3. SETUP AND INSTALLATION

The AWESAFE Android 13 Car Stereo is custom-designed for Suzuki Swift models manufactured between 2011 and 2017, ensuring a perfect fit and straightforward installation without the need for modifications. For optimal performance and safety, professional installation is recommended.

3.1. Compatibility Check

Ensure your vehicle is a Suzuki Swift model from 2011-2017. The unit is designed as a direct replacement for the original car radio.

3.2. Installation Steps (General Guide)

1. **Preparation:** Disconnect the vehicle's battery before starting any electrical work.
2. **Remove Original Unit:** Carefully remove the existing car radio and dashboard trim. Refer to your vehicle's service manual

for specific instructions.

3. **Connect Wiring:** Connect the provided power cables, RCA cables, USB cables, external microphone, GPS antenna, and reverse video input cable to the corresponding ports on the new car stereo and your vehicle's wiring harness. Ensure all connections are secure.
4. **Test Functionality:** Before fully reassembling the dashboard, reconnect the battery and briefly test the car stereo's basic functions (power, audio, touchscreen, etc.).
5. **Secure Unit:** Mount the new car stereo into the dashboard opening using the provided screws and frame.
6. **Reassemble:** Reinstall the dashboard trim and reconnect the battery.

4. OPERATING INSTRUCTIONS

4.1. Basic Operation

- **Power On/Off:** The unit powers on automatically with the vehicle's ignition. Press and hold the power button (if available) to

manually turn off or on.

- **Touchscreen:** Navigate the system using the responsive 9-inch HD IPS touchscreen.
- **Volume Control:** Adjust volume using the physical buttons or on-screen controls.

4.2. Android 13 System

The car stereo runs on a smooth Android 13 operating system, powered by a robust processor with 2GB RAM and 32GB ROM. This allows for quick startup, efficient application management, and ample storage for media.

4.3. Connectivity

- **Bluetooth:** Connect your smartphone for stable hands-free calls and seamless music streaming. The system supports phonebook synchronization.
- **WiFi:** Utilize the integrated WiFi to download your favorite applications from the Play Store, browse the internet, and receive system updates.
- **USB/TF/AUX:** Use the dedicated ports for multimedia playback from external storage devices.

5. MAINTENANCE

To ensure the longevity and optimal performance of your AWESAFE car stereo, follow these maintenance guidelines:

- **Screen Cleaning:** Use a soft, dry, lint-free cloth to gently wipe the touchscreen. Avoid using abrasive cleaners or spraying liquids directly onto the screen.
- **Ventilation:** Ensure that the ventilation openings of the unit are not blocked to prevent overheating.
- **Software Updates:** Periodically check for and install available software updates via WiFi to ensure the system runs efficiently and securely.
- **Environmental Conditions:** Avoid exposing the unit to extreme temperatures, direct sunlight for prolonged periods, or excessive moisture.

6. TROUBLESHOOTING

If you encounter issues with your car stereo, refer to the following common troubleshooting steps:

- **No Power:** Check all power cable connections. Ensure the vehicle's battery is properly connected and charged. Verify the fuse for the car stereo.
- **No Sound:** Check speaker connections. Ensure the volume is not muted or set to minimum. Verify audio settings in the DSP or equalizer.
- **Bluetooth Connection Issues:** Ensure Bluetooth is enabled on both the car stereo and your smartphone. Delete previous pairings and attempt to reconnect. Move closer to the unit if possible.
- **GPS Signal Loss:** Ensure the GPS antenna is properly installed and has a clear view of the sky. Move the vehicle to an open area if signal is weak.
- **Touchscreen Unresponsive:** Try restarting the unit. If the issue persists, a factory reset might be necessary (note: this will erase all user data).
- **System Freezes/Slow Performance:** Close unnecessary applications. Clear cache or perform a system restart. Ensure sufficient storage space is available.

If these steps do not resolve the issue, please contact customer support for further assistance.
