# hizpo Android 14 9-inch Car Radio User Manual

Model: hizpo Android 14 Car Radio (B0FKT2SP66)

Compatible with Citroen C2 C3 (2001-2010)

## INTRODUCTION

---

Thank you for choosing the hizpo Android 14 9-inch Car Radio. This manual provides essential information for the proper installation, operation, and maintenance of your new car multimedia system. Please read these instructions carefully before use to ensure optimal performance and safety.

## SETUP AND INSTALLATION

---

### 1. Package Contents

Before beginning installation, please verify that all components are present:

- 9-inch Touch Screen Unit
- Custom Frame for Citroen C2 C3
- Power Cable Harness
- RCA Cables
- USB Cables
- GPS Antenna
- External Microphone (optional/included)
- CANBUS Decoder (if applicable for steering wheel controls)
- Other necessary accessories

### 2. Vehicle Compatibility

This car radio is designed for Citroen C2 and C3 models manufactured between 2001 and 2010. Please confirm your vehicle's center console matches the compatible configurations shown below before installation.

## Support Carplay/Android Auto System

Phone | Music | Maps | Waze | Podcasts

Enjoy the convenience and fun of traveling

Image: Examples of compatible Citroen C2 and C3 dashboards (2001-2010) where the car radio can be installed. Green checkmarks indicate compatible layouts, while red crosses indicate incompatible ones.

### 3. Installation Steps

Installation is generally straightforward, but professional installation is recommended if you are unfamiliar with car electronics. Ensure the vehicle's battery is disconnected before starting.

1. **Remove Original Radio:** Carefully remove the existing car radio and any surrounding trim. For some Citroen C3 models, it may be necessary to remove the small storage compartment below the original 1DIN radio to properly fit the new 9-inch screen.
2. **Connect Wiring Harness:** Connect the provided power cable harness, RCA cables, USB cables, and GPS antenna to the corresponding ports on the new hizpo unit. Ensure all connections are secure.
3. **CANBUS Connection:** If your vehicle supports steering wheel controls, connect the CANBUS decoder (if included) to integrate these functions.
4. **Test Connections:** Before fully mounting, temporarily reconnect the battery and test the unit's basic functions (power on, sound, touch screen response).
5. **Mount the Unit:** Secure the new car radio unit into the dashboard opening using the custom frame. Ensure it is firmly in place.
6. **Reassemble:** Reinstall any removed trim pieces.

## OPERATING INSTRUCTIONS

### 1. Basic Operation

The unit features a 9-inch capacitive touchscreen with Android 14 OS. Navigate through menus and applications by touching and swiping on the screen. The system is powered by a 4-core processor with 2GB RAM and 64GB internal storage, providing a smooth user experience.

## 9 inch Capacitive Touch Screen

Multi-touch, more sensitive touch response, flexible slide, better light transmission rate, the display is much more clear, translucent.

Image: A hand interacting with the 9-inch capacitive touch screen, demonstrating its multi-touch capabilities and responsive interface.

### 2. Wireless CarPlay / Android Auto / MirrorLink

The car radio supports wireless Apple CarPlay and both wireless and wired Android Auto, along with MirrorLink functionality. Connect your smartphone via Wi-Fi, Bluetooth, or USB cable to access phone features directly on the car radio screen.

- **CarPlay/Android Auto:** Enjoy online navigation, make calls, send/receive messages, and listen to music/podcasts while focusing on driving.
- **Connection:** For wireless CarPlay/Android Auto, connect via Bluetooth and Wi-Fi. For wired Android Auto, use a USB cable.

Image: The Apple CarPlay interface displayed on the car radio screen, showing various app icons like Phone, Music, and Maps.

### 3. GPS Navigation

The unit features an integrated GPS module for accurate and fast map tracking, even without an internet connection. It supports 2D/3D map views and allows music playback during navigation (dual zone function).

- **Offline Maps:** Supports offline map data for navigation without an internet connection.
- **Online Navigation:** Compatible with various online navigation applications when connected to the internet.

## GPS Navigator

Operation System: Android.

Voice Guidance: Yes.

Support 2D/3D Map Views: Yes  
Dual Zone: Yes, navigating while music playing.

