Video 5.1: FABATO Round Lift Top Coffee Table Assembly Guide

This video provides a step-by-step visual guide for assembling your coffee table, ensuring all components are correctly installed.

General Assembly Steps:

1. Unpack all components and verify against the parts list.
2. Attach the support panels to the base plate using the provided screws and tools.
3. Secure the top support frame to the vertical posts.
4. Install the fluted side panels, ensuring they slide smoothly into their grooves.
5. Attach the lift-top mechanism to the internal structure.
6. Carefully align and attach the main tabletop to the lift mechanism.
7. Tighten all screws securely once the table is fully assembled and stable.

6. OPERATING INSTRUCTIONS

Using the Lift-Top:

- To raise the tabletop, gently pull the front edge of the table upwards. The hydraulic mechanism will assist in lifting it to the desired height.
- To lower the tabletop, apply gentle downward pressure on the front edge. Guide it slowly back into the closed position, being mindful of fingers to avoid pinch points.

Accessing Storage:

- **Hidden Compartment:** The compartment under the lift-top is accessible when the top is raised.
- **Side Shelves:** Use the convenient handle on the fluted side panel to slide the door open, revealing the two-tier shelves. Slide the door back to conceal the contents.

7. MAINTENANCE AND CARE

- **Cleaning:** Wipe the table surface with a soft, damp cloth. Avoid using harsh chemicals or abrasive cleaners, as they may damage the finish.
- **Spills:** Clean up spills immediately to prevent staining.
- **Protection:** Use coasters for drinks and placemats for hot items to protect the tabletop.
- **Inspection:** Periodically check all screws and connections to ensure they remain tight. Retighten if necessary.
- **Movement:** When moving the table, lift it rather than dragging it to prevent damage to the legs and floor.

8. TROUBLESHOOTING

- **Lift-top is stiff or difficult to operate:** Ensure no obstructions are present in the mechanism. The mechanism may loosen with regular use. If issues persist, check the hydraulic lifters for proper installation.
- **Sliding door is stiff:** Check for any debris in the curved groove. Ensure the door is properly aligned. Applying a small amount of silicone-based lubricant to the track may help.
- **Table feels wobbly:** Verify that all assembly screws are fully tightened. Ensure the table is placed on a flat, even surface.
- **Missing parts or hardware:** If any parts are missing or damaged upon arrival, please contact customer support immediately for assistance.

9. WARRANTY AND SUPPORT
