Ciays 28 Inch Propane Fire Pit Table Instruction Manual

Model: CIFPT57B-28-US

1. INTRODUCTION

Thank you for purchasing the Ciays 28 Inch Propane Fire Pit Table. This product is designed to provide warmth and ambiance for your outdoor gatherings. Please read this manual thoroughly before assembly and operation to ensure safe and efficient use. Keep this manual for future reference.

2. SAFETY INFORMATION

WARNING: For outdoor use only. Do not store or use gasoline or other flammable vapors and liquids in the vicinity of this or any other appliance.

Always follow local codes and regulations for propane gas appliances. Failure to do so may result in fire, explosion, or serious injury.

- Keep children and pets away from the fire pit during operation.
- Ensure adequate ventilation. Do not use in an enclosed space.
- Do not touch hot surfaces. Use protective gloves if necessary.
- Never leave the fire pit unattended when in use.
- Keep the area around the fire pit clear of combustible materials, gasoline, and other flammable liquids and vapors.

- Always turn off the gas supply at the propane tank when not in use.
- Perform a leak test on all gas connections before first use and after any tank change.

3. PACKAGE CONTENTS

Before assembly, ensure all parts are present and undamaged. If any parts are missing or damaged, do not attempt to assemble the product. Contact customer support for assistance.

- Fire Pit Table Body (1)
- Steel Lid (1)
- Lava Rocks (Bag)
- Stainless Steel Burner (Pre-installed)
- Regulator Hose (Pre-installed)
- Adjustable Feet (Pre-installed)
- Instruction Manual (This document)

4. SETUP AND ASSEMBLY

The Ciays Fire Pit Table comes largely pre-assembled. Follow these steps for final setup:

1. **Unpack:** Carefully remove all components from the packaging.
2. **Positioning:** Place the fire pit table on a flat, stable, non-combustible surface outdoors. Ensure there is adequate clearance from walls and other objects.
3. **Adjust Feet:** Use the adjustable feet at the bottom of the table to level the unit on uneven surfaces. This ensures stability and proper operation.

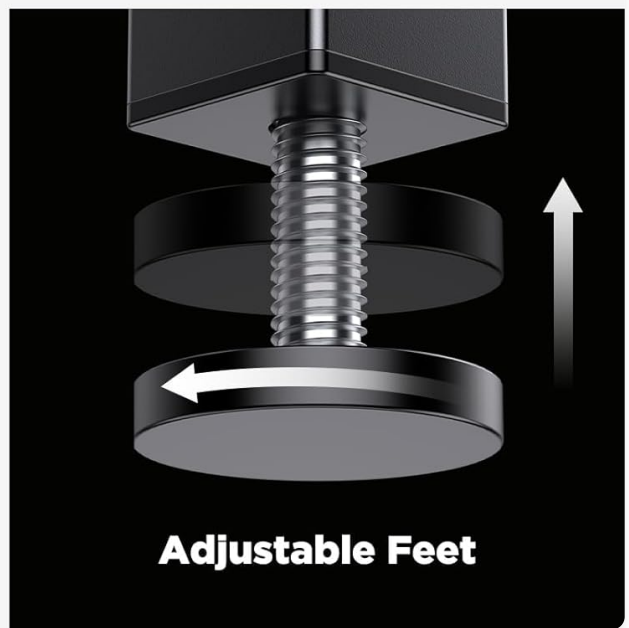

Image: Detailed view showing the adjustable feet mechanism, the hooks for storing the removable lid, and the included lava rocks.

- Propane Tank Installation:** Open the access door on the side of the fire pit table. Place a standard 20 lb propane tank (not included) inside the designated compartment. Connect the regulator hose from the fire pit to the propane tank valve. Hand-tighten the connection securely. Ensure the tank is upright and stable.

Product Dimensions

20 lb propane tank storage

Image: The fire pit table with its side door open, revealing the internal compartment designed to store a 20 lb propane tank. Product dimensions are also indicated.

5. **Lava Rock Placement:** Carefully distribute the provided lava rocks evenly over the burner area. Do not cover the igniter or burner holes completely.
6. **Leak Test:** Before first use, perform a leak test. Mix a solution of soapy water (50% soap, 50% water). With the propane tank valve open and the fire pit control knob in the OFF position, apply the solution to all gas connections. If bubbles appear, there is a leak. Close the propane tank valve immediately and tighten connections. Repeat the test. If leaks persist, do not use the appliance and contact customer support.

5. OPERATING INSTRUCTIONS

Follow these steps to safely light and operate your fire pit table:

1. **Open Gas Supply:** Slowly open the valve on the propane tank counter-clockwise.
2. **Ignition:** Locate the control knob on the side of the fire pit table. Push the control knob in and turn it counter-clockwise to the "ON" position. While holding the knob in, press the igniter button repeatedly until the burner ignites. You should hear a clicking sound and see flames.

Reliable Ignition System

Turn, start, and control with ease

Image: A detailed view of the control panel, illustrating the igniter button and the knob for adjusting flame intensity from minimum to maximum.

3. **Adjust Flame:** Once ignited, release the control knob. You can then rotate the knob to adjust the flame height and heat output (up to 50,000 BTU) to your desired level.
4. **To Turn Off:** Turn the control knob clockwise to the "OFF" position. Then, close the valve on the propane tank completely. Allow the unit to cool down before covering or moving.

Image: A split image demonstrating the versatility of the fire pit table, showing it in use with a flame for warmth and ambiance, and then with the lid on, functioning as a solid surface coffee table.

6. MAINTENANCE

Regular maintenance will prolong the life of your fire pit table.

- **Cleaning:** Allow the unit to cool completely before cleaning. Wipe exterior surfaces with a soft, damp cloth. Do not use abrasive cleaners or solvents.
- **Lava Rocks:** Periodically inspect lava rocks for debris. Replace if they become excessively dirty or degraded.
- **Storage:** When not in use, especially during off-season or inclement weather, cover the fire pit table with a weather-resistant cover (not included) to protect it from the elements. Store the propane tank in a well-ventilated area, away from direct sunlight and heat sources.
- **Burner Inspection:** Annually inspect the stainless steel burner and gas connections for any signs of wear, damage, or blockages. Ensure the burner ports are clear.

Built for Strength & Durability

7. TROUBLESHOOTING

If you encounter issues with your fire pit table, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Burner does not ignite.	No gas flow; Igniter issue; Low propane.	Check propane tank valve is fully open. Ensure tank has gas. Check igniter battery (if applicable). Ensure igniter pin is clean and properly spaced from burner.
Low flame or flickering flame.	Low propane; Regulator issue; Blocked burner ports.	Check propane level. Ensure regulator hose is not kinked. Clean burner ports. Reset excess flow valve by closing tank valve, turning off control knob, waiting 5 minutes, then slowly reopening tank valve.

Problem	Possible Cause	Solution
Smell of gas.	Gas leak.	Immediately turn off gas at the tank. Perform a leak test (see Setup section). Do not operate if a leak is detected. Contact qualified service personnel.

8. SPECIFICATIONS

Feature	Detail
Brand	Ciays
Model Number	CIFPT57B-28-US
Material	Alloy Steel
Product Dimensions	28"D x 28"W x 25"H
Item Weight	45.19 Pounds
Fuel Type	Liquefied Petroleum Gas (Propane)
Heat Output	50,000 BTU
Color	Solid Black
Shape	Square
UPC	840478837964

9. WARRANTY AND SUPPORT

For warranty information or technical support, please refer to the official Ciays website or contact their customer service directly. You may also find additional resources, including a PDF version of the installation manual, on the product's Amazon listing page.
