Redragon K686 HE

Redragon K686 HE Rapid Trigger Gaming Keyboard User Manual

Model: K686 HE

Brand: Redragon

INTRODUCTION

This manual provides detailed instructions for the Redragon K686 HE Rapid Trigger Gaming Keyboard. It covers setup, operation, key features, maintenance, and troubleshooting to ensure optimal performance and user experience. Please read this manual thoroughly before using your keyboard.

PACKAGE CONTENTS

Verify that all items are present in the package:

- Redragon K686 HE Rapid Trigger Gaming Keyboard
- USB Cable (USB-A to USB-C)
- Keycap/Switch Puller
- Spare Switches

SETUP

1. Wired Connection

Connect the provided USB-A to USB-C cable to the keyboard's USB-C port and then to an available USB port on your computer. The keyboard will be automatically detected and ready for use.

2. Software Installation and Calibration

The K686 HE keyboard supports both a desktop client (Windows-exclusive) and web-based driver software for advanced customization. For optimal performance and to access features like Rapid Trigger and PRCS, it is recommended to install or access the software.

- **Desktop Client:** Download and install the Redragon software from the official Redragon website (for Windows users).
- **Web-based Driver:** For other operating systems, access the web-based driver directly via your browser. Visit redragonshop.com for more information and access.

Initial Calibration: After connecting and installing the software, it is crucial to calibrate all keys for initial use. This process helps prevent potential defective key responses and ensures precise actuation.

OPERATING INSTRUCTIONS

Key Features

- **UltraMag Magnetic Switches:** The keyboard features next-generation UltraMag magnetic switches with a dual-module floating structure for enhanced stability and precision. The full-POM construction with an enclosed base provides a smooth keystroke experience.
- **Rapid Trigger Technology:** Utilize the software to enable Rapid Trigger ON, allowing for precise actuation point adjustment between 0.1mm and 3.4mm. This feature enables dynamic activation and deactivation, optimizing response times for gaming.
- **8K Hyper-Polling:** Experience ultra-low latency with an 8,000Hz hyper-polling rate, transmitting inputs up to 8 times faster (0.125ms lowest latency) for immediate in-game actions.
- **PRCS Technology (4 Modes):** The revolutionary PRCS (Precision Response Control System) technology offers 4 distinct modes to eliminate redundant inputs, providing clean and precise actions, particularly beneficial in competitive gaming.
- **DKS/MT/TGL Modes:** Advanced control modes allow for detailed customization of key presses. DKS dynamically adjusts key processes, MT adjusts click or long press events, and TGL defines continuous trigger switches.
- **98-Key Layout with Control Knob:** The compact 98-key layout retains full functionality while saving desk space. An integrated control knob provides convenient access to backlight brightness and media controls (volume, play/pause, switch tracks).

Control Knob Functions

The multi-function knob located on the keyboard provides quick access to various settings:

- **Press:** Toggle backlight/sound on/off.
- **Rotate Clockwise:** Increase backlight brightness or volume.
- **Rotate Counter-clockwise:** Decrease backlight brightness or volume.

Backlight Control

The keyboard features 18 customizable backlight modes. Use the following key combinations to adjust:

- **Fn + ↑ / ↓**: Adjust backlight brightness (increase/decrease).
- **Fn + ← / →**: Adjust breathing speed of backlight effects (increase/decrease).

MAINTENANCE

Cleaning

To maintain the keyboard's appearance and functionality:

- Use a soft, lint-free cloth to wipe the surface of the keyboard.
- For dust and debris between keycaps, use compressed air.
- Avoid using harsh chemicals or abrasive materials, as they may damage the finish.

Keycap and Switch Replacement

The K686 HE keyboard features hot-swappable switches, allowing for easy replacement. Use the provided keycap/switch puller:

- Gently remove keycaps using the keycap puller.
- Use the switch puller to carefully extract the switches.
- Align new switches with the PCB sockets and press firmly until they click into place.
- Reattach keycaps.

TROUBLESHOOTING

Issue	Possible Solution
Keyboard not responding	Ensure the USB-C cable is securely connected to both the keyboard and the computer. Try a different USB port or cable. Restart your computer.
Keys not actuating correctly	Perform a key calibration using the Redragon software. Ensure switches are properly seated. If a switch is faulty, replace it with a spare.
Backlight not working or dim	Adjust brightness using Fn + ↑. Check software settings for backlight configuration.
Software not detecting keyboard	Ensure the keyboard is connected via USB. Reinstall the desktop client or try accessing the web-based driver in a different browser.

If you encounter issues not listed here, please refer to the Redragon support website or contact customer service for further assistance.

SPECIFICATIONS

Feature	Detail
Model	K686 HE
Layout	98 Keys
Switch Type	UltraMag Magnetic Switches (POM)
Actuation Point	Adjustable 0.1mm - 3.4mm
Polling Rate	8000Hz
Connectivity	Wired (USB-C)
Keycaps	PBT Round Keycaps
Backlighting	RGB (18 modes)
Noise Dampening	2-Layer (3.5mm PO Foam, Bottom Socket Foam)
Dimensions	16.93 x 7.28 x 2.48 inches
Item Weight	2.46 pounds
Batteries	1 Lithium Polymer (required for internal functions, wired operation)
Compatible Devices	PC
