water Tank (1)

3. SETUP

3.1 Initial Charging

Before first use, fully charge the robot vacuum. Connect the charging dock to a power outlet and place the robot on the dock. Ensure the charging contacts align. The charging indicator light will illuminate red when charging. For the first charge, it may be beneficial to plug the charging cable directly into the vacuum and the wall.

Automatic Charging Station

It automatically recharges when the battery is low.

Image: The robot vacuum automatically navigating back to its charging station.

3.2 Attaching Side Brushes

Turn the robot vacuum upside down. Align the side brushes with the designated posts on the underside of the robot and press firmly until they click into place. Only two side brushes are needed for operation.

3.3 Filling Water Tank & Dust Bin

The robot features a combined 350mL dust bin and 300mL electronically controlled water tank. To access, press the release button on the side of the robot and pull out the module. Open the blue cap to fill the water tank with clean water. Ensure the cap is securely closed after filling. The dust bin can be emptied by opening its lid.

3.4 Attaching Mop Pad

Attach the mopping cloth to the mop pad holder. Slide the mop pad holder into the designated slot on the underside of the robot until it clicks. Remove the mop pad when only vacuuming or when the robot is charging to prevent damage to floors or the mop pad.

3.5 App Setup (Smartlife App)

Download the 'Smartlife' app from your mobile phone's app store. Register or log in to your account. Follow the in-app instructions to add your R101X0 robot vacuum. Ensure your phone is connected to a 2.4GHz Wi-Fi network and Bluetooth is enabled during the connection process. The app allows for scheduling, mode changes, and monitoring.

4. OPERATING INSTRUCTIONS

4.1 Control Methods

The MBYULO R101X0 can be controlled via the Smartlife app, the included remote control, or voice commands through Alexa.

Remote Control

Easy to use, the elders of the family can also easily use.

Image: Demonstrating remote control operation of the robot vacuum.

4.2 Cleaning Modes

Select from various cleaning modes to suit your needs:

- **Auto Cleaning:** The robot intelligently navigates and cleans the entire area.
- **Spot Cleaning:** Focuses on a specific dirty area, cleaning in a spiral pattern.
- **Edge Cleaning:** Cleans along walls and furniture edges.
- **Random Cleaning:** Cleans in a random pattern, suitable for smaller areas.

Image: Visual representation of the robot's four distinct cleaning modes.

4.3 Suction and Water Level Adjustment

Adjust the suction power (3 levels) and water flow (3 levels) via the app or remote control to optimize cleaning for different floor types and dirt levels. This ensures effective cleaning without oversaturating floors.

4.4 Automatic Recharging

The robot vacuum automatically returns to its charging dock when the battery is low (below 15%) or when a cleaning cycle is complete. Ensure the charging dock is placed in an accessible area with sufficient space around it.

Image: The robot vacuum's automatic recharging process.

4.5 Obstacle Avoidance

Equipped with advanced 3D precise obstacle avoidance sensors, the robot intelligently recognizes and avoids obstacles, white walls, and stairs. It will automatically adjust its path upon encountering an object, sensing trash within 2 meters for active cleaning.

Image: The robot vacuum's smart obstacle avoidance system in action.

4.6 Automatic Mop Lift

The robot features a 10mm automatic mop lift function, allowing it to seamlessly transition between vacuuming carpets and mopping hard floors. The mop also lifts automatically when returning to the charging base, preventing dirty streaks.

Carpet Auto Boost, Lifting Up To 15mm

When transitioning to carpet, the robot mop automatically lifts to get into the carpet more easily, at an angle of up to 15 degrees.

4.7 Ultra-Slim Design

With a 2.87-inch ultra-slim design, the robot can easily navigate under furniture, beds, sofas, and cabinets to clean hard-to-reach areas.

5. MAINTENANCE

5.1 Emptying Dust Bin

Regularly empty the 350mL dust bin to maintain optimal suction performance. Press the release button, remove the 2-in-1 module, and open the dust bin lid to dispose of collected debris.

Video: Instructions on how to disassemble and empty the dust box of the robot vacuum.

5.2 Cleaning/Replacing Filters

The robot uses a HEPA filter. Clean the filter regularly with the provided cleaning knife/brush. Replace the HEPA filter periodically (an additional filter is included) to ensure efficient air filtration and suction.

5.3 Cleaning Mop Pad

Remove the mopping cloth from the holder after each mopping session. Wash the cloth by hand or machine and allow it to air dry completely before reattaching.

5.4 Cleaning Side Brushes

Inspect side brushes for tangled hair or debris. Remove any obstructions using the cleaning brush. Replace worn or damaged side brushes as needed.

6. TROUBLESHOOTING

- **Robot not charging:** Ensure the charging dock is properly connected to power and the robot's charging contacts are aligned with the dock. Check for debris on contacts.
- **Reduced suction:** Empty the dust bin and clean or replace the HEPA filter. Check for blockages in the suction inlet.
- **Robot getting stuck:** Clear obstacles from the cleaning path. Ensure cables and small items are removed from the floor.
- **Mop not dispensing water:** Ensure the water tank is filled and correctly installed. Check for blockages in the water outlet.
- **App connectivity issues:** Ensure your phone is connected to a 2.4GHz Wi-Fi network and Bluetooth is on. Restart the app and the robot.

7. SPECIFICATIONS

Feature	Specification
Brand	MBYULO
Model Name	SS-US-R101X0-B-009
Suction Power	5000Pa
Dust Bin Capacity	350ML
Water Tank Capacity	300ML
Battery Life	Up to 130 minutes
Product Dimensions	16.3"L x 13.6"W x 4.5"H
Filter Type	HEPA
Connectivity	WiFi (2.4GHz), Bluetooth, App, Alexa
Special Features	Unique non-clogging air inlet, 2-in-1 sweep/mop, 3 cleaning modes, 3 suction levels, auto-charging, ultra-slim design, intelligent obstacle avoidance, automatic mop lift.

8. WARRANTY AND SUPPORT

MBYULO is committed to product quality and customer satisfaction. For any product maintenance needs, issues, or inquiries, please contact our dedicated support team. We are ready to provide prompt and effective solutions.

Contact information for support can typically be found on the product packaging or the official MBYULO website.
