7. TROUBLESHOOTING

If you encounter issues with your YIKEDA Handheld Steam Cleaner, refer to the following common problems and solutions:

- Check if the water tank is empty. Refill if necessary.
- Ensure the unit is properly plugged in and powered on.
- Allow sufficient time for the unit to heat up (approx. 10 seconds).
- Check for blockages in the nozzle or hose. Clean if obstructed.

- Ensure all attachments are securely fastened.
- Do not overfill the water tank.
- **Power Indicator Not Lighting Up:**
 - Verify the power cord is securely plugged into both the unit and the electrical outlet.
