

WSKEN iPhone 17 Pro Max

WSKEN iPhone 17 Pro Max 360-Degree Privacy Screen Protector Instruction Manual

Model: iPhone 17 Pro Max

1. PRODUCT OVERVIEW

The WSKEN 360-Degree Privacy Screen Protector for iPhone 17 Pro Max is designed to safeguard your device's screen from physical damage and protect your digital privacy. This tempered glass protector offers comprehensive 4-way, 360-degree anti-spy functionality, making your screen content visible only to you from direct viewing angles. It features a unique auto dust-removal installation system for a bubble-free application and enhanced durability against drops and scratches.

3. INSTALLATION GUIDE

Follow these steps for a precise and bubble-free installation of your WSKEN Privacy Screen Protector. It is recommended to perform the installation in a dust-free environment.

3.1 Preparation

1. Ensure your iPhone 17 Pro Max is clean and free of any existing screen protectors or cases.
2. Open the cleaning kit. Use the wet wipe to thoroughly clean the screen surface of your iPhone.
3. Use the microfiber cloth to dry the screen completely.
4. Use the dust absorber sticker to remove any remaining dust particles from the screen. Ensure the screen is spotless before proceeding.

3.2 Using the Auto Alignment Tool

5. Open the auto alignment tool (mounting box).

6. Place your iPhone 17 Pro Max into the designated slot within the mounting box, screen side up. Ensure it sits securely.
7. Take one privacy screen protector. Align the small pins on the screen protector with the corresponding holes in the mounting box. Gently press the screen protector down into place.
8. Close the top cover of the mounting box.
9. Locate the "PULL" tab at the bottom of the mounting box. Hold the mounting box firmly with one hand and slowly pull the tab completely out with the other hand. This action will automatically apply the screen protector to your phone, removing dust and air bubbles.
10. Once the tab is fully removed, open the top cover of the mounting box.
11. Carefully peel off the outer protective film from the newly installed screen protector.
12. Use the provided bubble remover tool (squeegee) to gently push out any remaining small air bubbles towards the edges of the screen.

4. OPERATING THE PRIVACY FEATURE

The WSKEN 360-Degree Privacy Screen Protector utilizes advanced micro-louver technology to restrict viewing angles. When viewed directly, your screen will appear clear and vibrant. However, from angles beyond approximately 45 degrees (horizontally and vertically), the screen will appear darkened, preventing others from seeing your content.

- **Optimal Viewing:** For the clearest view, look directly at your screen.
- **Privacy Protection:** Content becomes invisible to onlookers from all four sides (left, right, top, bottom) when viewed at an angle.
- **Face ID Compatibility:** The precise cutout ensures full functionality of Face ID and the front camera without blurring or interference.

5. CARE AND MAINTENANCE

To maintain the clarity and effectiveness of your screen protector:

- Clean the screen regularly with a soft, lint-free cloth (like the provided microfiber cloth).
- For stubborn smudges, lightly dampen the cloth with water or a screen-safe cleaner. Avoid harsh chemicals.
- Do not use abrasive materials or excessive force when cleaning, as this may damage the privacy layer or the screen protector's surface.

6. TROUBLESHOOTING

6.1 Air Bubbles After Installation

While the auto alignment tool is designed for bubble-free installation, small bubbles may occasionally appear. Use the provided squeegee to gently push them towards the nearest edge of the screen. For persistent bubbles, lift the nearest edge of the protector slightly and reapply, pushing the bubble out.

6.2 Reduced Screen Brightness

Privacy screen protectors inherently reduce screen brightness due to their filtering technology. For an optimal viewing experience, especially in brightly lit environments, you may need to increase your iPhone's screen brightness settings. This is a normal characteristic of privacy filters.

Video 3: Visual reminder to adjust screen brightness for optimal viewing with the privacy screen protector.

6.3 Alignment Issues

The auto alignment tool is designed for perfect alignment. If you experience significant misalignment, ensure your phone was correctly seated in the mounting box and the screen protector pins were properly engaged before pulling the tab. If necessary, use the second screen protector provided in the package, carefully following all installation steps.

7. PRODUCT SPECIFICATIONS

Brand	WSKEN
Compatible Device	iPhone 17 Pro Max
Material	Tempered Glass
Item Hardness	9H
Special Feature	4-Way 360-Degree Privacy, Auto Dust-Remove, Shatterproof
