Spigen AGL10202

Spigen GlasTR EZ FIT Pro Tempered Glass Screen Protector for Galaxy S25 FE

Instruction Manual

INTRODUCTION

This manual provides comprehensive instructions for the installation, operation, and maintenance of your Spigen GlasTR EZ FIT Pro Tempered Glass Screen Protector for the Samsung Galaxy S25 FE. This screen protector is engineered with High Alumina Silicate glass, offering 9H+ surface hardness for superior protection against scratches and impacts, while maintaining optimal display clarity and touch sensitivity. Please read these instructions carefully before installation to ensure proper application and performance.

SETUP: INSTALLATION GUIDE

The Spigen GlasTR EZ FIT Pro features an innovative installation tray designed for automatic alignment and dust removal, making the application process effortless and precise. Follow these steps for a bubble-free installation.

1. **Prepare Your Device:** Ensure your Samsung Galaxy S25 FE screen is completely clean and free of dust, smudges, and

fingerprints. Use the included cleaning wipes and microfiber cloth. For best results, perform installation in a dust-free environment.

2. **Place the EZ Fit Tray:** Carefully place the EZ Fit installation tray over your phone. The tray is designed to perfectly align with your device.
3. **Initiate Application:** Locate the pull tab on the installation tray. Slowly pull the tab to begin the screen protector application. The protector will automatically adhere to the screen while the tray removes dust.
4. **Press and Slide:** Gently press down on the center of the screen protector and slide your finger across it for approximately 30 seconds to ensure full adhesion and to push out any initial air bubbles.
5. **Remove Tray and Sticker:** Once the screen protector is adhered, remove the black instruction sticker from the tray, then carefully lift and remove the entire EZ Fit tray from your phone.
6. **Finalize:** Use the included squeegee tool to gently push any remaining small air bubbles towards the edges of the screen. Small bubbles typically disappear within 24-48 hours.

The image shows a close-up of a smartphone screen with a blue screen protector being applied. A white box in the top right corner contains the text "Alumina Silicate" and the chemical formula $(Al_2O_3) + (SiO_2)$. Below this, the text reads "Guard your display from scratches and harm's way with AluminaCore glass." At the bottom, there are three icons: a military grade tested logo, "10^x Than regular Tempered Glass", and "9H⁺ Glass Hardness".

OPERATING INSTRUCTIONS

Once installed, your Spigen GlasTR EZ FIT Pro screen protector is designed to integrate seamlessly with your Samsung Galaxy S25 FE, providing enhanced protection without compromising user experience.

- **Display Clarity:** The screen protector offers ultra-clear display with maximum light transmittance, ensuring your screen's original visual quality is preserved.
- **Touch Sensitivity:** Experience fast and highly responsive touch sensitivity with zero lag, allowing for smooth navigation and interaction with your device.
- **Fingerprint Sensor:** The screen protector is designed to work with the in-display fingerprint sensor. If you experience issues, re-register your fingerprints after installation for optimal performance.
- **Case Friendly Design:** This screen protector is specifically designed to be compatible with Spigen cases, ensuring a perfect fit and comprehensive protection for your device.

MAINTENANCE

To maintain the clarity and effectiveness of your screen protector, follow these simple cleaning guidelines:

- **Regular Cleaning:** Gently wipe the screen protector with a soft, lint-free microfiber cloth to remove dust and smudges.
- **Stubborn Marks:** For more stubborn marks or fingerprints, lightly dampen the microfiber cloth with water or a screen cleaner specifically designed for electronics. Avoid harsh chemicals, alcohol, or abrasive materials, as these can damage the oleophobic coating.
- **Avoid Excessive Force:** Do not apply excessive pressure when cleaning, as this could potentially dislodge the screen protector or damage the device screen.

TROUBLESHOOTING

If you encounter any issues after installation, refer to the following common solutions:

- **Air Bubbles:** Small air bubbles are common immediately after installation and often disappear within 24-48 hours. For larger or persistent bubbles, use the provided squeegee tool to gently push them towards the nearest edge. If a bubble is caused by a dust particle, it may be necessary to carefully lift a corner of the protector (using a dust removal sticker) to remove the dust, then reapply.
- **Fingerprint Sensor Issues:** If the in-display fingerprint sensor is not responding as expected, it is recommended to delete your existing fingerprints and re-register them after the screen protector has been applied. Ensure your finger is clean and dry during the re-registration process.
- **Reduced Touch Sensitivity:** While designed for high sensitivity, if you notice a slight decrease, check your phone's display settings for a 'Touch sensitivity' or 'Glove mode' option and enable it if available.
- **Misalignment:** If the screen protector is significantly misaligned, it may be necessary to remove it and attempt re-installation with a new protector (if a spare is provided in your pack) or contact customer support.

SPECIFICATIONS

Feature	Detail
Brand	Spigen
Model Name	GlasTR EZ FIT Pro (AGL10202)
Compatible Devices	Samsung Galaxy S25 FE
Material	High Alumina Silicate Tempered Glass
Item Hardness	9H+
