## KEY FEATURES

- **4-in-1 Versatility:** Includes standard, narrow, detail trimmer heads, and a nail grinder for comprehensive grooming.
- **Powerful 7000RPM Motor:** Ensures efficient trimming of thick and tangled fur without overheating.
- **Ultra-Quiet Operation:** Operates at less than 45dB to minimize pet anxiety and stress during grooming.
- **IPX7 Waterproof Design:** Allows for easy cleaning under running water, suitable for wet fur trimming.
- **Safe & Skin-Friendly Blades:** Features titanium ceramic and stainless steel blades with rounded edges to prevent cuts.
- **Long-Lasting Battery:** Equipped with a 2000mAh battery, providing up to 180 minutes of use on a 1.5-hour charge.
- **Cordless & Ergonomic:** Lightweight (132g) design with a bionic cat paw soft grip handle for comfortable, flexible use.
- **Battery Indicator:** Real-time display of battery level and operating status.

Image: The Veeconn T6 trimmer highlighting its ultra-quiet operation at 45dB, which is quieter than a soft conversation, and its compact dimensions (6.1 inches long).

**7000rpm**

## **Powerful Motor For Sufficient Power**

## **SAFETY INFORMATION**

- Always ensure the trimmer is fully charged before use to maintain consistent power and prevent snagging.
- The ceramic blades are designed to be skin-friendly, but always use caution, especially around sensitive areas.
- Do not attempt to disassemble the blade assembly beyond what is required for cleaning.
- Keep the device away from children and pets when not in use.
- Avoid dropping the trimmer, as this may damage internal components or blades.
- Ensure the charging port is dry before connecting the USB cable.

## **SETUP**

- Initial Charge:** Before first use, fully charge the trimmer. Connect the Type-C USB cable to the trimmer and a compatible power source (laptop, adapter, power bank, wall outlet). The battery indicator lights will show charging progress. A full charge takes approximately 1.5 hours.
- Attaching/Detaching Heads:** To attach a head, align it with the main unit and gently push until it clicks into place. To detach, hold the main unit firmly and pull the head away.
- Attaching Guide Combs:** For trimming hair to a specific length, slide the desired guide comb (2mm, 3mm, or 6mm) onto the trimmer head until it securely snaps into position.

## Type-C Charging Strong Compatibility

## OPERATING INSTRUCTIONS

For best grooming results, follow these general steps:

- Prepare Your Pet:** Bathe and blow-dry your pet thoroughly before grooming. Use the included stainless steel

comb to remove any tangles or mats. This helps the trimmer glide smoothly and prevents pulling.

## 2. Select the Right Head:

- **Standard Trimmer Head:** Ideal for full-body trimming and larger areas. Attach a guide comb for desired hair length.
- **Narrow Trimmer Head:** Use for delicate areas such as around the ears, eyes, and legs.
- **Detail Trimmer Head:** Perfect for precise trimming of paw pads and facial hair.
- **Nail Grinder Head:** Use to gently smooth and shorten pet nails. Choose the appropriate grinding port size (small, medium, large) based on your pet's nail size.

## 3. Begin Trimming:

Turn on the trimmer. Hold the trimmer at a slight angle against the direction of hair growth. Use smooth, even strokes. For nail grinding, gently introduce your pet's nail to the grinder, working in short intervals to avoid overheating the nail.

## 4. Monitor Your Pet:

Pay attention to your pet's comfort level. The low-noise design helps reduce stress, but always take breaks if your pet shows signs of discomfort.

