

T3 Micro 301389-UL-10

T3 Micro 2-in-1 Curling Straightener User Manual

Model: 301389-UL-10

INTRODUCTION

The T3 Micro 2-in-1 Curling Straightener is a versatile styling iron designed to effortlessly straighten, curl, or wave hair in a single pass. This manual provides essential information for the safe and effective use of your device.

SETUP AND INITIAL USE

1. **Preparation:** Ensure your hair is clean, dry, and free of tangles. Apply a heat protectant spray to minimize heat damage.
2. **Power On:** Press the Power button to turn the iron on. The buttons will illuminate, and the screen will display the current temperature.
3. **Temperature Selection:** Use the + and - buttons to select your preferred temperature. The device offers a range of heat settings to suit various hair types.
4. **Heat-Resistant Glove:** For added protection during styling, especially when curling or waving, wear the included heat-resistant glove.

House your tool in the included **LIPSTICK CASE** for easy storage and travel.

The digital display allows for precise temperature adjustment.

OPERATING INSTRUCTIONS

Straightening Hair

1. Section your hair into manageable portions.
2. Take a small section of hair and place it between the plates near the roots.
3. Gently clamp the plates and glide the straightener down the hair strand from root to tip in a smooth, continuous motion.
4. Repeat until the desired straightness is achieved for all sections.

BEFORE

AFTER

Achieve sleek, straight hair by gliding the iron from root to tip.

Curling and Waving Hair

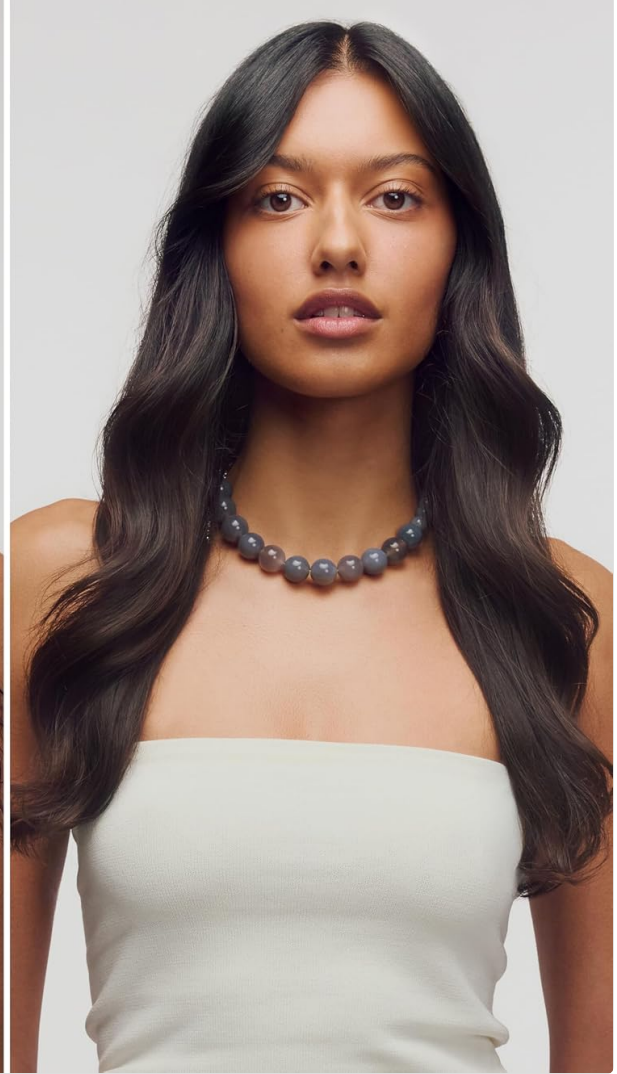

The T3 Curling Straightener features 360-degree externally heated arms and beveled CeraGloss™ ceramic plates, allowing for effortless curling and waving.

1. Section your hair into manageable portions.
2. For curls, wrap a section of hair around the outside of the closed iron, starting near the root.
3. Slowly glide the iron down the hair strand, maintaining the wrapped position. The external heat will form the curl.
4. For waves, use a rocking motion with the iron, alternating between clamping and releasing pressure as you move down the hair strand.
5. Allow curls/waves to cool before styling further to set the shape.

BEFORE

AFTER

Wrap hair around the heated barrel to create curls.

The beveled CeraGloss™ ceramic arms penetrate hair from all sides for quick, effortless curling and waving.

CARE AND MAINTENANCE

- **Cleaning:** Ensure the device is unplugged and completely cool before cleaning. Wipe the ceramic plates and exterior with a soft, damp cloth. Do not use abrasive cleaners or immerse the device in water.
- **Storage:** After use, allow the straightener to cool completely. House your tool in the included lipstick case for easy and safe storage, protecting the plates from damage.
- **Cord Care:** Do not wrap the power cord around the device, as this can damage the cord. Store the cord loosely.

The included lipstick case provides convenient and safe storage.

TROUBLESHOOTING

- **Device Not Turning On:** Ensure the power cord is securely plugged into a functional electrical outlet. Check for any tripped circuit breakers.
- **Not Heating Up:** Verify that the device is powered on and the temperature setting is selected. Allow a few moments for the plates to reach the set temperature.

- **Hair Snagging:** Ensure hair is thoroughly detangled before use. Take smaller sections of hair to prevent snagging.
- **Inconsistent Results:** Ensure hair is completely dry. Adjust temperature settings according to your hair type and desired style. For curling, ensure consistent wrapping and gliding speed.

If issues persist, please refer to the support section for further assistance.