Offline Navi: Yes, support offline map data.

Online Navi: Yes, support online navigation apps.

## 4. Multimedia Functions

The car radio supports a wide range of multimedia formats for music and video playback. It includes a 30-band EQ DSP for sound customization and surround sound effects.

- **Music Formats:** MP3, WMA, AAC, RM, FLAC, etc.
- **Video Formats:** MPEG-1/2/4, H264, H263, VC1, RMVB, DivX, Sorenson Spark, VP8, AVS Stream, etc.
- **Picture Formats:** JPG/BMP/JPEG/GIF/PNG.

## Support Multimedia Parameters

**Music Format:** MP3, WMA, AAC, RM, FLAC etc

**Video Format:** MPEG-1/2/4, H264, H263, VC1, RV, RMVB, DivX, Sorenson Spark, Spark, VP8, AVS Stream...

**Picture Format:** JPG/BMP/JPEG/GIF/PNG

Image: The car radio screen displaying a video playback, demonstrating its multimedia capabilities.

## 5. Bluetooth Connectivity

Connect your phone via Bluetooth for hands-free calling and audio streaming. The built-in microphone ensures clear voice capture, and car speakers provide clear audio for calls.

# Do Two Things at Once

Now you can switch and run two apps on screen side by side. So go ahead listening to music through your favorite app, whilst navigating (google map only) ,or making phone call with your browser open or other menu at the same time.

## 6. Steering Wheel Control (SWC)

The unit supports steering wheel controls, allowing you to change music tracks, adjust volume, and manage calls directly from your steering wheel for safer driving.

## Steering Wheel Control

You could change the music, volume more easily via your steering wheel and also make your driving safer.

Image: The car radio screen displaying the steering wheel control configuration interface, with a visual representation of a steering wheel control button.

### 7. Other Features

- **Split Screen:** Run two applications simultaneously on the screen, such as navigation and music playback.
- **WLAN/4G:** Connect to Wi-Fi via your phone's hotspot to access the internet, download apps from Google Play, and browse online.
- **AM/FM Radio with RDS:** Enjoy radio broadcasts with clear reception and RDS (Radio Data System) support.
- **Backup Camera Support:** The unit is prepared for connection to a backup camera (not included), displaying the view on the screen when reverse gear is engaged.

### MAINTENANCE

To ensure the longevity and optimal performance of your hizpo car radio, follow these maintenance guidelines:

- **Screen Cleaning:** Use a soft, lint-free cloth to gently wipe the touchscreen. Avoid abrasive cleaners or solvents that could damage the screen.
- **Software Updates:** Periodically check for and install software updates to ensure the system runs efficiently and has the latest features and security patches.

- **Avoid Extreme Temperatures:** Do not expose the unit to extreme heat or cold, as this can affect its electronic components.
- **Cable Connections:** Ensure all cables remain securely connected. Loose connections can lead to intermittent issues.

## TROUBLESHOOTING

If you encounter issues with your car radio, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Unit does not power on	Loose power connection, blown fuse, incorrect wiring.	Check power cable connections. Inspect vehicle's fuse box and the unit's fuse. Verify wiring diagram.
No sound	Volume too low, mute activated, incorrect speaker wiring, faulty RCA connections.	Increase volume. Check mute settings. Verify speaker and RCA cable connections.
Steering wheel controls not working	CANBUS not connected or configured, incompatible vehicle, initial setup issue.	Ensure CANBUS decoder is correctly installed and configured in settings. Contact support if issues persist after initial setup.
Touchscreen unresponsive or inaccurate	Software glitch, screen calibration needed, physical damage.	Restart the unit. Check for screen calibration options in settings. If physically damaged, contact support.
GPS signal lost or inaccurate	GPS antenna not properly installed or obstructed, software issue.	Ensure GPS antenna is mounted in a clear location with an unobstructed view of the sky. Restart navigation app or unit.
Bluetooth connection issues	Bluetooth off, pairing mode not active, interference.	Ensure Bluetooth is enabled on both the unit and your phone. Put the unit in pairing mode. Delete previous pairings and try again.

If the problem persists after attempting these solutions, please contact customer support for further assistance.