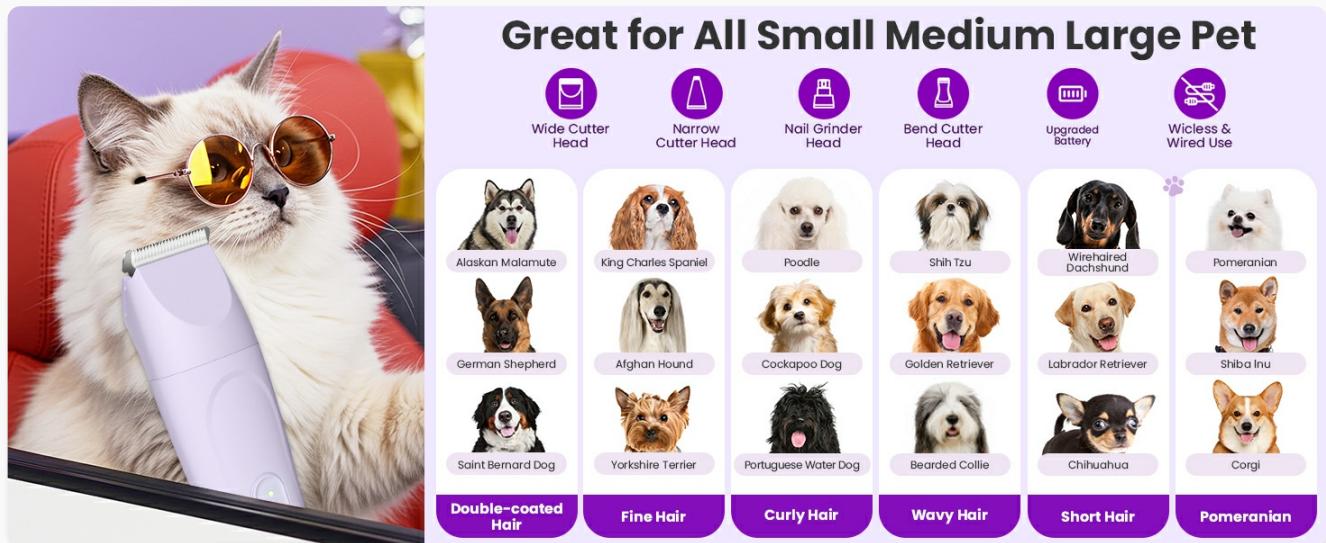

Image: A four-step visual guide demonstrating the recommended process for using the Veeconn grooming kit: 1. Bathe your dog, 2. Blow dry your pet's hair, 3. Use a comb to smooth hair, 4. Shave hair with the clippers.

Blade size: (27.5mm/69/64")

Standard Full-Body Head

## MAINTENANCE AND CLEANING

Proper maintenance ensures the longevity and performance of your grooming kit.

- Clean After Each Use:** After each grooming session, turn off the trimmer and detach the head. Use the included cleaning brush to remove any trapped hair from the blades and inside the head.
- Rinse Blades:** Thanks to its IPX7 waterproof rating, the detachable trimmer heads can be rinsed directly under running water. Ensure no water enters the main unit's charging port.
- Dry Thoroughly:** After rinsing, wipe the blades and heads dry with a clean cloth. Allow them to air dry completely before reattaching or storing.
- Lubricate Blades:** Apply a few drops of the provided lubricating oil to the blades after cleaning and drying. This helps maintain blade sharpness and reduces friction. Run the trimmer for a few seconds to distribute the oil.

5. **Storage:** Store the grooming kit in a cool, dry place, away from direct sunlight and moisture.

**Important:** Do not attempt to disassemble the blade beyond what is necessary for cleaning and oiling.

## IPx7 Waterproof

Remove head, clean under running water

Step 1

## TROUBLESHOOTING

Problem	Possible Cause	Solution
Trimmer not turning on	Low battery; Power button not pressed correctly	Charge the trimmer fully; Ensure the power button is pressed firmly.
Reduced cutting performance or pulling hair	Blades are dull or clogged with hair; Insufficient lubrication; Low battery	Clean blades thoroughly; Apply lubricating oil; Charge the trimmer fully.

Problem	Possible Cause	Solution
Excessive noise or vibration	Blades are not properly aligned or lubricated; Foreign object in the head	Clean and lubricate blades; Re-attach the head correctly; Check for and remove any obstructions.
Nail grinder not effective	Grinding stone worn out; Incorrect technique	Contact customer support for replacement parts; Use short, gentle strokes.
