4. SETUP AND ASSEMBLY

Assembly of the RALGEND Twin Corner Bed Frame is designed to be straightforward with clearly coded parts and visual instructions. It is recommended to assemble with a partner.

4.1 General Assembly Steps

1. Unpack all components and lay them out on a clean, soft surface to prevent scratches.
2. Identify all parts using the provided parts list and hardware pack.
3. Follow the step-by-step visual instructions provided in your package. Pay close attention to bolt sizes and orientation of parts.
4. Securely fasten all connections, but avoid over-tightening until the frame is fully assembled to allow for minor adjustments.
5. Install the LED strip according to the instructions, ensuring it is positioned correctly for the side shelf pieces.
6. Place the mattress (not included) onto the bed frame. The four non-slip metal stoppers will help keep it in place.

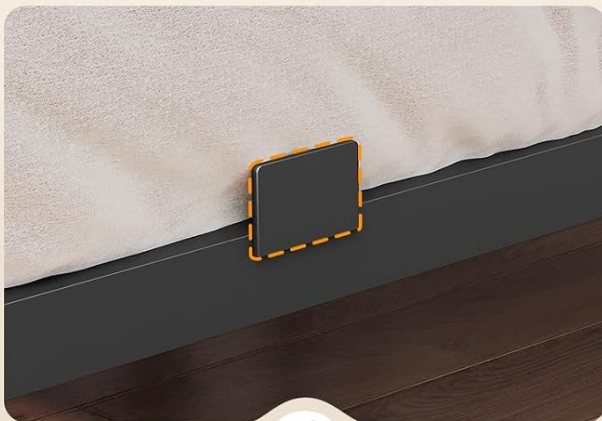

4.2 Assembly Tips

- Some steps may be easier if completed out of the suggested order. For example, installing the top shelf of the headboard might be easier after securing other headboard components.
- Ensure sufficient space for the socket adapter for the LED lights and side shelf pieces during installation.
- When installing the mattress support bars, do not overtighten the frame connections to ensure the bars fit into their grooves easily.

7. TROUBLESHOOTING

Problem	Possible Cause	Solution
Bed frame feels wobbly or unstable.	Loose fasteners.	Check and tighten all screws and bolts. Ensure all connections are fully engaged.
LED lights are not working.	Power connection issue; faulty LED strip.	Ensure the USB cord for the LED lights is properly plugged into a power source (e.g., one of the bed's USB ports or a wall adapter). If still not working, the LED strip may need replacement.
Parts do not align during assembly.	Manufacturing tolerance; incorrect orientation.	Double-check the orientation of the parts against the visual instructions. Loosen adjacent fasteners slightly to allow for adjustment, then re-tighten. If a part is significantly misaligned or warped, contact customer support.
Mattress slides on the frame.	Non-slip stoppers not installed or ineffective.	Ensure the four non-slip metal stoppers are correctly installed at the corners of the bed frame.
Under-bed drawers do not roll smoothly.	Debris in wheels; uneven floor.	Clean any debris from the drawer wheels. Ensure the bed is on a level surface.
